Understanding and Teaching Reading Emerald Dechant, 2013-09-13 In the words of Aldous Huxley Every man who knows how to read has it in his power to magnify himself to multiply the ways in which he exists to make his life full significant and interesting Few people question the value of reading in fact most extol its virtues As our culture becomes more complex reading plays an increasingly greater role in satisfying personal needs and in promoting social awareness and growth In the last 20 years the teaching of this invaluable skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of automaticity and fluency in the word identification process Reading is a synthesis of word recognition and comprehension thus this text is about these basic processes and their integration A common plea from teachers today is that research and psychology be translated into teaching behavior Therefore the aim of this book is twofold one to identify report organize and discuss those bits of data research and theory that are most relevant to the teacher's understanding of the reading process and two to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the problems encountered frequently in developmental and remedial teaching

Reading Instruction in America Barbara Ruth Peltzman, 2015-09-18 The diversity of student populations in the United States presents educators with many challenges To provide effective reading instruction for the individual student

teachers must understand the enormous variety of reading methods and materials that exist and make independent decisions based on their students particular needs Research indicates that educators are often influenced by reading instruction fads that quickly fade making it more challenging to develop a repertoire of teaching strategies in which a teacher may have confidence This book examines a variety of reading methods used in American schools from the 19th to the 21st century and the literature promoting or critiquing them to help teachers become informed decision makers and better meet the needs of students
