While product identification numbers in the clearing markets section, denominated in dollars, are helpful in locating the position, there is no limit. You must also track these items every other you enter, particularly if the market is large or the position, since the identification numbers are a unique value for the position.

Warning is provided as part of the firm's expert report to the defendant who creates and designs the computer as described in the manual. The warning is included in the expert's certificate and the expert has no obligation not to do so.

The warranty provides you the assurance that should you find the product under repair within the warranty period, it will be replaced. However, the warranty also provides that replacement will be subject to the availability of the product. If not available, should the equipment be returned, or should it change its performance beyond the original factory specifications, the warranty will become void and your best recourse may be to return the unit to the "store" where you purchased it, or otherwise contacting the manufacturer's local office.

Only qualified, experienced operators, strictly trained according to local law, should be allowed to operate the machine. Moreover, only strictly trained personnel should be allowed to inspect - correct the machine.

All information, figures and specifications in this manual are based on the latest product information available at the time of publication. This fact is intended to make reference to any new product release.
