Hispania And The Roman Mediterranean Ceramics And Trade:

Hispania and the Roman Mediterranean, AD 100-700 Paul Reynolds, 2010-01-28 Gathers together and reviews the evidence for trends in production of table wares and amphora borne goods across the Iberian Peninsula and Balearics from the second to the seventh century AD *The Cambridge Companion to the Roman Economy* Walter Scheidel, 2012-11-08 Thanks to its exceptional size and duration the Roman Empire offers one of the best opportunities to study economic development in the context of an agrarian world empire This volume which is organised thematically provides a sophisticated introduction to and assessment of all aspects of its economic life **Ceramics and Atlantic Connections: Late Roman and Early Medieval Imported Pottery on the Atlantic Seaboard** Maria Duggan, Mark Jackson, Sam Turner, 2020-03-26 Papers focus on the pottery of Mediterranean origin imported into the Atlantic as well as ceramics of Atlantic production which had widespread distribution They examine chronologies and relative distributions and consider the composition of key Atlantic assemblages revealing new insights into the networks of exchange between c 400 700 AD Hispania in Late Antiquity Kim Bowes, Michael Kulikowski, 2005-07-01 Hispania in Late Antiquity Current Approaches makes recent work on late antique Hispania available to a non specialist audience outside the Iberian peninsula The central theme of the volume is the integration of Hispania into the larger world of the later Roman empire The contributors archaeologists historians and historians of art treat both the historical evidence and the historiographical context that has conditioned interpretation of that evidence Topics covered include Christianization urbanism villas and land tenure trade and military topography Taken together the essays in this volume present a coherent and up to date picture of how Spain's late antique culture came into being and how it was transformed in the course of the late antique centuries Contributors Javier Arce Kim Bowes Pedro Castillo Maldonado Alexandra Chavarr a Pablo C D az M Victoria Escribano Pa o Carmen Fern ndez Ochoa Michael Kulikowski Fernando L pez S nchez Neil McLynn Lu s R Men ndez Bueyes ngel Morillo Cerd n Paul Reynolds A Study of the Circulation of Ceramics in Cyprus from the 3rd Century BC to the 3rd Century AD John Lund, 2015-10-26 This is the first monograph devoted solely to the ceramics of Cyprus in the Hellenistic and Roman Periods The island was by then no longer divided into kingdoms but unified politically first under Ptolemaic Egypt and later as a province in the Roman Empire Submission to foreign rule was previously thought to have diluted if not obliterated the time honoured distinctive Cypriot character The ceramic evidence suggests otherwise The distribution of local and imported pottery in Cyprus points to the existence of several regional exchange networks a division that also seems reflected by other evidence The similarities in material culture exchange patterns and preferential practices are suggestive of a certain level of regional collective self awareness From the 1st century BC onwards Cyprus became increasingly engulfed by mass produced and standardized ceramic fine wares which seem ultimately to have put many of the indigenous makers of similar products out of business or forced them to modify their output Also the ceramic record gradually became less diverse during the Roman Period than

before developments which we today might be inclined to view as symptoms of an early form of globalisation **Egypt and the Eastern Mediterranean World** Jelle Bruning, Janneke H. M. de Jong, Petra M. Sijpesteijn, 2022-12-15 Maps Egypt's political economic and cultural connections throughout the Mediterranean and beyond between 500 and 1000 CE

Simulating Roman Economies Tom Brughmans, Andrew Wilson, 2022-08-11 The use of formal modelling and computational simulation in studies of the Roman economy has become more common over the last decade But detailed critical evaluations of this innovative approach are still missing and much needed What kinds of insights about the Roman economy can it lead to that could not have been obtained through more established approaches and how do simulation methods constructively enhance research processes in Roman Studies This edited volume addresses this need through critical discussion and convincing examples It presents the Roman economy as a highly complex system traditionally studied through critical examinations of material and textual sources and understood through a wealth of diverging theories A key contribution of simulation lies in its ability to formally represent diverse theories of Roman economic phenomena and test them against empirical evidence Critical simulation studies rely on collaboration across Roman data theory and method specialisms and can constructively enhance multivocality of theoretical debates of the Roman economy This potential is illustrated avoiding computational and mathematical language through simulation studies of a wealth of Roman economic phenomena from maritime trade and terrestrial transport infrastructures through the economic impacts of the Antonine Plague and demography to local cult economies and grain trade Through these examples and discussions this volume aims to provide the common ground guidance and inspiration needed to make simulation methods part of the tools of the trade in Roman Studies and to allow them to make constructive contributions to our understanding of the Roman economy Local Societies and Peasantry Agencies in Medieval Iberia Juan Antonio Quirós Castillo, 2025-01-26 Despite the significant attention medieval scholarship has devoted to the study of peasant societies these groups have traditionally been depicted as passive and homogeneous merely able of resisting pressures from the state or powerful individuals However in recent years the availability of new records the widespread adoption of microhistorical analyses and the renewal of conceptual frameworks have enabled scholars to undertake more detailed and nuanced investigations This collective volume aims to explore the political economic and social practices of Iberian medieval peasant societies A key finding of this multivocal analysis is the revelation of the relative subalternity of medieval ruling groups and the constraints on peasant actions across various geographical and chronological contexts **Minting, State, and Economy in the Visigothic Kingdom** Andrew Kurt, 2025-10-01 This study of the Visigothic kingdom's monetary system in southern Gaul and Hispania from the fifth century through the Muslim invasion of Spain fills a major gap in the scholarship of late antiquity Examining all aspects of the making of currency it sets minting in relation to questions of state monarchical power administration and apparatus motives for money production and economy In the context of the later Roman Empire and its successor states in the West the minting

and currency of the Visigoths reveal shared patterns as well as originality The analysis brings both economic life and the needs of the state into sharper focus with significant implications for the study of an essential element in daily life and government This study combines an appreciation for the surprising level of sophistication in the Visigothic minting system with an accessible approach to a subject which can seem complex and abstruse Narbonne and its Territory in Late Antiquity Frank Riess, 2016-04-22 This work centres on the post Roman period of Narbonne and its territory up to its capture by the Arabs in 720 encompassing not only recent archaeological findings but also perspectives of French Spanish and Catalan historiography that have fashioned distinct national narratives Seeking to remove Narbonne from any subsequent birth of France Catalonia and Spain the book presents a geopolitical region that took shape from the late fifth century evolving towards the end of the eighth century into an autonomous province of the nascent Carolingian Empire Capturing this change throughout a 300 year period somewhat lacking in written sources the book takes us beyond an exclusive depiction of the classical city to an examination of settlement in various forms Discourses of literary criticism also lie behind aspects of this study mapped around textual commentaries which highlight a more imaginative biography of a city Narbonne's role as a point of departure and travel across the Mediterranean is examined through a reading of the correspondence of Paulinus of Nola and the writings of Sulpicius Severus enabling the reader to gain a fuller picture of the city and its port The topography of Narbonne in the fifth century is surveyed together with Bishop Rusticus's church building programme Later chapters emphasise the difficulties in presenting a detached image of Narbonne as sources become mainly Visigothic defining the city and its region as part of a centralised kingdom Particular attention is given to the election of Liuva I as king in Narbonne in 568 and to the later division into upper and lower sub kingdoms shared by Liuva and his brother Leovigild a duality that persisted throughout the sixth and seventh centuries The study therefore casts new light on Narbonne and its place within the Visigothic Kingdom of Toledo suggesting that it was the capital of a territory with roots in the post Roman settlement of barbarian successor states

Life in ancient Rome Stanford Mc Krause, The city of Rome was the largest megalopolis of the time with a population that may well have exceeded one million people with a high level estimate of 3.6 million A substantial proportion of the population lived in countless urban centers with a population of at least 10 000 and in several military settlements a very high rate of urbanization according to pre industrial standards Most of the housing blocks were crowded and dangerous residents lived in constant fear of fire

Slavery and economy in ancient Rome Stanford Mc Krause, Ancient Rome was an agrarian and slave economy whose main concern was to feed the large number of citizens and legionaries who populated the Mediterranean region Slaves were considered property under Roman law and had no legal personality They could be subjected to corporal punishment sexual exploitation prostitutes were often slaves torture and summary execution Over time however slaves obtained greater legal protection including the right to file complaints against their masters

Politics and military life of Imperial Rome Stanford Mc Krause, The army of Rome was always closely linked

to its political system a person's social position affected his political and military roles Originally Rome was bound by its power and glory to a magnificent military system in terms of perfection and efficiency far superior to anything that any potential adversary could oppose

Islamic Glass in the Making Nadine Schibille, 2022-03-31 New insights into the history of Islamic glassmaking The ancient glass industry changed dramatically towards the end of the first millennium The Roman glassmaking tradition of mineral soda glass was increasingly supplanted by the use of plant ash as the main fluxing agent at the turn of the ninth century CE Defining primary production groups of plant ash glass has been a challenge due to the high variability of raw materials and the smaller scale of production *Islamic Glass in the Making* advocates a large scale archaeometric approach to the history of Islamic glassmaking to trace the developments in the production trade and consumption of vitreous materials between the eighth and twelfth centuries and to separate the norm from the exception It proposes compositional discriminants to distinguish regional production groups and provides insights into the organisation of the glass industry and commerce during the early Islamic period The interdisciplinary approach leads to a holistic understanding of the development of Islamic glass assemblages from the early Islamic period in Mesopotamia Central Asia Egypt Greater Syria and Iberia are evaluated and placed in the larger geopolitical context In doing so this book fills a gap in the present literature and advances a large scale approach to the history of Islamic glass

A Companion to Late Antique and Medieval Islamic Cordoba, 2023-03-06 *A Companion to Late Antique and Medieval Islamic Cordoba* cover the history and culture of Roman late antique Visigoth and al Andalus Cordoba in nineteen contributions from the foundation of the city in the 169 168 B C by the praetor Marcus Claudius Marcellus to the end of the Muslim period in 1236 B C when the city fell into the hands of Ferdinand III the Saint King of Castile Making use of archaeological data and historical sources combined with the latest research on the various fields under study its authors give a compelling account of Cordoba's most important archaeological urban political legal social cultural and religious facets throughout the most exciting fifteen centuries of the city

Art in Spain and Portugal from the Romans to the Early Middle Ages Rose Walker, 2025-10-01 For generations maps of the pilgrimage roads and of the reconquista have bedevilled the study of Spanish art and architecture They have also infiltrated the popular imagination and come to dominate the ways we think about Spain and Portugal *Art in Spain and Portugal from the Romans to the Early Middle Ages Routes and Myths* sets out to diminish the power of these images and to enrich the wider English language literature on early medieval art Starting with the Romans and working through the vertical layers to the early Romanesque period Rose Walker draws together scholarly work hitherto confined within disciplinary boundaries specialist regional studies and findings familiar only to Spanish speaking audiences The author builds on these studies and her own research to present narratives that question art historical and archaeological orthodoxies New perspectives emerge from the routes along which wealth and artistic expertise crossed the peninsula showing the endurance of the north south axis and the strength of networks and pragmatic alliances that often operated without regard for religious

difference *Through the Eye of a Needle* Peter Brown, 2013-09-02 A sweeping intellectual history of the role of wealth in the church in the last days of the Roman Empire Jesus taught his followers that it is easier for a camel to go through the eye of a needle than for a rich man to enter heaven Yet by the fall of Rome the church was becoming rich beyond measure *Through the Eye of a Needle* is a sweeping intellectual and social history of the vexing problem of wealth in Christianity in the waning days of the Roman Empire written by the world's foremost scholar of late antiquity Peter Brown examines the rise of the church through the lens of money and the challenges it posed to an institution that espoused the virtue of poverty and called avarice the root of all evil Drawing on the writings of major Christian thinkers such as Augustine Ambrose and Jerome Brown examines the controversies and changing attitudes toward money caused by the influx of new wealth into church coffers and describes the spectacular acts of divestment by rich donors and their growing influence in an empire beset with crisis He shows how the use of wealth for the care of the poor competed with older forms of philanthropy deeply rooted in the Roman world and sheds light on the ordinary people who gave away their money in hopes of treasure in heaven *Through the Eye of a Needle* challenges the widely held notion that Christianity's growing wealth sapped Rome of its ability to resist the barbarian invasions and offers a fresh perspective on the social history of the church in late antiquity *The ^AOxford Handbook of the Merovingian World* Bonnie Effros, Isabel Moreira, 2020-05-01 In recent decades the Merovingian world has become more visible in Anglophone historical studies The forty six essays included in this collection highlight the vitality and importance of the Merovingian kingdoms in the fifth through eighth centuries *Bishops, Community and Authority in Late Roman Society* Rebecca Devlin, 2025-10-01 When the bishop Hydatius found himself held hostage in Gallaecia a Roman province in the northwestern Iberian Peninsula by a band of Sueves in the year 460 he deployed his experience as an ambassador for his congregation and used his captivity as a tool for negotiating peace As this example shows bishops held considerable economic political and social power in the early Middle Ages The expansion of ecclesiastical influence was not however a simple consequence of the legalization of Christianity or a power vacuum that followed the withdrawal of imperial authority The transformation of the episcopate resulted instead from dynamic processes to which all status groups contributed and that are best understood through contextual and diachronic analysis This monograph focuses on the clerical community in Gallaecia and employs a case study and interdisciplinary approach incorporating written and material evidence to put bishops like Hydatius in their larger social and economic contexts to elucidate why the people living and working in their sees would imbue them with increasing authority and explain how their roles within their local communities expanded This book Analyses the accumulation of political power social capital and local influence by bishops approaching them as part of a larger social system understood as a whole that experienced transformative change across all of its layers Deploys all evidence written material etc without privileging one form over the other a priori to produce a deep reconstruction of the social and physical contexts micro historical landscapes in which bishops operated to explain their rise to prominence Turns

the problem of Iberian early medieval written sources on its head i.e. the NW and clerical authors are overrepresented by engaging in a series of diachronic case studies to develop a rich understanding of episcopal influence in the NW as a point of departure for understanding broader developments in the late and post Roman periods **Byzantine Butrint** Richard Hodges, William Bowden, Kosta Lako, 2020-02-28 The ancient walled town of Butrint sits at the crossroads of the Mediterranean In its heyday it could command sea routes up the Adriatic Sea to the north across the Mediterranean to the west and south through the Ionian islands It also controlled a land route into the mountainous Balkan interior For much of its long history it occupied a hill on a bend in the Vivari Channel which connects the Straits to the large inland lagoon of Lake Butrint Designated a UNESCO World Heritage site in 1992 Butrint covers an area of around 16 ha but geophysical survey has shown that at times it was almost twice this size The site itself is made up of two parts the acropolis and the lower city The acropolis is a long narrow hill whose sides are accentuated by a circuit of walls that separate it from the natural and artificial terraces gathered around the flanks of the hill The lower city occupies the lower lying contours down to the edge of the Vivari Channel This book brings to life this extraordinary Byzantine town with chapters on the historical sources various aspects of the archaeological excavation and survey finds of pottery and environmental remains
