History In The Arab Skies:

History in the Arab Skies Gerald Butt, 2011-07-07 History in the Arab Skies reveals the close relationship between the Middle East and flying from the earliest days of flight and analyses the decisive impact it had on the political complexion of the region from publisher description [Air Power and the Arab World 1909-1955](#) Dr David Nicolle, Gabr Ali Gabr, 2023-08-24 Volume 9 of the Air Power and the Arab World 1909 1955 mini series continues the story of the men and machines of the first half century of military aviation in the Arab World For those Arab nations which had some degree of independence the political cultural and economic strains seen during the Second World War continued to have a major impact not least upon their military forces In Egypt newly independent Syria and Lebanon and to a lesser extent in Iraq great effort was put into modernizing these forces Sometimes this achieved success but such efforts nevertheless failed to produce the degree of improvement which had been hoped In both Egypt and Iraq mistrust of Great Britain may even have deepened while in Palestine the worsening crisis resulted in a full blown civil war between the Zionist settler community and the indigenous Arab population The British remained in theoretical control of Palestine yet it was becoming obvious that a large part of the British government British military establishment and broader public were desperate to escape from the Palestine Problem It was also clear that the major Powers which dominated the newly established United Nations Organization had no intention of becoming militarily involved Then came the official termination of the British mandate over Palestine the declaration of the State of Israel and the start of official military intervention by the military forces of several Arab states Volume 9 covers its subject in greater detail than has been done before because the authors had access to previously unpublished official Arab military documents supplemented by translations of Arabic books and journal articles containing official and personal accounts by those involved As usual for this mini series Volume 9 is abundantly illustrated with photographs from previously unused or very rarely used private and official sources [Palestine in the Air](#) Chin-chin Yap, 2025-01-23 As the first cultural history of Palestinian aviation Palestine in the Air reveals civil aviation s role in the question of Palestine over the past century How do Palestinians as individuals communities and as a nascent state engage with the air How does their systemic exclusion from aerial agency inform dominant and counter narratives of culture and modernity International civil aviation is a powerful tool for the disenfranchisement of Palestinian statehood connectivity and mobility Yet Palestinians have constantly sought to harness aviation as a legitimate component of modern state building They have also creatively appropriated aviation technologies including balloons kites and drones as instruments of resistance exploiting flight s symbolic qualities of escape and liberation to highlight the injustices of occupation Using an interdisciplinary approach that draws on media studies cultural studies critical theory diplomacy and history Palestine in the Air examines civil aviation s political social and cultural impact upon the Palestinian quest for sovereignty The book makes use of an unprecedented range of aviation related sources spanning unpublished memoirs print and image archives

interviews art film literature poetry and stand up comedy **The Fated Sky** Benson Bobrick, 2006-11-14 The Fated Sky looks at famous figures and important historical events that were influenced by astrology **Governing from the Skies** Thomas Hippler, 2017-01-17 The history of the war from the past one hundred years is a history of bombing Tripoli 1 November 1911 I decided that today I would try to drop bombs from the aeroplane if I succeed I shall be happy to have been the first Italian Lieutenant Giulio Gavotti At its inception aerial bombardment was a weapon of empire deployed to subdue colonial populations Soon during the Second World War civilians in Europe and Japan came into the bomber's crosshairs and ever since non-combatant targets have been at the heart of military strategy It was a seismic shift in the relations of power as the state justified the mass murder of civilians individual combatants flying high above their victims were distanced from the act of killing as never before The ascendancy of drones as an instrument of military power is the latest stage in this cruel evolution which has led to a perpetual low intensity war on the global scene As the technology enabling it spreads through the world the borders of the conflict will grow in proportion In this short and fascinating history of aerial warfare Thomas Hippler brings together all the major themes of the past century nationalism democracy totalitarianism colonialism globalization the welfare state and its decline and the rise of neoliberalism Air power is the defining characteristic of modern warfare as Hippler demonstrates it is also ingrained in the nature of modern politics *Aerial Aftermaths* Caren Kaplan, 2017-12-21 From the first vistas provided by flight in balloons in the eighteenth century to the most recent sensing operations performed by military drones the history of aerial imagery has marked the transformation of how people perceived their world better understood their past and imagined their future In *Aerial Aftermaths* Caren Kaplan traces this cultural history showing how aerial views operate as a form of world making tied to the times and places of war Kaplan's investigation of the aerial arts of war painting photography and digital imaging range from England's surveys of Scotland following the defeat of the 1746 Jacobite rebellion and early twentieth century photographic mapping of Iraq to images taken in the immediate aftermath of 9/11 Throughout Kaplan foregrounds aerial imagery's importance to modern visual culture and its ability to enforce colonial power demonstrating both the destructive force and the potential for political connection that come with viewing from above **A Bridge to the Sky** Claire D. Anderson, 2024 *A Caliphal Daedalus* examines connections between science and visual culture during the early Islamic scientific revolution of the caliphal age 650-1250 CE It takes as its point of departure the figure of Abbas Ibn Firnas d. 887 the most famous scientist and polymath of early Islamic Spain The book considers his scientific activities as these intersected with design and craft culminating in the aeronautics experiment for which he is best known today as these are recounted in the *Muqtabis* the chronicle compiled by the Cordoban court historian Ibn Hayyan d. 1076 It calls into question notions that medieval Islamic artisans and designers were anonymous individuals working outside elite social and intellectual circles The key passages from the chronicle are presented in English translation including the oldest and most authoritative source for the aeronautics experiment The Arabic texts are examined

in tandem with the earliest Islamic scientific instruments especially astrolabes and illustrated Arabic treatises of astronomy and engineering preserved in museums and libraries around the globe The book argues for a medieval Islamic court culture in which design and making were central to scientific intellectual pursuits and which may have shaped the culture of the Italian Renaissance

Sky Wars David Gates,2004-04-04 In *Sky Wars* David Gates examines the history of military aerospace power discussing technical developments between both World Wars and the use of air power in specific wars in the latter part of the 20th century including the recent conflict with Iraq

Angels in the Sky Robert Gandt,2017-10-03 Reads like a World War II thriller only better because every word is true One of the great untold stories of history Robert Gandt has brought it vividly unforgettably to life Steven Pressfield best selling author of *Gates of Fire* In 1948 when the newly founded nation of Israel came under siege from a coalition of Arab states a band of volunteer airmen from the United States Canada Britain France and South Africa arrived to help They were a small group fewer than 150 Many were World War II veterans most of them knowingly violated their nations embargoes on the shipment of arms and aircraft to Israel The airmen risked everything their careers citizenship and lives to fight for Israel The saga of the volunteer airmen in Israel s war of independence stands as one of the most stirring and little known war stories of the past century

British Imperialism and 'The Tribal Question' Robert S. G. Fletcher,2015-02-05 *British Imperialism and The Tribal Question* reconstructs the history of Britain s presence in the deserts of the interwar Middle East making the case for its significance to scholars of imperialism and of the region s past It tells the story of what happened when the British Empire and Bedouin communities met on the desert frontiers between the Mediterranean Sea and the Persian Gulf It traces the workings of the resulting practices of desert administration from their origins in the wake of one World War to their eclipse after the next as British officials Bedouin shaykhs and nationalist politicians jostled to influence desert affairs Drawn to the commanding heights of political society in the region s towns and cities historians have tended to afford frontier margins merely marginal treatment Instead this volume combines the study of imperialism nomads and the desert itself to reveal the centrality of desert administration to the working of Britain s empire repositioning neglected frontier areas as nerve centres of imperial activity

British Imperialism and The Tribal Question leads the shift in historians attentions from the familiar urban seats of power to the desert hinterlands that have long been obscured

The Worship of Nature: The worship of the earth, the sky, and the sun James George Frazer,1926 Between the Sea and the Sky P. T. Mathew SJ,2020-05-05 Between the Sea and the Sky is an inquiry into the religious world of a traditional fishing community on the Southwest coast of India It explores the vital role religious and spiritual beliefs play in sustaining people in such a precarious even deadly occupation Despite periodic natural calamities and the extreme challenges that accompany their everyday lives a remarkable spirit of resilience is evident in this

coastal community Using the concept of lived religion Mathew explores the theological religious and spiritual contours of this remarkable community and draws from them broader insights into the nature of belief *Hindi Is Our Ground, English Is Our Sky* Chaise LaDousa, 2014-01-01 A sea change has occurred in the Indian economy in the last three decades spurring the desire to learn English Most scholars and media venues have focused on English exclusively for its ties to processes of globalization and the rise of new employment opportunities The pursuit of class mobility however involves Hindi as much as English in the vast Hindi Belt of northern India Schools are institutions on which class mobility depends and they are divided by Hindi and English in the rubric of medium the primary language of pedagogy This book demonstrates that the school division allows for different visions of what it means to belong to the nation and what is central and peripheral in the nation It also shows how the language medium division reverberates unevenly and unequally through the nation and that schools illustrate the tensions brought on by economic liberalization and middle class status
