country previously unfamiliar to them Although urban co ethnic communities continue to be the destination of many newcomers immigrants from Mexico Central America and South America in pursuit of low skilled labor opportunities are settling in small towns and rural areas of the South and Midwest This new demographic trend has resulted in the creation of the term new growth communities which refers to small rural areas that are now home to a small but rapidly growing Hispanic population Unfortunately these communities which are now present in many states across the country e g Illinois North Carolina lack the infrastructure necessary to meet the needs of Latino immigrants e g access to health care immigration assistance and breaking down language barriers The lack of an infrastructure and the lack of an established ethnic community to facilitate the assimilation of new immigrants present an ongoing challenge especially in the area of Latino mental health The volume focuses on dealing with systemic issues and on providing innovative ideas for development of infrastructure of services This text will advance ways to understand and ameliorate mental health disparities both from research and experiential perspectives

**Figures of the Future** Michael Rodríguez-Muñiz, 2024-06-04 An in depth look at how U S Latino advocacy groups are using ethnoracial demographic projections to bring about political change in the present For years newspaper headlines partisan speeches academic research and even comedy routines have communicated that the United States is undergoing a profound demographic transformation one that will purportedly change the face of the country in a matter of decades But the so called browning of

American sociologist Michael Rodriguez contends that has less to do with the complexion of growing populations than with past and present struggles shaping how demographic trends are popularly imagined and experienced. Offering an original and timely window into these struggles, *Figures of the Future* explores the population politics of national Latino civil rights groups. Based on eight years of ethnographic and qualitative research spanning both the Obama and Trump administrations, this book investigates how several of the most prominent of these organizations, including UnidosUS, formerly NCLR, the League of United Latin American Citizens, and Voto Latino, have mobilized demographic data about the Latino population in dogged pursuit of political recognition and influence. In census promotions, get-out-the-vote campaigns, and policy advocacy, this knowledge has been infused with meaning, variously serving as future-oriented sources of inspiration, emblems for identification, and weapons for contestation. At the same time, Rodriguez considers why these political actors have struggled to translate this demographic growth into tangible political gain and how concerns about white backlash have affected how they forecast demographic futures. *Figures of the Future* looks closely at the politics surrounding ethnoracial demographic changes and their rising influence in U.S. public debate and discourse.

**Challenges of Latino Aging in the Americas** William A. Vega, Kyriakos S. Markides, Jacqueline L. Angel, Fernando M. Torres-Gil, 2015-03-18 This book examines one of the most important demographic changes facing the United States: an overall aging population and the increasing influence of Latinos. It also looks at the changing demographics in Mexico and its impact on the health and financial well-being of aging Mexicans and Mexican Americans. The book provides a conceptual and accessible framework that will educate and inform readers about the interconnectedness of the demographic trends facing these two countries. It also explores the ultimate personal, social, and political impact they will have on all Americans in the U.S. as well as Mexico. *Challenges of Latino Aging in the Americas* features papers presented at the 2013 International Conference on Aging in the Americas held at the University of Texas at Austin, September 2013. It brings together the work of many leading scholars from the fields of sociology, demography, psychology, anthropology, geography, social work, geriatric medicine, epidemiology, and public affairs. Coverage in this edited collection includes working with diverse populations, culturally compatible interventions for diverse elderly, the health, mental health, and social needs and concerns of aging Latinos, and the policy, political, and bilateral implications of aging and diversity in the U.S. and Mexico. The book provides a rich blend of empirical evidence with insightful, cutting-edge analysis that will serve as an insightful resource for researchers and policy makers, professors, and graduate students in a wide range of fields from sociology and demography to economics and political science.
