Inside IMSA's Legendary GTP Race Cars J. A. Martin, Michael J. Fuller, Professional automobile racing has always been dominated by sanctioning bodies whose main goal was to ensure competition That has meant seeing that cars are well matched in body shape or chassis engine combinations or engine size But what about an all out competition in which one team's idea of the fastest race car could be pitted against another's regardless of mechanical parity This was what the International Motor Sports Association's IMSA Grand Touring Prototypes GTP race series was about The Series ran from 1981 to 1993 and it was one of the most exhilarating racing experiences of all time This book is the first to profile the amazing machines that resulted from the GTP's flat out competition among different and passionate ideas about what might be the fastest way around a track the V 12 with its better ground effect tunnels but higher center of gravity CG the flat six with its low CG but severely restricted ground effect tunnels and others that employed elaborate wings and air dams Here

are the people behind this engineering free for all the culmination of almost a century of automobile racing experience And here are eighteen of the most competitive vehicles they designed Using photography diagrams drawings and first person accounts from the men who built them Inside IMSA s Legendary GTP Race Cars offers a detailed look at the technology that drove some of the world s most exciting race cars the likes of which may never be seen again

Kar-Kraft Charlie Henry,2017-06-15 The story of Kar Kraft began as did many others in the automotive industry with an axe to grind In 1963 Ford was seriously interested in purchasing Ferrari Ferrari was a legendary brand with considerable success in racing and Ford saw the acquisition as a great way to be instantly successful in the racing arena When Enzo Ferrari realized that Ford would not give him complete control of the racing program he backed out of the deal late in the process Ford had spent millions in vetting and audits which then set in motion a vengeful response against Ferrari The result was the unthinkable

Ford beat Ferrari at Le Mans Ford wanted to become competitive quickly but it did not have the race history or resources in house To remedy the situation Ford searched the U K for an independent company to help accelerate its race car development It first settled on Lola Cars and set up Ford Advanced Vehicles Later Ford brought its LeMans effort to the U S and the Kar Kraft relationship was established Although Kar Kraft was technically an independent company it really only had one customer Ford Special Vehicles Kar Kraft s story doesn t begin and end with the GT 40 that took the win away from Ferrari at Le Mans Ford expanded upon the program and organized an all out assault on racing in general Cars were prepared for Trans Am NASCAR NHRA and Can Am competition Street versions of the Boss 429 were assembled under its roof And fabled prototypes including the LID Mustang Boss 302 Maverick and Mach 2C were all assembled in Ford s contracted race shop And then out of the blue its doors closed for good on a cold day in 1970 History tells us that Ford won Le Mans the Daytona 500 and the Trans Am championship But it doesn t tell us how this was accomplished Author Charlie Henry a former Kar Kraft employee has enlisted the help of many of his former co workers to bring you the very first book ever published on Ford s all encompassing special projects facility Kar Kraft p p1 margin 0 0px 0 0px 0 0px 0 0px font 12 0px Arial
