address the question of vital force in Spanish modernity **Decadent Modernity** Michela Coletta, 2018 How did Latin Americans represent their own countries as modern By treating modernity as a ubiquitous category in which ideas of progress and decadence are far from being mutually exclusive this book explores how different groups of intellectuals between the late nineteenth and the early twentieth century drew from European sociological and medical theories to produce a series of cultural representations based on notions of degeneration Through a comparative analysis of three country case studies Argentina Uruguay and Chile the book investigates four themes that were central to definitions of Latin American modernity at the turn of the century race and the nation the search for the autochthonous education and aesthetic values It takes a transnational approach to show how civilisational constructs were adopted and adapted in a postcolonial context where cultural modernism foreshadowed economic modernisation In doing this this work sheds new light on the complex discursive negotiations through which the idea of Latin America became gradually established in the region
