From Sea Charts to Satellite Images David Buisseret, 1990-06-22 The authors write authoritatively and crisply How to use maps in teaching is spelled out carefully but the authors also manage to sketch in the background of American mapping so the book is both a manual and a history Commentaries are sprinkled with stimulating new ideas for instance on how to use bird s eye views and country atlases in the classroom and there are didactic discussions on maps showing the walking city and the impact of the street car An extraordinarily wide range of maps is depicted which makes for good browsing pondering and close study This is a very good highly attractive and worthwhile book it will have great impact on the use of old and new maps in teaching As well this is a tantalizing survey of mapping the United States and will whet the appetites of students and encourage them to learn more about maps and their origins John Warketin Cartographica
