Rethinking Medieval Margins and Marginality Ann Zimo, Tiffany Vann Sprecher, Kathryn Reyerson, Debra Blumenthal, 2020-03-02 Marginality assumes a variety of forms in current discussions of the Middle Ages Modern scholars have considered a seemingly innumerable list of people to have been marginalized in the European Middle Ages the poor criminals unorthodox religious the disabled the mentally ill women so called infidels and the list goes on If so many inhabitants of medieval Europe can be qualified as marginal it is important to interrogate where the margins lay and what it means that the majority of people occupied them In addition we scholars need to reexamine our use of a term that seems to have such broad applicability to ensure that we avoid imposing marginality on groups in the Middle Ages that the era itself may not have considered as such In the medieval era when belonging to a community was vitally important people who lived on the margins of society could be particularly vulnerable And yet as scholars have shown we ought not forget that this heightened vulnerability sometimes prompted so called marginals to form their own communities as a way of redefining the

center and placing themselves within it The present volume explores the concept of marginality to whom the moniker has been applied to whom it might usefully be applied and how we might more meaningfully define marginality based on historical sources rather than modern assumptions Although the volume s geographic focus is Europe the chapters look further afield to North Africa the Sahara and the Levant acknowledging that at no time and certainly not in the Middle Ages was Europe cut off from other parts of the globe [The Ink Garden of Brother Theophane](#) C M Millen,2010-07-01 In

medieval Ireland Theophane s boredom with his duties as a scribe distracts the other monks but when he is sent to the kitchens he discovers that he can make inks of many colors from plants allowing the others to illustrate their work Includes facts about the history of monasteries scriptoriums and illuminated manuscripts **Making Magic in Elizabethan**

England Frank Klaassen,2019-07-26 This volume presents editions of two fascinating anonymous and untitled manuscripts of magic produced in Elizabethan England the Antiphoner Notebook and the Boxgrove Manual Frank Klaassen uses these texts which he argues are representative of the overwhelming majority of magical practitioners to explain how magic changed during this period and why these developments were crucial to the formation of modern magic The Boxgrove Manual is a work of learned ritual magic that synthesizes material from Henry Cornelius Agrippa the Fourth Book of Occult Philosophy Heptameron and various medieval conjuring works The Antiphoner Notebook concerns the common magic of treasure hunting healing and protection blending medieval conjuring and charm literature with materials drawn from Reginald Scot s famous anti magic work Discoverie of Witchcraft Klaassen painstakingly traces how the scribes who created these two manuscripts adapted and transformed their original sources In so doing he demonstrates the varied and subtle ways in which the Renaissance the Reformation new currents in science the birth of printing and vernacularization changed the practice of magic Illuminating the processes by which two sixteenth century English scribes went about making a book of magic this volume provides insight into the wider intellectual culture surrounding the practice of magic in the early modern period **Children's Book Review Index 2008** Dana Ferguson,2008-08-15 The Childrens Book Review Index contains

review citations to give your students and researchers access to reviewers comments and opinions on thousands of books periodicals books on tape and electronic media intended and or recommended for children through age 10 The volume makes it easy to find a review by authors name book title or illustrator and fully indexes more than 600 periodicals **American**

Women and Magic in Medieval Romance Jane Elizabeth Bonsall, 2025-04-08 Explores the conventions and contradictions inherent in archetypes of magical femininity from loathly ladies to monstrous mothers in a range of popular late medieval English romances The female characters in Middle English romances with particular power and agency are often portrayed as supernatural possessing either magical abilities or identities This book argues that a genre focused reading of these supernatural women reveals romance's strategies for working through and articulating anxieties about the changing world of the late medieval period as well as exposing their contemporary audiences' unexpectedly flexible attitudes toward feminine authority and moral ambiguity It explores five distinct types of magical femininity the Tristan tradition's marvelously gifted healers the Muslim princess in *Bevis of Hampton* the endlessly wealthy fairy imagined by Sir Launfal and Partonope of Blois the monster mother Melusine and Morgan le Fay the prototypical witch By tracking the way each type first establishes then complicates generic patterns this study highlights the tension between romance's persistent fascination with feminine power and its simultaneous reiteration of the social and generic bounds on women's agency and authority Interrogating generic expectations from an intersectional feminist perspective it makes a case for a recuperative re-reading of romance one that asks us to revise our assumptions about the potentialities of women's power in the medieval imaginary

Magic and Magicians in the Middle Ages and the Early Modern Time Albrecht Classen, 2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre-modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issues such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While

some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large

The Owl, the Raven & the Dove G. Ronald Murphy,2000 This study takes five of the Grimm brothers best known tales and argues that the Grimms saw them as Christian fables The author examines the arguments of previous interpreters of the tales and demonstrates how they missed the Grimms intention

Gothicka Victoria Nelson,2012-04-23 The Gothic has taken a revolutionary turn in this century Today s Gothic has fashioned its monsters and devils into heroes and angels and is actively reviving supernaturalism in popular culture Nelson argues that this mainstreaming of a spiritually driven supernaturalism is a harbinger of what a post Christian religion in America might look like

Playful Visions Meredith A. Bak,2020-03-17 The kaleidoscope the stereoscope and other nineteenth century optical toys analyzed as new media of their era provoking anxieties similar to our own about children and screens In the nineteenth century the kaleidoscope the thaumatrope the zoetrope the stereoscope and other optical toys were standard accessories of a middle class childhood used both at home and at school In *Playful Visions* Meredith Bak argues that the optical toys of the nineteenth century were the new media of their era teaching children to be discerning consumers of media and also provoking anxieties similar to contemporary worries about children s screen time Bak shows that optical toys which produced visual effects ranging from a moving image to the illusion of depth established and reinforced a new understanding of vision as an interpretive process At the same time the expansion of the middle class as well as education and labor reforms contributed to a new notion of childhood as a time of innocence and play Modern media culture and the emergence of modern Western childhood are thus deeply interconnected Drawing on extensive archival research Bak discusses among other things the circulation of optical toys and the wide visibility gained by their appearance as printed templates and textual

descriptions in periodicals expanding conceptions of literacy which came to include visual acuity and how optical play allowed children to exercise a sense of visual mastery She examines optical toys alongside related visual technologies including chromolithography which inspired both chromatic delight and chromophobia Finally considering the contemporary use of optical toys in advertising education and art Bak analyzes the endurance of nineteenth century visual paradigms
