Establishment of a sound legal regulatory and institutional setting for PIM making sure it is linked to the budget process
 Allocation of roles and responsibilities for key players in PIM across government
 Strengthening of guidance on project preappraisal appraisal and selection prioritization procedures and deepening of project appraisal methodologies
 Integration of strategic planning project appraisal selection and capital budgeting
 Management of multiyear capital budget allocations and commitments
 Efforts to address effective implementation procurement and monitoring of projects
 Strengthening of asset management and ex post evaluation
 Integration of PIM and public private partnership PPP in a unified framework
 Rationalization and prioritization of the existing PIM project portfolio
 Development of a PIM database and information technology in the form of a PIM information system
 The PIM Reference Guide does not seek to provide definitive answers or standard guidance for the common PIM issues facing countries Nor does it seek to provide a detailed template for replication across countries this would be impossible given the diversity of country situations Instead each chapter begins with an overview of the specific reform issue lists approaches and experiences from different countries and summarizes the references and good practices to be considered in designing country specific reform actions
