Cognitive Modeling Francisco José Ruiz de Mendoza Ibáñez, Alicia Galera Masegosa, 2014-06-15 This monograph studies cognitive operations on cognitive models across levels and domains of meaning construction It explores in what way the same set of cognitive operations either in isolation or in combination account for meaning representation whether obtained on the basis of inferential activity or through constructional composition As a consequence it makes explicit links between constructional and figurative meaning The pervasiveness of cognitive operations is explored across the levels of meaning construction argument implicational illocutionary and discourse

structure distinguished by the Lexical Constructional Model This model is a usage based approach to language that reconciles insights from functional and cognitive linguistics and offers a unified account of the principles and constraints that regulate both inferential activity and the constructional composition of meaning This book is of value to scholars with an interest in linguistic evidence of cognitive activity in meaning construction The contents relate to the fields of Cognitive Grammar Cognitive Semantics Construction Grammar Functional Linguistics and Inferential Pragmatics Where Metaphors Come from Zoltán Kövecses, 2015 Kövecses recasts CMT as a contextual theory of metaphor expanding and refining it to account for the ways in which many verbal metaphors are tied to context **Metonymy and Metaphor in Grammar** Klaus-Uwe Panther, Linda L. Thornburg, Antonio Barcelona, 2009 with the advent of Cognitive Linguistics metonymy and metaphor are now recognized as being not only ornamental rhetorical tropes but fundamental figures of thought that shape to a considerable extent the conceptual structure of languages The present volume goes even beyond this insight to propose that grammar itself is metonymical in nature Langacker and that conceptual metonymy and metaphor leave their imprints on lexicogrammatical structure Advances in Cultural Linguistics Farzad Sharifian, 2017-05-02 This groundbreaking collection represents the broad scope of cutting edge research in Cultural Linguistics a burgeoning field of interdisciplinary inquiry into the relationships between language and cultural cognition The materials surveyed in its chapters demonstrate how cultural conceptualisations encoded in language relate to all aspects of human life from emotion and embodiment to kinship religion marriage and politics even the understanding of life and death Cultural Linguistics draws on cognitive science complexity science and distributed cognition among other disciplines to strengthen its theoretical and analytical base The tools it has developed have worked toward insightful investigations into the cultural grounding of language in numerous applied domains including World Englishes cross cultural intercultural pragmatics intercultural communication Teaching English as an International Language TEIL and political discourse analysis **Cultural Linguistics and the Social World** Judit Baranyiné Kóczy, Diana Prodanović Stankić, Olga Panić Kavgić, 2024-10-24 This book approaches cultural conceptualizations of our modern world from cultural linguistic and cognitive perspectives It explores broader topics such as contemporary society media and entertainment migration and identity political discourse educational contexts and creative linguistic innovation all of which are seen as interwoven and mutually complementary segments of our present day social world This publication brings a fresh multi cultural approach reflected in applying the principles of cultural linguistics to the analysis of different aspects of language use across four continents Europe Asia Africa and Australia The issue of shared cultural conceptualizations being their common denominator the chapters of this book shed light on how various cultural groups use language to communicate their ideas and beliefs both within and outside their own culture bearing in mind the often contradictory nature of the present day social world that at the same time unites and disintegrates social groups Benefiting scholars from fields within the broad spectrum of the humanities and social sciences

Metaphors of ANGER across Languages: Universality and Variation Zoltan Kövecses, Réka Benczes, Veronika Szelid, 2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions. Although it has received considerable scholarly attention in a number of disciplines including linguistics, a basic question has still remained unresolved: why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience? By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages, this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why. It also investigates the role that metonymies might play in the emergence of anger-related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger. No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter. The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience, language, and the larger cultural context.

Embodiment in Cross-Linguistic Studies, 2021-11-29 The volume explores the body part eye as a source domain in conceptualization and a vehicle of embodied cognition. It includes in-depth case studies of languages situated in different cultural contexts in Europe, Asia, Africa, America, and Oceania. It also provides insights into cross-linguistic comparison of conceptualization patterns and semantic extension of the term eye on various target domains. The contributions in the volume present a range of cultural models associated with the visual organ which take into account socio-cultural factors and language usage practices. The book offers new material and novel analyses within the subject of polysemy of body part terms. It also adds to studies on metaphor, metonymy, and

cultural conceptualizations within a cognitive linguistic paradigm Seeing and Showing the Unseen Adam Szumorek, 2023-10-31 As humans we think in images and cannot do otherwise Thus metaphor and imagery often viewed as complex literary devices are in fact the very building blocks of human thought and essential components for understanding the nature of God Exploring how the God of Scripture reveals himself through metaphor and imagery Dr Adam Szumorek utilizes Cognitive Linguistics to help students teachers and preachers understand how meaning is communicated in Scripture and conceptualized within the human brain He provides a theological framework for applying Cognitive Linguistics in biblical exegesis demonstrating its value in aiding our understanding of biblical texts and in communicating that understanding to others through sermons that speak to people s minds hearts and imaginations Both richly conceptual and deeply practical this book equips readers to communicate the unseen allowing others to taste touch and see the invisible yet incarnate God

JESUS'S EPITHETS: "TEACHER" AND "PROPHET" Aurel-Onisim LEHACI, 2024-01-01 The book Jesus s Epithets Teacher and Prophet A Cognitive Semantics Approach to Social Roles is based on a completed PhD thesis from the Doctoral School of Languages and Cultural Identities at the University of Bucharest It focuses on the interplay between Jesus s epithets specifically teacher and prophet using cognitive semantics as a framework for analysis The book explores the complementarity of these roles highlighting their portrayal of Jesus s key attributes and his dual human divine identity Cognitive linguistics provides the perspective for delving into these social roles emphasizing their significance in understanding the complexity of Jesus s character It shows that Jesus embodies two complementary epithets teacher and prophet representing distinct approaches to knowledge transmission either through human activity or divine intervention

The chapters systematically examine the roles of teacher and prophet employing cognitive semantics tools and exploring textual fragments The analysis of parables as Jesus s preferred form of teaching uses metaphor and conceptual blending theories providing insights into his pedagogical endeavors The examination of Jesus as a prophet draws upon Dahlgren s stereotypical model establishing compelling evidence for Jesus s prophetic role The final chapter underscores the overlap between the teacher and prophet roles emphasizing the usefulness of the radial concept It challenges the notion of sequential roles asserting that Jesus is simultaneously both a teacher and a prophet with the two functions coexisting The book illustrates the intricate complexity of Jesus s character proving that Jesus not only fulfills but surpasses typical expectations in both roles consistently revealing his dual identity and the permanent truth of both epithets *Waggish Coquetry in South Asian Street Communication* Ali R. Fatihi, 2019-11-13 *Waggish Coquetry in South Asian Street Communication* critically examines the role of coquettish remarks in urban life of South Asia in the context of the sociology and linguistics of South Asian street communication Ali R Fatihi explores the design and structure of coquetry and in so doing sheds light on the role of gendered street communication as a type of sexual harassment Fatihi takes up the semiology of the street focusing on the street as the locus of communication and its meaning in the community The book also describes the role of metaphors in coquettish remarks placing them in the context of the anthropology and sociology of streets and male behavior therein

The Cultural Life of Money Isabel Capeloa Gil, Helena Gonçalves da Silva, 2015-07-01 The book discusses how culture simultaneously shapes and is shaped by the economy Over the past few years as the world has staggered from one financial crisis to another the neat separation of economics and culture has been consistently challenged To understand the current state of affairs it has become increasingly necessary to understand the conjuncture that rules the production of value in economic systems how money shapes social relations and affects discursive practices By discussing the vocabulary by understanding the rhetoric and interpreting the narratives be it of crisis austerity growth welfare neo liberalism or socialism new modes of imaging the economic system may be made possible The book is structured in four chapters dealing with theory and conjuncture *Philosophies of Money with the visual arts and investment The Arts and Finance with literary representation and narrativity Literature and Money Matters and with the cognitive impact of fiduciary representation Cognitive Moneyscapes* This collection analyses the process whereby a material icon invested with the symbolical power to rule social exchange becomes an explanatory narrative determining the way societies produce meaning **Embodiment in Latin Semantics** William Michael Short, 2016-05-11 *Embodiment in Latin Semantics* introduces theories of embodied meaning developed in the cognitive sciences to the study of Latin semantics Bringing together contributions from an international group of scholars the volume demonstrates the pervasive role that embodied cognitive structures and processes play in conventional Latin expression across levels of lexical syntactic and textual meaning construction It shows not only the extent to which universal aspects of human embodiment are reflected in Latin s semantics but also the ways in which Latin

speakers capitalize on embodied understanding to express imaginative and culture specific forms of meaning In this way the volume makes good on the potential of the embodiment hypothesis to enrich our understanding of meaning making in the Latin language from the level of word sense to that of literary thematics It should interest anyone concerned with how people including in historical societies create meaning through language Science in Translation Maeve Olohan, Myriam Salama-Carr, 2014-04-08 Despite the crucial role played by translation in the history of scientific ideas and the transmission of knowledge historians of science have seldom been interested in the translation activity which enabled the spread of those ideas and exerted influence on structures and systems of knowledge Translation scholars too have traditionally shown little interest in theorizing scientific translation Recent conceptualizations of science as public culture institution narrative and rhetorical practice open the way for research on the translation of science to take conceptual and methodological inspiration from studies of discourse rhetoric the sociology of science the history of science the philosophy of science and other related fields This special issue of *The Translator* foregrounds the work of researchers within or on the periphery of translation studies who have begun to interrogate the representation of scientific knowledge through translation Drawing on a wide range of disciplines and models contributors engage with different perspectives and approaches to help promote the visibility of scientific translation and shed light on its complex relationship with power and the construction of knowledge Contributors Brecht Algoet Karen Bennett Lidia Camara Eva Espasa Lieve Jookien Monika Krein K hle Min Hsiu Liao Ruselle Meade Guy Rooryck Dolores S nchez Hala Sharkas Mark Shuttleworth Richard Somerset Liselotte Vandenbussche Sonia Vandepitte

Defining Metonymy in Cognitive Linguistics Réka Benczes, Antonio Barcelona, Francisco José Ruiz de Mendoza Ibáñez, 2011-06-24 While cognitive linguists are essentially in agreement on both the conceptual nature and the fundamental importance of metonymy there remain disagreements on a number of specific but nevertheless crucial issues Research questions include Is metonymy a relationship between entities or domains Is it necessarily referential What is meant by the claim that metonymy is a stand for relationship Can metonymy be considered a mapping How can it be distinguished from active zones or facets Is it a prototype category The ten contributions of the present volume address such core issues on the basis of the latest research results The volume is unique in being devoted exclusively to the delimitation of the notion of metonymy without ignoring points of divergence among the various contributors thus paving the way towards a consensual conception of metonymy *Black Lives Matter vs. All Lives Matter* Abdul Karim Bangura, 2021-09-20 In the wake of the murder of George Floyd in Minneapolis the debate between proponents of Black Lives Matter and All Lives Matter has been reignited For proponents of Black Lives Matter the slogan All Lives Matter is not a call for inclusiveness but a criticism of the Black Lives Matter movement On the other hand advocates of All Lives Matter insist their slogan is about diversity and colorblindness The contributors included in *Black Lives Matter vs All Lives Matter A Multidisciplinary Primer* approach the subject from fields as wide ranging as sociology mathematics linguistics business politics and psychology to name a few This

collection adds complexity and international perspectives to the debate allowing these seemingly simple quarrels over phrasing to be unpacked from many angles A refreshing variety of looks at one of the defining social movements of the last decade and the reaction to it this collection will be valuable to those seeking to understand these movements in ways beyond how they are typically framed
