esquema director de la presente obra surge de la estancia de investigación realizada en el Centre for Socio Legal Studies de la Universidad de Oxford Reino Unido en 2012 Development of Plant-Based Medicines: Conservation, Efficacy and Safety Praveen K. Saxena,2013-03-14 The plant is often the most neglected part of plant based medicine Throughout time humans have searched collected and effectively used plants for healing Currently the medicinal plant based business is flourishing at a dramatic pace and at the expense of an already declining population of plant species many of which are on the verge of extinction In spite of this history and popularity the mystery of what transforms a plant into a medicinal plant persists and there are chronic problems with ensuring the safety and efficacy of medicinal plant products Therefore there is a real need for a full characterization of medicinal plant species and for the development and application of novel technologies for the production of plant based medicines This book highlights some of the recent advances and new approaches to the development of technologies for plant based medicines and is intended to stimulate new discussions among researchers regulatory authorities and pharmaceutical organizations leading to significant advancements in the field

Phytochemistry of Medicinal Plants John T. Arnason,Rachel Mata,John T. Romeo,2013-11-11 Phytochemicals from medicinal plants are receiving ever greater attention in the scientific literature in medicine and in the world economy in general For example the global value of plant derived pharmaceuticals will reach 500 billion in the year 2000 in the OECD countries In the developing countries over the counter remedies and ethical phytomedicines which are standardized toxicologically and clinically defined crude drugs are seen as a promising low cost alternatives in primary health care The field also has benefited greatly in recent years from the interaction of the study of traditional ethnobotanical knowledge and the application of modern phytochemical analysis and biological activity studies to medicinal plants The papers on this topic assembled in the present volume were presented at the annual meeting of the Phytochemical Society of North America held in Mexico City August 15 19 1994 This meeting location was chosen at the time of entry of Mexico into the North American Free Trade Agreement as another way to celebrate the closer ties between Mexico the United States and Canada The meeting site was the historic Calinda Geneve Hotel in Mexico City a most appropriate site to host a group of phytochemists since it was the address of Russel Marker Marker lived at the hotel and his famous papers on steroidal saponins from *Dioscorea composita* which launched the birth control pill bear the address of the hotel **Nuevo diccionario de las plantas medicinales estudiadas bajo el punto de vista botánico, médico y farmacéutico** A. Héraud,1876 **Estudio de los principios activos de las plantas medicinales** Emilio Perez Noguera,1902
