The user has always been able to read important signs off his GLOCK pistol at a glance. Trigger forward = safety activated. Trigger pulled = safety deactivated. Under all circumstances, the pistol must be treated as if it is loaded.

The pistol also indicates to GLOCK users that a round may be in the chamber of the pistol. The extractor of the pistol provides a visual and tactile indication of a loaded chamber. When the chamber is unloaded the extractor is depressed (Fig. 1) and when the chamber is loaded the extractor pivots out from the slide (Fig. 2).

SAFETY WARNING:

GLUCK users must not rely only upon a protruding extractor to confirm that a round is in the chamber. In addition, GLUCK users must not rely only upon the fact that the extractor is not protruding from the slide to confirm an empty chamber to the exclusion of manually checking the chamber. The surest method to determine the absence of a round in the chamber is to visually and manually check the chamber of the pistol by pulling and locking the slide to the rear as indicated in the Instructions for Use Manual provided with every GLUCK pistol unit.²

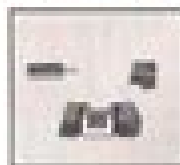

SIGHTS

These consist of a near sight (76) and a front sight (76a), in which white contrast elements are inserted. The fixed rear sight (Fig. 1) is adjustable for windage, and four different rear sight heights are available. The fully-adjustable rear sight (Fig. 2) is adjustable for windage and elevation with a small supplied screwdriver.
