Motion and Forces

- MS-FIS-1** Apply Newton's third law to design a solution to a problem involving the motion of two colliding objects.
- MS-FIS-2** Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.
- MS-FIS-4** Construct and present arguments using evidence to support the claim that gravitational interactions are attractive and depend on the masses of interacting objects.
- MS-FIS-5** Conduct an investigation and evaluate the experimental design to provide evidence that fields exist between objects exerting forces on each other even though the objects are not in contact.

Energy

- MS-FIS-1** Construct and interpret graphical displays of data to describe the relationship of kinetic energy to mass of an object and to the speed of an object.
- MS-FIS-2** Develop a model to describe that when the arrangement of objects interacting at a distance changes, different amounts of potential energy are stored in the system.
