The Spectator, 1898 **De Bow's Review** James Dunwoody Brownson De Bow, 1851 **Buffalo Bill's America** Louis S. Warren, 2007-12-18 William F. Buffalo Bill Cody was the most famous American of his age. He claimed to have worked for the Pony Express when only a boy and to have scouted for General George Custer. But what was his real story? And how did a frontiersman become a worldwide celebrity? In this prize-winning biography, acclaimed author Louis S. Warren explains not only how Cody exaggerated his real experience as an army scout and buffalo hunter but also how that experience inspired him to create the gigantic traveling spectacle known as Buffalo Bill's Wild West Show. A dazzling mix of Indians, cowboys, and vaqueros, they performed on two continents for three decades, offering a surprisingly modern view of the United States and a remarkably democratic version of its history. This definitive biography reveals the genius of America's greatest showman and the startling history of the American West that drove him and his performers to the world stage.

Sugar and the Making of International Trade Law Michael Fakhri, 2014-11-27 This book traces the changing meanings of free trade over the past century through three sugar treaties and their concomitant institutions. The 1902 Brussels Convention is an example of how free trade buttressed the British Empire. The 1937 International Sugar Agreement is a story of how a group of Cubans renegotiated their state's colonial relationship with the US through free trade doctrine and the League of Nations. In addition, the study of the 1977 International Sugar Agreement maps the world of international trade law through a plethora of institutions such as the ITO, UNCTAD, GATT, and international commodity agreements, all against the backdrop of competing Third World agendas. Through a legal study of free trade ideas, interests, and institutions, this book highlights how the line between the state and market, domestic and international, and public and private is always a matter of contest.

Wealth from the Rocks Mwelwa C. Musambachime, 2016-07-29 This study focuses on the study of metallurgy in pre-colonial Zambia to 1890. A general review of the literature on metallurgy in pre-colonial Zambia reveals that during the period our study up to 1890, three metals were mined: Iron, production was a widespread, important, and significant phenomenon responsible for producing utility tools: hoes, axes, knives, weapons, spears, arrow heads, and broad knives, and regalia for the political and religious office holders: copper, which was confined to few areas, and gold, to even fewer areas. Metallurgy was an important economic activity in which all ethnic groups participated in different levels of intensity. From iron ore, which was smelted in elaborate and complicated processes imbued in magic, song, dance, incantations, medicines, and taboos by members of exclusively male guilds, blacksmiths were able to produce the following tools used in agriculture: hoes, axes, used to clear forestays or areas to be cultivated to grow food for subsistence; non-edible crops such as tobacco and hemp, which were smoked as part of relaxation; cotton, used to make blankets and shawls; needles for mending clothes; and knives for a variety of uses: b) hunting, using varieties of spears to hunt game, seek protection from dangerous animals for defence of resources, or offence to capture desired resources; c) various sizes of hooks used in fishing different varieties of fish; and d) making of regalia.

used in chieftaincies and priesthood as symbols of authority Copper was also smelted and put in ingots of varying sizes and rods of varying sizes and lengths which were used to make copper wires as wires rods vessels and other utensils copper smiths produced jewellery and ornaments and cast art pieces such as statues and necklaces worn by men and women as status symbols b used in exchange of goods and services as currency and c used to produce regalia for the for those in authority Gold was mined directly and processed into making a variety of items such as buttons and regalia In its various forms of development and sophistication metallurgy was responsible for the economic social and political advances among the pre colonial societies A variety of skills was required for building furnaces producing charcoal smelting and forging iron into goods Metallurgy and production of various items that were needed and necessary for an improved life were generally not an enclave activity but a process that satisfied the totality of socioeconomic needs It also promoted the gender division of labour within community Wealth from the Rocks is therefore a detailed study of the place role and function of metallurgy in pre colonial Zambian societies

Democratic Spain Richard Gillespie, Fernando Rodrigo, Jonathan Story, 2005-06-22 Since the death of General Franco in 1975 Spain has emerged from relative isolation to play an active role in international affairs Membership of the European Union and Nato have been keys to Spain's new prominence although the country has also tried to build on its traditional special relationships with Latin America and the Arab world This is the first thorough study of democratic Spain's re emergence on the international scene By focusing on the relationship between external relations and domestic policy the book makes an important contribution to the literature on democratisation as well as showing how Spanish foreign policy evolved between the mid 1970s and mid 1990s While the book focuses on democratic Spain its revisionist view of democratic transitions is of more general relevance Democratization is seen as an integral process involving related though not simultaneous changes in domestic policy and external relations Only with the transformation of her external relations did Spain's new democracy finally become consolidated This book will be required reading for students of Spanish politics and will also be useful to those interested in the process of democratization
