Barbara Dowds, 2018-05-11 This book foregrounds the life struggles of an individual Brenda in such a way that argument and theoretical exploration arise organically out of experience The frustration of the title is traced to avoidant attachment pretending not to need others In Brenda this is associated with a body energy pattern that is both over charged and over contained generating a self frustrating process Such a repressive defence works against her so that she experiences her life as dry soulless and uncreative A variety of existential difficulties are traced to how such core developmental issues interact with our socio cultural environment A way forward is outlined play and finding meaning are identified as transformational hubs that bring wellbeing into Brenda s life and restore her capacity for experiencing **The Formula** Luke

Dormehl, 2014-04-03 What if everything in life could be reduced to a simple formula What if numbers were able to tell us which partners we were best matched with not just in terms of attractiveness but for a long term committed marriage Or if they could say which films would be the biggest hits at the box office and what changes could be made to those films to make them even more successful Or even who out of us is likely to commit certain crimes and when This may sound like the world of science fiction but in fact it is just the tip of the iceberg in a world that is increasingly ruled by complex algorithms and neural networks In The Formula Luke Dormehl takes you inside the world of numbers asking how we came to believe in the all conquering power of algorithms introducing the mathematicians artificial intelligence experts and Silicon Valley entrepreneurs who are shaping this brave new world and ultimately asking how we survive in an era where numbers can sometimes seem to create as many problems as they solve **The Routledge International Handbook of Learning** Peter
