Australia's Lost World Michael Archer, Suzanne Hand, Suzanne J. Hand, Henk Godthelp, 2000 In Queensland in northeast Australia lies one of the most significant fossil deposits in the world Riversleigh Here the remains of many thousands of weird and wonderful prehistoric animals have been superbly preserved in the limestone outcrops There are marsupial lions carnivorous kangaroos 23 foot long pythons primitive platypuses and early ancestors of the now extinct Tasmanian tiger So important is this site to our understanding of what has happened to Australia and its living cargo over the last 25 million years that Riversleigh has been inscribed on the World Heritage List Michael Archer Suzanne J Hand and Henk Godthelp the principal scientists on a remarkable excavation since 1976 explain the vast environmental and geographic changes that have occurred in this area since Australia broke away from the

supercontinent of Gondwana and how the animals on board this continental raft evolved through the ages Photographs and evocative artwork bring to life the teeming tropical world that once existed in the now arid wastes of Riversleigh and the authors discuss some of the unusual techniques used on a dig They describe how to recognize fossils how to date them and how to reconstruct extinct animals from them Originally published as Riversleigh The Story of Animals in Ancient Rainforests of Inland Australia this award winning book is being issued for the first time in the United States **Official Meeting**
