Losing Control Sovereignty In The Age Of Globalization Leonard Hastings Schoff Lectures:

Losing Control? Saskia Sassen, 1996 This work looks at the way in which the new global economy works examining its effect on the power and legitimacy of individual states It argues that national sovereignty has not eroded but states have begun to reconfigure to decide where their resonance

Public Governance in the Age of Globalization Karl-Heinz Ladeur, 2017-05-15 Globalization and its relationship to public governance is one of the key issues of our time In this book experts from a number of disciplines attempt to define what these two terms mean and perhaps even more importantly what they do not Taking as a starting point that globalization is neither the take over of political power by multi national stateless enterprises nor the chaotic unstructured process of dissolution of public order the contributors suggest that what is occurring is more institutionalized than many critics would admit It is argued that there are important transnational and supra national elements of a new public order which remain beyond the traditional borders of the state but not completely beyond the state as such Globalization as opposed to former developments in the internationalization of the economy is characterized by its transnational form i e it is based on exchange processes which to a greater or lesser degree bypass both the state and the traditional international character of the world economy of the past

The Emergence of Private Authority in Global Governance Rodney Bruce Hall, Thomas J. Biersteker, 2002-12-12 The emergence of private authority has become increasingly a feature of the post Cold War world In The Emergence of Private Authority in Global Governance leading scholars explore the sources practices and implications of this erosion of the power of the state They analyse and compare actors as diverse as financial institutions multinational corporations religious terrorists and organised criminals and assess the potential for reversal of the situation The themes of the book relate directly to debates concerning globalization and the role of international law and will be of interest to scholars and students of international relations politics sociology and law

Global City-Regions Allen J. Scott, 2001-01-25 There are now more than three hundred city regions around the world with populations greater than one million These city regions are expanding vigorously and they present many new and deep challenges to researchers and policy makers in both the more developed and less developed parts of the world The processes of global economic integration and accelerated urban growth make traditional planning and policy strategies in these regions increasingly inadequate while more effective approaches remain largely in various stages of hypothesis and experimentation Global City Regions represents a multifaceted effort to deal with the many different issues raised by these developments It seeks at once to define the question of global city regions and to describe the internal and external dynamics that shape them it proposes a theorization of global city regions based on their economic and political responses to intensifying levels of globalization and it offers a number of policy insights into the severe social problems that confront global city regions as they come face to face with an economically and politically neoliberal world At a moment when globalization is increasingly subject to critical scrutiny in many different quarters this book provides a timely overview of its

effects on urban and regional development one of its most important but perhaps least understood corollaries The book also offers a series of nuanced visions of alternative possible futures

The Global City Saskia Sassen,2025-09-09 In her classic book *The Global City* Saskia Sassen tells how New York London and Tokyo became command centers of the emerging global economy and in the process underwent massive and parallel changes The book reorients the way we think about how cities shape and are shaped by globalization and provides lessons for the future

New Transnational Social Spaces Ludger Pries,2013-02-01 Recent terms such as globalisation virtual reality and cyberspace indicate that the traditional notion of the geographic and the social space is changing *New Transnational Social Spaces* illustrates the contemporary relationship between the social and the spatial which has emerged with new communication and transportation technologies alongside the massive transnational movement of people

Mexican New York Robert Smith,2006 *Mexican New York* offers an intimate view of globalization as it is lived by Mexican immigrants their children in New York in Mexico

What Journalists Are Owed Fred Vultee, Lee Wilkins,2020-05-21 The study of news and news practice is rich in examinations of what journalists owe to society However this book looks at what journalists can expect from society what roles ownership structures colleagues governments and audiences should play so journalists can do their jobs well and safely *What Journalists Are Owed* draws on a variety of research perspectives legal and ethical analysis surveys interviews and content analysis in different national settings to look at how those relationships among stakeholders are developing in a time of rapid and often unsettling change to the political and economic environments that surround journalism Journalism can be a risky business This book opens some discussions on those risks can be described and mitigated There is no shortage of writing about what journalists owe society but if society wants journalism done well what does it owe journalists in return This volume opens a discussion on the cultural legal system and professional agreements that societies should provide so journalists can do their jobs in increasingly hostile political environments This book was originally published as a special issue of *Journalism Studies*

Cities in a World Economy Saskia Sassen,2018-05-30 *Cities in a World Economy* Fifth Edition examines the emergence of global cities as a new social formation As sites of rapid and widespread developments in the areas of finance information and people global cities lie at the core of the major processes of globalization The book reflects the most current data available and explores recent debates such as the role of cities in mitigating environmental problems the global refugee crisis Brexit and the rise of Donald Trump in the United States

From Tribal Village to Global Village Alison Brysk,2000 This book examines the rise of human rights movements in five Latin American countries Ecuador Mexico Brazil Nicaragua and Bolivia among the hemisphere's most isolated and powerless people Latin American Indians It describes the impact of the Indian rights movement on world politics from reforming the United Nations to evicting foreign oil companies and analyzes the impact of these human rights experiences for all of Latin America's indigenous citizens and native people throughout the world

Private Environmental Regimes in Developing Countries R. Espach,2009-08-03 This book assesses the recent

growth and future prospects of private transnational environmental certification and standards regimes examining in detail to what degree and under what circumstances do these transnational regimes truly influence industrial environmental practices in developing countries

Mobility Makes States Darshan Vigneswaran, Joel Quirk, 2015-04-22 Human mobility has long played a foundational role in producing state territories resources and hierarchies When people move within and across national boundaries they create both challenges and opportunities In *Mobility Makes States* chapters written by historians political scientists sociologists and anthropologists explore different patterns of mobility in sub Saharan Africa and how African states have sought to harness these movements toward their own ends While border control and intercontinental migration policies remain important topics of study *Mobility Makes States* demonstrates that immigration control is best understood alongside parallel efforts by states in Africa to promote both long distance and everyday movements The contributors challenge the image of a fixed and static state that is concerned only with stopping foreign migrants at its border and show that the politics of mobility takes place across a wide range of locations including colonial hinterlands workplaces camps foreign countries and city streets They examine short term and circular migrations everyday commuting and urban expansion forced migrations emigrations diasporic communities and the mobility of gatekeepers and officers of the state who push and pull migrant populations in different directions Through the experiences and trajectories of migration in sub Saharan Africa this empirically rich volume sheds new light on larger global patterns and state making processes Contributors Eric Allina Oliver Bakewell Pamila Gupta Nauja Kleist Loren B Landau Joel Quirk Benedetta Rossi Filipa Ribeiro da Silva Simon Turner Darshan Vigneswaran

Undocumented Migration Roberto G. Gonzales, Nando Sigona, Martha C. Franco, Anna Papoutsis, 2019-10-11 Undocumented migration is a global and yet elusive phenomenon Despite contemporary efforts to patrol national borders and mass deportation programs it remains firmly placed at the top of the political agenda in many countries where it receives hostile media coverage and generates fierce debate However as this much needed book makes clear unauthorized movement should not be confused or crudely assimilated with the social reality of growing numbers of large settled populations lacking full citizenship and experiencing precarious lives From the journeys migrants take to the lives they seek on arrival and beyond *Undocumented Migration* provides a comparative view of how this phenomenon plays out looking in particular at the United States and Europe Drawing on their extensive expertise the authors breathe life into the various issues and debates surrounding migration including the experiences and voices of migrants themselves to offer a critical analysis of a hidden and too often misrepresented population

Undercover Asian Leilani Nishime, 2014-01-30 In this first book length study of media images of multiracial Asian Americans Leilani Nishime traces the codes that alternatively enable and prevent audiences from recognizing the multiracial status of Asian Americans Nishime's perceptive readings of popular media movies television shows magazine articles and artwork indicate how and why the viewing public often fails to identify multiracial Asian Americans Using actor Keanu Reeves and the *Matrix* trilogy golfer

Tiger Woods as examples Nishime suggests that this failure is tied to gender sexuality and post racial politics Also considering alternative images such as reality TV star Kimora Lee Simmons the television show Battlestar Galactica and the artwork of Kip Fulbeck this incisive study offers nuanced interpretations that open the door to a new and productive understanding of race in America

Global Babel Samir Dayal, Margueritte Murphy, 2021-02-10 Globalization as we know it today would be unimaginable without the revolution in information and communication technologies of the last thirty years Yet have we achieved one world as the promotional hype for cellular and digital networks would have it This collection of essays Global Babel Questions of Discourse and Communication in a Time of Globalization explores the current state of communication and discourse in a globalized environment The essays are united by an awareness that whether understood technologically economically epistemologically or culturally globalization is a discursive field with discrepant assumptions categories and conclusions As such globalization is double edged and complex It can certainly enable the exploitation of the powerless by the powerful in different contexts or at different moments it can also facilitate individual and collective agency It is this doubleness this complexity that this collection seeks to bring into focus This volume offers an interdisciplinary forum where technological aesthetic and ethical issues relating to globalization inhabit the same conceptual frame Together the essays address the central issue of how the new knowledges of globalization are being articulated and explore the cultural consequences and success of such communication and knowledge exchange

Rethinking Humanitarian Intervention in the 21st Century Aiden Warren, 2017-06-02 Since the end of the Cold War humanitarian interventions have continued to evolve and respond to a wide range of political crises These insightful essays focus on the challenges associated with interventions when facing conflict and human rights violations unmitigated systematic violence state re building human mobility and dislocation Each chapter is linked to the rest through three defining themes that permeate the book the evolution of humanitarian interventions in a global era the limits of sovereignty and the ethics of interventions and the politics of post intervention re building and humanitarian engagement The authors incorporate a variety of case studies including Kosovo Timor Leste Syria Libya and Iraq and examine the complexity of interventions across their different dimensions including relevant doctrines such as R2P Use of Force and Human Security

Old Nations, New Voters David C. Earnest, 2008-11-05 In this groundbreaking study David C Earnest analyzes why democracies give noncitizens the right to vote Bringing together theoretical debates in international relations and comparative politics about globalization sovereignty nationalism citizenship and state building he examines how twenty five democracies are coping with growing populations of immigrants who increasingly demand political rights Earnest employs statistical analyses along with case studies to uncover surprising facts that national courts are not necessarily progressive and that the left right differences of political parties disguise intriguing coalitions that may either welcome or marginalize immigrants The author concludes that rather than undermining the rights of citizens the enfranchisement of noncitizens reflects shared national myths In this respect when faced with growing

migration old nations welcome new voters in ways that reinforce the bond between the nation and state

Rules, Paper, Status Anna Tuckett, 2018-06-26 Whether motivated by humanitarianism or concern over porous borders dominant commentary on migration in Europe has consistently focused on clandestine border crossings Much less however is known about the everyday workings of immigration law inside borders Drawing on in depth ethnographic fieldwork in Italy one of Europe's biggest receiving countries *Rules Paper Status* moves away from polarized depictions to reveal how migration processes actually play out on the ground Anna Tuckett highlights the complex processes of inclusion and exclusion produced through encounters with immigration law The statuses of legal or illegal which media and political accounts use as synonyms for good and bad worthy and unworthy are not created by practices of border crossing but rather through legal and bureaucratic processes within borders devised by governing states Taking migrants interactions with immigration regimes as its starting point this book sheds light on the productive nature of legal and bureaucratic encounters and the unintended consequences they produce *Rules Paper Status* argues that successfully navigating Italian immigration bureaucracy which is situated in an immigration regime that is both exclusionary and flexible requires and induces culturally specific modes of behavior Exclusionary laws however can transform this social and cultural learning into the very thing that endangers migrants right to live in the country

Roots & Routes Jacqueline Mosselson, 2006 *Roots and Routes* is a poignant study of the social integration and identity formation of female refugee youth Grounded in the practical experiences of adolescent Bosnian refugees living in New York City the book gives voice to these youths experiences as they develop a sense of self in their newly adopted homes Jacqueline Mosselson explores the tensions of affiliation that this process of identity formation generates as the refugees seek to understand ties that bind them to their past their homeland and their cultural and geographical roots Of central concern is the way the identities of refugee youth are affected by new understandings of cultural capital and social expectations Mosselson's work draws on the theoretical literature of cultural studies and critical psychology to call into question long held beliefs about the ways refugees adapt to the United States In this powerful and moving book the female refugee informants speak back to and reflect on the constraints as well as the possibilities of their transition migration and exile from their homelands

Migration, Transnationalization, and Race in a Changing New York Héctor R. Cordero-Guzmán, Robert C. Smith, Ramón Grosfoguel, 2001 In this work 19 scholars from a range of disciplines discuss New York's immigrant communities They explore the interaction between economic globalization and transnationalization demographic change and the evolving racial ethnic and gender dynamics in the city
