mining spawned including logging grazing water resource development market hunting urbanization and transportation the politics and emotions surrounding the establishment of Yosemite and other state and national parks the transformation of the Hetch Hetchy into a reservoir and the desertification of the once lush Owens Valley the roles of the Forest Service Park Service and other regulatory agencies the consequences of the fateful commitment to wildfire suppression in Sierran forests and the ever growing impact of tourism and recreational use Through Beesley's wide ranging discussion John Muir's divinely beautiful range is revealed in all its natural and economic complexity a place that at the beginning of the twenty first century is in grave danger of being loved to death Available in hardcover and paperback
