Establishing Predominance of English for Specific Purposes within Adult English

Language Teaching Nijolė Burksaitienė, Nadežda Stojković, 2019-01-22 English for Specific Purposes ESP has accumulated substantial tradition in practice research and theory It is a common approach in English Language Teaching ELT among adults today starting with high schools then in academia pre and in service training and life long learning programs The role of ESP in each of these is to facilitate work in today's inevitably international business and scientific environment It provides language training based on the precise simulation of communicative situations found in the surroundings for which learners are preparing including for example domain specific vocabulary syntactic and morphological structures text and speech content structuring stylistics intercultural competence At present when English is present either as a foreign or second language learning General English GE is to a large degree accomplished before learners start needing English for their jobs In this way ESP does not complete GE but builds upon the foundations laid by it in learners prior education ESP is a channel of communication for the contemporary academia and economics However even so these are still early days for ESP as it does not yet have a recognised place within academia Only very recently have we begun to witness the occasional but encouraging emergence of ESP academic courses and departments This book thus explores practice and research conducted and under way in this field of ELT in order to assist its recognition as an autonomous academic discipline

Handbook of Business Communication Gerlinde Mautner, Franz Rainer, 2017-07-24 In spite of the day to day relevance of business communication it remains underrepresented in standard handbooks and textbooks on applied linguistics The present volume introduces readers to a wide variety of linguistic studies of business communication ranging from traditional LSP approaches to contemporary discourse based work and from the micro level of lexical choice to macro level questions of language policy and culture

New to the LSP classroom? A selection of monographs on successful practices Martina Vránová, 2023-05-23

As Languages for Specific Purposes have always been defined as student oriented the rationale behind this volume is to use the rather neglected niche of the other necessary agent of language instruction and thus focus on the LSP practitioner This turn towards the instructor has been motivated by the fact that a great number of LSP practitioners enter their jobs without previous expertise They lack LSP education or they may not even have a background in applied linguistics This motivation has proven valid as many of the volume s contributors have faced this particular situation in their professional lives For insights into the LSP field and guidelines on the best practices they must rely on their colleagues who offer to share their experience through workshops conferences or papers which is what this volume provides The primary goal of this volume is to present considerations of what challenges LSP practitioners face and should be prepared for in their jobs and to provide practice tested methodological guidelines on such demanding teaching techniques as blended and flipped learning or tandem learning All papers have been written by LSP practitioners and researchers in higher education Thus this volume provides both guidance and self reflection In other words it is written by experienced LSP practitioners for aspiring LSP practitioners about how they see themselves and what effort they make to meet the challenges of their jobs As proof that LSP practice is a global challenge papers have been collected from many European countries the USA Uruguay Even though most papers are naturally concerned with English being the lingua franca of today the collection also features guidelines for teaching Spanish French and Dutch for specific purposes Moreover the target disciplines these languages are taught for encompass business engineering sociology or medicine thus supporting the assumption of the universal character of problems LSP practitioners deal with
