God and Karate on the Southside Joseph E. Yi, 2009-06-16 Recent demographic changes have sparked debate about the civic health of American democracy Democracy requires people of different backgrounds to be disposed toward working together and it requires little noticed meeting places where neighbors interact with each other share their thinking and address common problems As issues of ethnic and social diversity become increasingly foregrounded social scientists find pervasive social distrust and civic withdrawal in racially and ethnically heterogeneous communities whether in big cities Los Angeles or small Yakima WA In this book Yi argues that increasing diversity can revitalize social and civic connectedness if our institutions rise up to the challenge of finding common ground and shared enterprise for people of different backgrounds He highlights two types of organizational actors in the USA One type renews and adapts longstanding religious cultural and civic traditions to a dynamic multiethnic society The second type attempts to introduce Americans to the many religious and cultural traditions from outside the United States These tendencies point to a dynamic many stranded model of liberal plural democracy which fosters and benefits from a variety of group affiliations and types of engagement Organizations that combine internal authoritative community with external plural outreach such as some evangelical mega churches and karate schools connect people across racial and

economic divides In these bridging organizations people find a sense of unity among diversity they get to know each other as individuals rather than as representatives of disliked groups Using fieldwork on churches karate schools and other organizations in a racially mixed Chicago Southside neighborhood as well as a broader analysis of race and religion in the 1972 1998 General Social Survey Yi combines classical democratic theory with compelling personal stories and rigorous empirical analysis God and Karate in the Southside is the first Global Civil Society 2011 H. Seckinelgin,Billy Wong,2016-01-12 Global Civil Society 2011 combines activist and academic accounts of contemporary struggles to promote negotiate and deliver justice in a global frame without a central authority In their engagement with cultural diversity and their networked communication the contributors rethink and remake justice beyond the confines of the nation state

World Yearbook of Education 2005 David Coulby,Evie Zambeta,2005-01-14 This volume deals with two major and apparently opposing forces within education and society globalization and nationalism Globalization is often considered in economic terms of continued growth of international trade and a concentration of wealth in corporate hands yet it also encompasses technological political and cultural change The World Yearbook of Education 2005 explores the role of the education sector in our globalized knowledge economy and considers the political implications of this in terms of monopolarity and the cultural consequences of homogenization and Americanization The other strand of this study nationalism remains a persistent force within education and society in all parts of the world and this volume examines the extent to which it can fuel conflict at all levels through prejudice and intolerance Concentrating on the epistemological consequences of nationalism leading international thinkers examine the extent to which it is reflected in the curricula of schools and universities around the world Finally the complex relationship between globalization and nationalism is explored and contributors explore the part that educational institutions and practices play in forming both agendas A wide range of perspectives are employed including post colonial discourse classical economics and sociological theory Nationalism and globalization are both ongoing processes and this volume makes a case for the central role of education in both through its potential to influence change and to act as benevolent force in shaping a global community **Catalog of Copyright**

Aiken MSPM,2024-05-17 When John Womble a young US Army Ranger arrived at his posting at Camp Wood in Kumamoto Japan in 1954 his perception of Japan and its people had

been molded by the post WWII racially charged portrayals of the Land of the Rising Sun in American media. However, he quickly realized that the way American media had portrayed them was not the truth, just like the stereotypical and racist depictions of Black Americans never mirrored reality. Interested in learning more about the country and its traditions, Womble often ventured outside the base and into the small city which housed a striking 400 year old castle that had been the battleground of the great feudal lords of ancient Japan. Drawn more and more into Japanese history and culture, he took the time to learn the language and code of ethics. One day he attended a boxing match where he witnessed a Samurai quickly knock out an American boxer. That's when his life changed forever. Determined to become a Samurai, he was selected to attend the prestigious School of Samurai where the training was rigorous. So rigorous in fact that most students quit. But not Womble. He trained hard, physically handled the mental and emotional toll that the discipline imposed upon him, and eventually succeeded in becoming a Samurai. After being discharged from the military, Womble went back home no longer as the naive teenager who left, but as the first African American Samurai. He committed his life to using his Samurai training to serve his community, helping inner city youth to strive despite all the difficulties they faced from poverty and gun violence to racism and lack of opportunities. This book, written by one of his students, is the ultimate testament to the long lasting legacy and impact he had on those lucky enough to call him sensei.
