Processing and Acquisition in Languages of Semitic, Root-Based, Morphology Joseph Shimron, 2003-04-28 This book puts together contributions of linguists and psycholinguists whose main interest here is the representation of Semitic words in the mental lexicon of Semitic language speakers The central topic of the book confronts two views about the morphology of Semitic words The point of the argument is Should we see Semitic words morphology as root based or word based The proponents of the root based approach present empirical evidence demonstrating that Semitic language speakers are sensitive to the root and the template as the two basic elements bound morphemes of Semitic words Those supporting the word based approach present arguments to the effect that Semitic word formation is not based on the merging of roots and templates but that Semitic words are comprised of word stems and affixes like we find in Indo European languages The variety of evidence and arguments for each claim should force the interested readers to reconsider their views on Semitic morphology The Lexicon-Syntax Interface in Second Language Acquisition Roeland van Hout, Aafke Hulk, Folkert

Kuiken, Richard J. Towell, 2003-08-14 Second language acquisition has to integrate the totality of the SLA process which

includes both the learning of the core syntax of a language and the learning of the lexical items that have to be incorporated into that syntax. But these two domains involve different kinds of learning. Syntax is learnt through a process of implementing a particular set of universal structures whereas the learning of lexis is characterised by the building up of associations or connections. Yet these two systems must come together in the creation of a whole linguistic system in the mind of an individual. This book is designed to state the implications of these two paradigms in as clear a way as possible through examples of the research carried out within each paradigm and to examine how they can be made to inter relate in a way which would enable us to explain better the overall process of SLA.

The L2 Acquisition of Tense□Aspect Morphology

M. Rafael Salaberry, Yasuhiro Shirai, 2002-10-24 The present volume provides a cross linguistic perspective on the development of tense aspect in L2 acquisition. Data based studies included in this volume deal with the analysis of a wide range of target languages: Chinese, English, Italian, French, Japanese and Spanish. Theoretical frameworks used to evaluate the nature of the empirical evidence range from generative grammar to functional typological linguistics. Several studies focus on the development of past tense markers but other issues such as the acquisition of a future marker are also addressed. An introductory chapter outlines some theoretical and methodological issues that serves as relevant preliminary reading for most of the chapters included in this volume. Additionally a preliminary chapter offers a substantive review of first language acquisition of tense aspect morphology. The analysis of the various languages included in this volume significantly advances our understanding of this phenomenon and will serve as an important basis for future research.

The Routledge Handbook of Teaching English as an International Language Ali Fuad Selvi, Nicola Galloway, 2024-12-30 The Routledge Handbook of Teaching English as an International Language provides a ground breaking overview of the research on the global spread of English with pedagogical implications. Bringing together a number of key scholars and scholarly discussions on various aspects of teaching English as an International Language (TEIL) this handbook directs research in this field to help inform the much needed paradigm shift in ELT away from idealized native English speaking norms. Reframing English language teaching and teacher education to match the new sociolinguistic landscape of the 21st century this handbook analyzes this topic in seven key areas: Theoretical considerations, Major frameworks and proposals, Principles and practices of teaching and assessing English, Innovative approaches, varied contexts and transformative practices, Diverse teaching settings and populations, Teacher education and professional development, Research developments and future directions. The Routledge Handbook of Teaching English as an International Language is essential reading for scholars and students researching in the areas of World Englishes, English as a lingua franca, English as an international language, Global Englishes, ELT sociolinguistics and critical applied linguistics.

The Second Time Around □ Minimalism and L2 Acquisition Julia Herschensohn, 2000-02-15 Linking recent advances in theoretical syntax and empirical research in language development the book claims that second language acquisition is not totally distinct from first language acquisition but rather is a replay a

relearning of language It argues that Universal Grammar is a template guiding acquisition of L1 while constraining acquisition of L2 Assuming that a syntactic distinction crucial for language and its acquisition is the division between lexical and functional categories it argues that the key to L2 as well as L1 acquisition of syntax is the mastery of morphological features and their linking to functional categories It thus supports the availability of UG to the second language learner and the minimalist claim that cross linguistic variation is morpholexical Constructionism the hypothesis of L2A proposed in this account argues for a period of feature underspecification after loss of the L1 value followed by a progressive building of the L2 value through specific constructions

The Development of Prosodic Structure in Early Words Mitsuhiro Ota, 2003-12-19 This monograph addresses three basic questions regarding the development of word internal prosodic structure How much of the phonological structure of early words is regulated by the same constituents and principles that govern the organization of prosodic structure of mature grammar Why do early words diverge from the adult targets in shape and size And what is the best way to model developmental changes that occur in prosodic structure Answers to these questions are explored through the longitudinal analysis of spontaneous production data from child Japanese The analysis provides new types of evidence and new arguments that the prosodic phonology of young children is largely continuous with that of adults and that the surface child adult divergence in word forms and the overall pattern of developmental changes are best explained in terms of ranked violable constraints on the representation of prosodic structure whose ordering is modified in the course of acquisition

Telicity in the Second Language Roumyana Slabakova, 2001-07-09 The author combines a syntax theoretical treatment of telicity marking and an empirical study of the second language acquisition of English telicity marking by native speakers of Bulgarian a Slavic language It is argued that Vendler's lexical classes of verbs states activities accomplishments and achievements can be represented in four phrase structure templates where lexical properties of the verb and of the object compositionally determine telicity A parameterized distinction between English and Slavic aspect is proposed The book addresses two major acquisition issues 1 what is the nature of the initial hypothesis Bulgarian learners of English entertain regarding telicity marking i e is there native language transfer 2 are adult learners capable of resetting the telicity marking parameter Both L1 transfer and parameter resetting are experimentally supported In addition the study investigates the L2 acquisition of a cluster of complex predicate constructions purportedly related to the telicity parameter in the grammatical competence and in child language acquisition of English

The Acquisition of Japanese as a Second Language Kazuo Kanno, 1999-12-15 This book marks the first ever collection of papers in English on the acquisition of Japanese as a second language Its overarching goal is to broaden and deepen the field of SLA research by focusing on Japanese rather than on more commonly studied European languages Broad in scope and eclectic in approach with chapters by leading scholars in the field The Acquisition of Japanese as a Second Language offers a survey of the far ranging field of SLA research as it applies to Japanese Chapters include studies on input and interaction research into the evaluation of L2

proficiency and investigations of the grammatical system that is the product of second language learning

Bilingualism in the USA Fredric Field, 2011 This text provides an overview of bi and multilingualism as a worldwide phenomenon It features comprehensive discussions of many of the linguistic social political and educational issues found in an increasingly multilingual nation and world To this end the book takes the Chicano Latino community of Southern California where Spanish English bilingualism has over a century and a half of history and presents a detailed case study thereby situating the community in a much broader social context Spanish is the second most widely spoken language in the U S after English yet for the most part its speakers form a language minority that essentially lacks the social political and educational support necessary to derive the many cognitive socioeconomic and educational benefits that proficient bilingualism can provide The issues facing Spanish English bilinguals in the Los Angeles area are relevant to nearly every bi and multilingual community irrespective of nation language and or ethnicity

New Perspectives on Transfer in Second Language Learning Liming Yu, Terence Odlin, 2016 When people attempt to learn a new language the language s they already know can help but also hinder their understanding or production of new forms This phenomenon known as language transfer is the focus of this book The collection offers new theoretical perspectives some in the empirical studies and some in other chapters and consists of four sections considering lexical syntactic phonological and cognitive perspectives The volume provides a wealth of studies on the influence of Chinese on the acquisition of English but also includes studies involving Finnish French Hindi Korean Persian Spanish Swedish and Tamil It will be of great interest to researchers and students working in the areas of crosslinguistic influence in second language acquisition language pedagogy and psycholinguistics

Second Language Pronunciation Ubiratã Kickhöfel Alves, Jeniffer Imaregna Alcantara de Albuquerque, 2022-12-19 In the field of second language L2 acquisition the number of studies focusing on L2 pronunciation instruction and perceptual production training has increased as new classroom methodologies have been proposed and new goals for L2 pronunciation have been set This book brings together different approaches to L2 pronunciation research in the classroom or in the language laboratory 13 chapters written by well known researchers focusing on a variety of first and target languages are divided into four parts Pronunciation development and intelligibility implications for teaching and training studies L2 pronunciation teaching L2 pronunciation training implications for the classroom and Pronunciation in the laboratory High Variability Phonetic Training Intended for researchers in the fields of second language acquisition phonetics phonology psycholinguistics speech therapies speech technology as well as second language teaching this book not only summarizes the current research questions on L2 pronunciation teaching and training but also predicts future scenarios for both researchers and practitioners in the field

Intelligent Tutoring Systems for Foreign Language Learning Merryanna L. Swartz, Masoud Yazdani, 2012-12-06 Multilingual communication within the world community is important for economic political and cultural interactions In a global environment where other languages are increasing in importance in addition to recognized international standards i e

English and French language learning is becoming more important for improved international relations At the same time recent advances in instructional technology make the promise of building intelligent tutoring systems in advanced technology laboratories to teach these language skills a reality in the near future These tutoring systems therefore may help us foster improved methods for acquiring languages As active language learners and instructional technology researchers we felt an international meeting with similar individuals was needed to discuss how such advanced tutoring systems are to be designed and implemented We held such a meeting the results of which are presented in this volume The purpose of this Advanced Workshop sponsored by the NATO Scientific Affairs Division was to bring together a multidisciplinary group of researchers who were active in the development of intelligent tutoring systems for foreign language learning Participants came from computer science computational linguistics psychology and foreign language learning Washington D C was selected for the Workshop site since it is Merryanna's home city the capitol of the United States and an international multilingual community in its own right Masoud agreed to the location with a promise to be shown the White House and graciously volunteered to coordinate activities from the European side

L3 Syntactic Transfer Tanja Angelovska, Angela Hahn, 2017-08-15 This book fills an existing gap in the field of third language acquisition L3A by bringing together theoretical empirical and practical accounts that contribute to informed teaching practices in multilingual classrooms The volume is organised into three sections that focus on prominent syntactic transfer models in the field of L3A and together provide insights into the interplay of the influences of prior languages in L3 syntax and how we can enrich the practical field of instructed L3 acquisition Part I includes original papers dealing with new developments of existing theoretical models on syntactic transfer in L3A and Part II consists of empirical studies testing existing models from different perspectives formal lexico functional and neurocognitive Following these two sections Part III discusses how theory can inform practices for L3 learning and teaching This concise compilation brings to light innovations not only in terms of theoretical refinements and practical implementations but also in offering an impressive range of language combinations This book is intended to act as a unique resource for scholars applied linguists language educators both novices and experts alike in and beyond the field of L3A

The Acquisition of the DP in Modern Greek Theodoros Marinis, 2003-12-19 This book offers new data on the acquisition of functional categories in early child speech Based on longitudinal corpora of five children acquiring Modern Greek as their first language it describes the development of single DPs consisting of definite and indefinite articles complex DPs that require the use of multiple definite articles possessive constructions appositive constructions and Determiner Spreading a form of adjectival modification and number and case marking in nouns and definite articles Detailed quantitative and qualitative analyses show an incremental development of the DP The findings address the debate concerning maturation versus continuity Incremental acquisition of the DP argues in favour of a weak continuity approach to language acquisition Whilst gradual acquisition of the DP remains unexplained within the Principles and Parameters Theory it is fully compatible

within Minimalism as it is argued to result from the gradual acquisition of the features associated with the Greek DP

Encoding Motion Events Till Woerfel, 2018-09-10 Children who grow up as second or third generation immigrants typically acquire and speak the minority language at home and the majority language at school. Recurrently these children have been the subject of controversial debates about their linguistic abilities in relation to their educational success. However, such debates fail to recognise that variation in bilinguals' language processing is a phenomenon in its own right that results from the dynamic influence of one language on another. This volume provides insight into cross-linguistic influence in Turkish, German and Turkish-French bilingual children and uncovers the nature of variation in L1 and L2 oral motion event descriptions by evaluating the impact of language-specific patterns and language dominance. The results indicate that, next to typological differences between the speakers' L1 and L2 language dominance, has an impact on the type and direction of influence. However, the author argues that most variation can be explained by L1/L2 usage preferences. Bilinguals make frequent use of patterns that exist in both languages but are unequally preferred by monolingual speakers. This finding underlines the importance of usage-based approaches in SLA.

Understanding Intercultural Communication Marie-Louise Brunner, 2022-01-04 Today academics, business professionals and private persons alike need to communicate successfully and establish relationships with people from various cultures through digital means. These skills have now become essential in virtual environments. This book provides an in-depth analysis of how interlocutors negotiate meaning and identities in intercultural video-mediated communication as an important step to improving interactions on a global scale. It contributes to understanding the complex negotiation processes and strategies involved in communicating successfully and in establishing rapport in an intercultural and video-mediated context. Speakers in this English as a Lingua Franca setting act as accomplished conversationalists who efficiently employ various strategies to make themselves understood and to preempt interactional difficulties. At the same time, interlocutors re-negotiate identities on various levels in the process of their interactions with conversation partners. Based on these insights, this book concludes with practical suggestions for educational and professional applications.

The Development of Second Language Grammars Elaine C. Klein, Gita Martohardjono, 1999 A collection of papers reflecting the shift away from characterizing second language acquisition as either having or not having access to principles and parameters of Universal Grammar and towards theories of putative L1 influence on the L2 learner.
