Ehrhart,2015-11-06 Operations in Afghanistan frequently require United States ground forces to engage and destroy the enemy at ranges beyond 300 meters These operations occur in rugged terrain and in situations where traditional supporting fires are limited due to range or risk of collateral damage With these limitations the infantry in Afghanistan require a precise lethal fire capability that exists only in a properly trained and equipped infantryman While the infantryman is ideally suited for combat in Afghanistan his current weapons doctrine and marksmanship training do not provide a precise lethal fire capability to 500 meters and are therefore inappropriate Comments from returning non commissioned officers and officers reveal that about fifty percent of engagements occur past 300 meters The enemy tactics are to engage United States forces from high ground with medium and heavy weapons often including mortars knowing that we are restricted by our equipment limitations and the inability of our overburdened soldiers to maneuver at elevations exceeding 6000 feet Current equipment training and doctrine are optimized for engagements under 300 meters and on level terrain There are several ways to extend the lethality of the infantry A more effective 5 56 mm bullet can be designed which provides enhanced terminal performance out to 500 meters A better option to increase incapacitation is to adopt a larger caliber cartridge which will function using components of the M16 M4 The 2006 study by the Joint Service Wound Ballistics Integrated Product Team discovered that the ideal caliber seems to be between 6 5 and 7 mm This was also the general conclusion of all military ballistics studies since the end of World War I *Handguns 2004* Dave Arnold,2003-09 The latest edition of the top selling handguns annual features new reports on handguns for field and personal protection use The catalog section is fully updated and expanded with new feature articles providing the latest on trends gun tests self defense and handgun hunting **Guide to Australia** Osmar White,1968 **The Motion Picture Guide** Jay Robert Nash,Stanley Ralph Ross,1985 *Forest and Stream* ,1886 **The Lancet** ,1879 **Popular Mechanics** ,1964-04 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces** ,1867 Bulletin of the Atomic Scientists ,1959-02 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological
