The Oxford Handbook of Lexicography Philip Durkin, 2015-11-26 This volume provides concise authoritative accounts of the approaches and methodologies of modern lexicography and of the aims and qualities of its end products. Leading scholars and professional lexicographers from all over the world represent all the main traditions and perspectives, assess the state of the art in every aspect of research and practice. The book is divided into four parts reflecting the main types of lexicography. Part I looks at synchronic dictionaries: those for the general public, monolingual dictionaries for second language learners and bilingual dictionaries. Part II and III are devoted to the distinctive methodologies and concerns of historical dictionaries and specialist dictionaries respectively, while chapters in Part IV examine specific topics such as description and prescription, the representation of pronunciation and the practicalities of dictionary production. The book ends with a chronology of major events in the history of lexicography. It will be a valuable resource for students, scholars and practitioners in the field.

Using Online Dictionaries Carolin Müller-Spitzer, 2014-08-22 Until now there has been very little research into the use of online dictionaries. In contrast, the market for online dictionaries is increasing both for academic lexicography and for commercial lexicography, with sales figures for printed reference works in continual decline. This has led to a demand for reliable empirical information on how online dictionaries are actually being used and how they could be made more user friendly. The volume *Using Online Dictionaries* makes a substantial contribution to closing this research gap. It is divided into four parts. The first part contains articles on fundamental issues: a research review of the empirical studies on digital dictionaries which have already been carried out and a brief methodological guideline for lexicographical researchers who are interested in conducting their own empirical research. The second part contains the results of two studies that focus on general questions about the use of online dictionaries. It presents empirical data on contexts of dictionary use, on expectations and demands regarding online dictionaries. Furthermore, innovative features such as the use of multimedia elements or the option of a user adaptive interface and questions of design were assessed empirically. The third part of this volume comprises more specific studies of online dictionaries: an eye tracking study evaluating the new web design of the dictionary portal OWID and a log file study which tries to get to the bottom of the following question: Do dictionary users look up frequent words or put differently, is there a connection between how often a word is looked up and how often it appears in a corpus? In the last chapter of this thematic section, the question of how users judge the combination of a written paraphrase and an additional illustration in illustrated online dictionaries is addressed. The last part focuses on the use of monolingual dictionaries, in particular the German online dictionary *lexiko*. In this context, two online questionnaire based studies were carried out. The empirical studies were conducted in the form of online surveys combining questionnaires and experimental elements and in the form of laboratory studies using eye tracking technology as well as using observational methods such as log file analyses. Regarding the comprehensive research framework, this volume can be

relevant to lexicographers metalexicographers and linguists who are interested in the use of online dictionaries and in the development and exploration of lexicographical data for the internet as well as linguists interested in empirical methods It addresses a broad expert audience by presenting an academic subject which is currently the focus of much discussion
