Crosby, 2000-08-14 Homo sapiens homo pugnans and so it has been since the beginning of recorded history In the Middle Ages especially armed conflict and the military life were so much a part of the political and cultural development that a general account of this period is in large measure a description of how men went to war *Birkenhead Park* Robert Lee, 2024-04-15 When it was officially opened on Easter Monday 5 April 1847 Birkenhead Park became the first municipally funded park in Britain It was a pioneer in the development of urban public parks designed for use by everyone irrespective of social class ethnicity or age In terms of town planning it demonstrated the importance of including green infrastructure in

urban development as a vital contribution to public health and well being Paxton s design for the park was heralded as a masterpiece of human creative genius it served as a vehicle for the global transmission of the English landscape school and led to the creation of numerous public parks everywhere most famously Central Park New York incorporating many of Paxton s design features This book addresses a long standing gap in the Park s historiography Regarded as one of the greatest wonders of the age the Park is an important contribution to nineteenth century landscape history with a local focus but of international significance The book also seeks to interpret the Park s development until 1914 within a political and cultural context drawing on economic and social history as a means of explaining why it was not until the late nineteenth century that it finally became a focal point for recreation and public health

Bannockburn 1314 Dr Chris Brown,2014-03-03 The

Battle of Bannockburn is the most celebrated battle in history between Scotland and England Fought over two days on 23 and 24 June 1314 by a small river crossing in Stirling it was a decisive victory for Robert the Bruce in the Scottish Wars of Independence against the English which saw a mere 7 000 Bruce followers defeat over 15 000 of Edward II s troops It was the greatest defeat the English would suffer throughout the Middle Ages and a huge personal humiliation for King Edward II Chris Brown s startling account recreates the campaign and battle from the perspectives of both the Scots and the English Only now through an in depth investigation of the contemporary narrative sources as well as the administrative records and through a new look at the terrain where the battle was fought can we come to firmer conclusions on what exactly happened and why

Ride of the Second Horseman Robert L. O'Connell,1997-10-23 In *Ride of the Second Horseman* Robert L O Connell probes the distant human past to show how and why war arose concluding that it is an invention an institution that formed due to very specific historical circumstances an institution that now verges on extinction He begins with a definition that distinguishes between war and mere feuding and draws on anthropology and archeology to locate the rise of war sometime after the human transition from nomadic hunting and gathering to agriculture when society split between farmers and pastoralists O Connell explores the histories of the civilizations of ancient Sumeria Egypt Assyria China and the New World showing how war came to each and how it adapted to varying circumstances Studying societies based on trade he finds that they employed war much more selectively and pragmatically Thus Minoan Crete long protected from marauding pastoralists developed a wealthy mercantile society marked by unmilitaristic attitudes equality between men and women and a relative absence of class distinctions In Assyria by contrast war came to be an end in itself in a culture dominated by male warriors Despite the violence in the world today O Connell finds reason for hope The industrial revolution broke the old patterns of subsistence war no longer serves the demographic purpose it once did Fascinating and provocative *Ride of the Second Horseman* offers a far reaching tour of human history that suggests the age old cycle of war may now be near its end

Mirror In Parchment Michael Camille,2013-06-01 What is the status of visual evidence in history Can we actually see the past through images Where are the traces of previous lives deposited Michael Camille addresses these important questions

in *Mirror in Parchment* a lively searching study of one medieval manuscript its patron producers and historical progeny The richly illuminated Luttrell Psalter was created for the English nobleman Sir Geoffrey Luttrell 1276 1345 Inexpensive mechanical illustration has since disseminated the book's images to a much wider audience hence the Psalter's representations of manorial life have come to profoundly shape our modern idea of what medieval English people high and low looked like at work and at play Alongside such supposedly truthful representations the Psalter presents myriad images of fantastic monsters and beasts These patently false images have largely been disparaged or ignored by modern historians and art historians alike for they challenge the credibility of those pictures in the Luttrell Psalter that we wish to see as real In the conviction that medieval images were not generally intended to reflect daily life but rather to shape a new reality Michael Camille analyzes the Psalter's famous pictures as representations of the world imagined and real of its original patron Addressed are late medieval chivalric ideals physical sites of power and the boundaries of Sir Geoffrey's imagined community wherein agricultural laborers and fabulous monsters play a similar ideological role The Luttrell Psalter thus emerges as a complex social document of the world as its patron hoped and feared it might be War and Chivalry Matthew Strickland, 1996-12-12 This is the first large scale study of conduct in warfare and the nature of chivalry in the Anglo Norman period The extent to which the knighthood consciously sought to limit the extent of fatalities among its members is explored through a study of notions of a brotherhood in arms the actualities of combat and the effectiveness of armour the treatment of prisoners and the workings of ransom Were there laws of war in operation in the eleventh and twelfth centuries and if so were they binding How far did notions of honour affect knights' actions in war itself Conduct in war against an opposing suzerain such as the Capetian king is contrasted to behaviour in situations of rebellion and of civil war An overall context is provided by an examination of the behaviour in war of the Scots and the mercenary routiers both accused of perpetrating atrocities
