**Production in Mexico** Thomas Weaver, James B. Greenberg, William L. Alexander, Anne Browning-Aiken, 2012-06-15 *Neoliberalism and Commodity Production in Mexico* details the impact of neoliberal practice on the production and exchange of basic resources in working class communities in Mexico Using anthropological investigations and a market driven approach contributors explain how uneven policies have undermined constitutional protections and working class interests since the Mexican Revolution of 1910 Detailed ethnographic fieldwork shows how foreign investment privatization deregulation and elimination of welfare benefits have devastated national industries and natural resources and threatened agriculture driving the campesinos and working class deeper into poverty Focusing on specific commodity chains and the

changes to production and marketing under neoliberalism the contributors highlight the detrimental impacts of policies by telling the stories of those most affected by these changes They detail the complex interplay of local and global forces from the politically mediated systems of demand found at the local level to the increasingly powerful municipal and state governments and the global trade and banking institutions Sharing a common theoretical perspective and method throughout the chapters *Neoliberalism and Commodity Production in Mexico* is a multi sided ethnography that makes a significant contribution to studies of neoliberal ideology in practice *Intersectional Feminism in the Age of Transnationalism* Rayssa E. homeownership has been a significant symbol of governmental benevolence and poverty reduction Under Pinochet's neoliberalism subsidized housing and slum eradication programs displaced many squatters while awarding them homes of their own This process in addition to ongoing forms of activism has permitted the vast majority of squatters to live in homes with property titles a momentous change of the past half century This triumph is tempered by the fact that today the urban poor struggle with high levels of unemployment and underemployment significant debt and a profoundly segregated and hostile urban landscape They also find it more difficult to mobilize than in the past and as homeowners they can no longer rally around the cause of housing rights Citing cultural theorists from Marx to Foucault Murphy directly links the importance of home ownership and property rights among Santiago's urban poor to definitions of Chilean citizenship and propriety He explores how the deeply embedded liberal belief system of individual property ownership has shaped political social and physical landscapes in the city His approach sheds light on the role that social movements and the gendered contours of home life have played in the making of citizenship It also illuminates processes through which squatters have received legally sanctioned homes of their own a phenomenon of critical importance in cities throughout much of Latin America and the Global South
