Hoffman,1961-12-15 This study was prepared in an attempt to clarify seemingly contradictory interpretations of the early history of the discovery of North America as well as to survey the early historical sources which may contribute to an ethno historical study of the Indians of those coasts first explored A major part of the book is devoted to a re analysis of the cartographical materials and to an attempt to present a more logical interpretation of this material In the course of this attempt the work discusses and rejects previously widely held viewpoints concerning the early exploration of North America and the development of North American cartography A new hypothesis is presented in this respect and is shown to fit the available evidence more adequately The study also reconsiders the documentary materials deriving from the Cartier voyages and develops new conclusions concerning their origin particularly with respect to the so called Cartier vocabularies This is a pioneer summary and original analysis based upon exhaustive research and is the most comprehensive collation available to scholars in combination with the recent map bibliography published by the Public Archives it will be of great aid to research students Dr Hoffman s hypotheses are brilliantly presented and highly stimulating The line cut illustrations and listing of nomenclature are most valuable **Romans in a New World** David A. Spanish identity in the age of nations José Álvarez-Junco, 2013-07-19 Spanish identity in the age of nations offers the first comprehensive account in any language of the formation and development of Spanish national identity from ancient times to the present Much has been written on French British and German nationalism but remarkably little has been published on Spanish nationalism Paradoxically even in Spain there is much more on Basque Catalan and other regional nationalisms than on Spanish identity As a result this study fills an enormous gap in the literature on Spanish history This book traces the emergence and evolution of an initial collective identity within the Iberian Peninsula from the Middle Ages to the end of the ancien regime based on the Catholic religion loyalty to the Crown and Empire The adaptation of this identity to the modern era beginning with the Napoleonic Wars and the liberal revolutions forms the crux of this study None the less the book also embraces the highly contested evolution of the national identity in the twentieth century including both the Civil War and the Franco Dictatorship lvarez Junco's pioneering study was awarded both the National Prize for Literature in Spain and the Fastenrath Prize by the Spanish Royal Academy

The Indies of the Setting Sun Ricardo Padrón, 2020-07-29 Padrón reveals the evolution of Spain's imagining of the New World as a space in continuity with Asia Narratives of Europe's westward expansion often tell of how the Americas came to be known as a distinct landmass separate from Asia and uniquely positioned as new ground ripe for transatlantic colonialism But this geographic vision of the Americas was not shared by all Europeans While some imperialists imagined North and Central America as undiscovered land the Spanish pushed to define the New World as part of a larger and eminently flexible geography that they called las Indias and that by right belonged to the Crown of Castile and León Las Indias included all of the New World as well as East and Southeast Asia although Spain's understanding of the relationship between the two areas changed as the realities of the Pacific Rim came into sharper focus At first the Spanish insisted that North and Central America were an extension of the continent of Asia Eventually they came to understand East and Southeast Asia as a transpacific extension of their empire in America called las Indias del poniente or the Indies of the Setting Sun The Indies of the Setting Sun charts the Spanish vision of a transpacific imperial expanse beginning with Balboa's discovery of the South Sea and ending almost a hundred years later with Spain's final push for control of the Pacific Padrón traces a series of attempts both cartographic and discursive to map the space from Mexico to Malacca revealing the geopolitical imaginations at play in the quest for control of the New World and Asia
