Mechanic and Mirror of Science ,1891 Teacher's Guidebook for Science Problems for Junior High School Wilbur Lee Beauchamp,1965 **Electricity and Magnetism** William C. Robertson,2005 Electricity and Magnetism is the fifth title in the award winning NSTA Press Stop Faking It Series As author Bill Robertson writes The book you have in your hands is not a textbook It is however designed to help you get science at a level you never thought possible and also to bring you to the point where tackling more traditional science resources won t be a terrifying lump in your throat I don t think I ll survive experience **Asteroid Answers to Ancient Calendar Mysteries** Herbert B. Stollorz,2008-07-03 Ancient calendars found around the world are designed to end one point in time They communicate an urgent warning to everyone alive today Complex bronze and gold clocks with multiple dials are found in museums around the world Why they have such advanced intricacy has stumped scientists for hundreds of years This book reveals why the ancients built so many pyramids observatories as well as those complex gold and bronze clocks with more than one dial It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012 It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time history and prophecy which is history written in advance The most famous example is the Mayan Aztec calendar which ends its 25 626 year cycle on that momentous date Some researchers have also found 21 December 2012 in what is called the Bible Code Using very different research methods I discovered it in the Bible s book of Revelation and Daniel s prophecies It is one of the most important dates in the plan of God for all humanity **APOLLO: A Decade of Achievement** Paul I. Casey,2013-10-25 The race for space begins on October 4 1957 as the Soviet Union stuns the world and launches the first man made satellite a feat until then only read about in science fiction America is caught unprepared for

1957 and must answer this embarrassment to the world by proving its superiority however each time America tries to launch a satellite let alone test a new rocket it fails How could America have taken a back seat in the missile race How did America take the lead and win the race to the moon in as little as ten years How did America gain the necessary technology and ingenuity to not only launch men into outer space but also land them on the moon and safely return Why did man even go to the moon How has the space program affected our lives today Casey spent his life researching the space program and interviewing many people involved in it from scientists to astronauts to find answers to these questions Casey an accomplished technical writer astronomy columnist and artist began to write this book after he was inspired as a young child when he witnessed along with the rest of the world Apollo 11 land three men on the moon in 1969 Casey enjoyed educating students about the space program and wrote this book to share an enthusiasm about science especially for those never thought about looking up at the night sky and wondering about the stars Casey wanted students to ask questions and to gain a perspective on how incredible science is But mostly he wanted to inspire students to pursue a career in science to continue the peaceful exploration of space for generations to come The Electrical Journal ,1885 **The Electrician** ,1884
