Egerton, 2018-10-06 The conclusion of this professor historian emeritus is that our gun culture had its uses in establishing American civilization as slavery did But we came to recognize after a bloody civil war that slavery was a gigantic mistake and now I think it s time to realize that our gun culture was a similarly gigantic mistake though of a different kind And we need to do what we can to minimize its horrible impacts and move on to a more positive development of a humane civilization **The Ecology of Finnegans Wake** Alison Lacivita, 2021-11-09 In this book one of the first ecocritical explorations of Irish literature Alison Lacivita defies the popular view of James Joyce as a thoroughly urban writer by bringing to light his consistent engagement with nature Using genetic criticism to investigate Joyce s source texts notebooks and proofs Lacivita shows how Joyce developed ecological themes in *Finnegans Wake* over successive drafts Making apparent a love of growing things and a lively connection with the natural world across his texts Lacivita s approach reveals Joyce s keen attention to the Irish landscape meteorology urban planning Dublin s ecology the exploitation of nature and fertility and reproduction Alison Lacivita unearths a vital quality of Joyce s work that has largely gone undetected

Fishy Business Rik Scarce, 2000 Leaping waterfalls struggling through rocky shallows only the strongest salmon survive to spawn a new generation These remarkable fish seem to be pure nature unfathomable all instinct But are they For more than a century biologists have tried to unlock the mystery of salmon we know For sociologist Rik Scarce salmon represent an opportunity to probe the relationship of science society and nature About Pacific salmon a game fish and food source that is protected and managed for economic and environmental abundance Scarce writes What other living thing receives such extensive attention from science and society is used in so many ways yet retains so much of what we would like to think is its wild character He shows how political bureaucratic and economic forces have directed salmon science for their own purposes and how control remains a central feature in salmon biology Identifying a countertrend rooted in environmental activism Scarce also argues that an ecocentric perspective is gaining ground even as pressures mount simultaneously to save endangered salmon populations and to bring every last salmon to market Thus while external forces control much of the biologists work a movement is underway to free biology from political and economic pressures In rich ethnographic detail

Scarce develops this portrait of a science struggling with nature and itself The old line fisheries biologists tell how they work under immense pressure to unravel the unknowns of salmon existence to fulfill objectives of politically motivated funding agencies In contrast the new breed of conservation biology researchers struggles to maintain the genetic diversity of salmon populations while minimizing the ways humans determine the fate of the salmon Fishy Business provides new ways for regarding about human interactions with other species from appealing ones like wolves whales and redwood trees to less popular ones like snail darters and kangaroo rats Society struggles to decide what parts of nature matter and why Ultimately Scarce argues nature is a social product what shall we make of it Restoration and History Marcus Hall, 2010-02 Papers from a meeting of an interdisciplinary group of ecologists geographers anthropologists sociologists historians and philosophers held July 2006 in Zurich Switzerland

On God and Dogs Stephen H. Webb, 1998 Many of us keep pet animals we rely on them for companionship and unconditional love For some people their closest relationships may be with their pets In the wake of the animal rights movement some ethicists have started to re-examine this relationship and to question the rights of humans to own other sentient beings in this way In this engaging and thought provoking book Stephen Webb brings a Christian perspective to bear on the subject of our responsibility to animals looked at through the lens of our relations with pets especially dogs Webb argues that the emotional bond with companion animals should play a central role in the way we think about animals in general and against the more extreme animal liberationists defends the intermingling of the human and animal worlds He tries to imagine what it would be like to treat animals as a gift from God and indeed argues that not only are animals a gift for us but they give to us we need to attend to their giving and return their gifts appropriately Throughout the book he insists that what Christians call grace is present in our relations with animals just as it is with other humans Grace is the inclusive and expansive power of God's love to create and sustain relationships of real mutuality and reciprocity and Webb unfolds the implications of the recognition that animals too participate in God's abundant grace Webb's thesis affirms and persuasively defends many of the things that pet lovers feel instinctively that their relationships with their companion animals are meaningful and important and that their pets have value and worth in themselves in the eyes of God His book will appeal to a broad audience of thoughtful Christians and animal lovers

How Canadians Communicate VI Charlene Elliott, 2016-03-31 Food nourishes the body but our relationship with food extends far beyond our need for survival Food choices not only express our personal tastes but also communicate a range of beliefs values affiliations and aspirations sometimes to the exclusion of others In the media sphere the enormous amount of food related advice provided by government agencies advocacy groups diet books and so on compete with efforts on the part of the food industry to sell their product and to respond to a consumer driven desire for convenience As a result the topic of food has grown fraught engendering sometimes acrimonious debates about what we should eat and why By examining topics such as the values embedded in food marketing the locavore movement food tourism dinner parties food bank donations the moral panic

surrounding obesity food crises and fears about food safety the contributors to this volume paint a rich and sometimes unsettling portrait of how food is represented regulated and consumed in Canada With chapters from leading scholars such as Ken Albala Harvey Levenstein Stephen Kline and Valerie Tarasuk the volume also includes contributions from food insiders bestselling cookbook author and food editor Elizabeth Baird and veteran restaurant reviewer John Gilchrist The result is a timely and thought provoking look at food as a system of communication through which Canadians articulate cultural identity personal values and social distinction Contributors include Ken Albala Elizabeth Baird Jacqueline Botterill Rebecca Carruthers Den Hoed Catherine Carstairs Nathalie Cooke Pierre Desrochers Josh Greenberg Stephen Kline Jordan Lebel Harvey Levenstein Wayne McCreedy Irina Mihalache Eric Pateman Rod Phillips Sheilagh Quaille Melanie Rock Paige Schell and Valerie Tarasuk
