God And The Scientist God And The Scientist:

Has Science Found God? Victor J. Stenger, 2009-12-02 In the past few years a number of scientists have claimed that there is credible scientific evidence for the existence of God In 1998 Newsweek went so far as to proclaim on its cover Science Finds God Is this true Are scientists close to solving the greatest of all mysteries Physicist Victor J Stenger delves into this fascinating question from a skeptical point of view in this lucid and engrossing presentation of the key scientific facts Stenger critically reviews the attempts of many contemporary theologians and some scientists to resurrect failed natural theologies in new guises Whether these involve updated arguments from design anthropic coincidences or modern forms of deism Stenger clearly shows that nothing in modern science requires supernatural explanation He offers naturalistic explanations for empirical observations that are frequently given theistic interpretations for example that information in the universe implies an intelligent designer that a universe with a beginning requires a Creator and that the elegant laws of physics suggest a transcendent realm He shows that alleged spiritual nonmaterial phenomena do not lie beyond the experimental reach of physics This thorough and careful consideration of scientific evidence covers much ground yet remains accessible and highly informative to the educated lay reader

Is God a Scientist? R. Crawford, 2004-10-01 The scriptures of the Faiths use models to depict what God is like namely Father Mother Husband Judge Lover Friend shepherd and so on Science also uses models to advance its knowledge and in a scientific age a model of God as the Cosmic Scientist interacting with the traditional could communicate well It would imply that the world is a laboratory created by God in order to test whether humanity will obey his laws and live up to the values which he embraces Using material drawn from science and six world faiths the book shows the difference and similarity between divine and human experiments and argues that God will bring the experiment to a successful conclusion

God is a Scientist! Derek Mailhiot, 2020-04-26 The opening verse in the Bible says In the beginning God created the heavens and the earth This is cosmology the science of the origin and development of the universe In creating the universe God was the Original Scientist Note the verse doesn't say when God created the universe or how God created the universe This is significant The verse doesn't say God created the universe 6 000 years ago as millions of Young Earth Creationists assert Could the beginning actually be 13.8 billion years ago like scientists claim And why do so many Christians reject the Big Bang theory God had to create the universe somehow Why couldn't that somehow be the Big Bang The Big Bang was such an awesome and enigmatic event perhaps it was an omnipotent God who triggered the Big Bang According to Old Earth Creationists the scientific evidence for the great age of the earth 4.54 billion years and the universe 13.8 billion years is undeniable But many Old Earth Creationists reject evolution opting instead for a theory of progressive creation where God created new species during creation events like the Cambrian Explosion 540 million years ago Evolutionary Creationists on the other hand also believe the Earth is millions or billions of years old and also advocate that evolution best explains how God brought about the diversity of life on Earth There

are many notable Christians who believe that an evolutionary process is in fact how God created life For example BioLogos affirms Evolutionary Creation and asserts God as Creator of all life over billions of years BioLogos was founded by one of the top biologists in the world Francis Collins who led the Human Genome Project 1993 2008 and afterward led the National Institutes of Health But severe defects in Darwinian evolution such as the absence of bona fide transitional fossils and the mystery of biological information contained in DNA decisively points to Intelligent Design rather than a random unguided natural processes in evolution Many Christians reject science even when the scientific evidence is irrefutable simply because the science conflicts with their theology But do they realize that the originator of the Big Bang theory was a Catholic priest Or that the pioneer of modern genetics was an Augustinian monk Or that the decoder of the human genome converted from atheism to Christianity when he was in his 20s Not only that but there are also many notable Christians who believe that God possibly created life by an evolutionary process Or that the earth is many millions of years old I don't think that there's any conflict at all between science today and the Scriptures I think that we have misinterpreted the Scriptures many times and we've tried to make the Scriptures say things they weren't meant to say I think that we have made a mistake by thinking the Bible is a scientific book The Bible is not a book of science The Bible is a book of Redemption and of course I accept the Creation story I believe that God did create the universe I believe that God created man and whether it came by an evolutionary process and at a certain point He took this person or being and made him a living soul or not does not change the fact that God did create man Billy Graham I believe that Christianity can still be believed even if Evolution is true C S Lewis We do not know how remote the period of the creation of this globe may be certainly many millions of years before the time of Adam Our planet has passed through various stages of existence and different kinds of creatures have lived on its surface all of which have been fashioned by God Charles Spurgeon Evidently the conflict between religion and science is not as deep as some may [Can a Scientist Believe in Miracles?](#) Ian Hutchinson, 2018-09-11 Plasma physicist Ian Hutchinson has been asked hundreds of questions about faith and science Is God's existence a scientific question Is the Bible consistent with the modern scientific understanding of the universe Are there scientific reasons to believe in God In this comprehensive volume Hutchinson answers a full range of inquiries with sound scientific insights and measured Christian perspective

The Humble Approach John Templeton, 1981 **God's Mechanics** Guy Consolmagno, 2010-12-03 With an adroit and self-effacing style a Catholic brother astronomer and physicist explains how scientists and engineers make sense of religion In *God's Mechanics* Brother Guy tells the stories of those who identify with the scientific mindset so called techies while practicing religion A self-described techie astronomer physicist and Director of the Vatican Observatory Brother Guy shares some classic philosophical reflections as well as his interviews with dozens of fellow techies and his own personal take on his Catholic beliefs to provide like a set of worked out sample problems the hard data on the challenges and joys of embracing a life of faith as a techie And he also gives a roadmap of the traps that can befall an unwary techie believer With lively prose

and wry humor Brother Guy shows how he not only believes in God but gives religion an honored place alongside science in his life This book offers an engaging look at how and why scientists and those with technological leanings can hold profound unprovable religious beliefs while working in highly empirical fields Through his own experience and interviews with other scientists and engineers who profess faith Brother Guy explores how religious beliefs and practices make sense to those who are deeply rooted in the world of technology Brother Guy Consolmagno speaks in the softest sanest voice imaginable as he enters the current firestorm of opinion re science and religion His engaging commentary exposes the mindset of a true techie but one who equates science with a sacred act Dava Sobel author Galileo s Daughter Questions of Truth John

Polkinghorne,Nicholas Beale,2009-01-19 How did the universe begin Can God s existence be proven Do humans matter more than animals For many years people have sent the scientist turned priest John Polkinghorne these and other questions about science and belief In question and answer format Polkinghorne and his collaborator Nicholas Beale offer their highly informed opinions about some of the most frequently asked of these questions Readers can follow their own paths through the book selecting questions that interest them and looking at the additional material if they choose This unique book will help Christians clarify their beliefs regarding difficult issues and better face challenges from within and from others to their faith

Let there be Science Tom McLeish,David Hutchings,2017-01-20 Throughout history scientists have made discoveries and tested hypotheses that have revolutionised the way that we see the world Our industry has been shaped by the discovery of electricity and the invention of machines our understanding of the world has deepened as we have had gravity and the magnetic forces that govern the earth explained to us Century after century big questions about our earth nature around us and the way our bodies work have been posed and gradually or sometimes dramatically answered Yet there are still further questions to be asked What is science What is it for Why do we have the need to continually be exploring the answers to more questions Authors Tom McLeish and David Hutchings examine the story of science and look at the part that Christian faith has played in that history As they tell the stories of discovery after discovery they reveal a powerful underlying reason for doing science in the first place They argue that Christianity has been involved with and sometimes directly responsible for some of the biggest leaps forward in scientific history

Finding God in Science Michael O'Connell,2020-11-07 A NASA rocket scientist uses quantum physics to find God in science This is the story of one rocket scientist s quest to know the Creator of the universe in the face of postmodern thought and atheistic claims It follows the peaks and valleys of his aerospace career and his spiritual journey in a novel defense of Christianity Finding God in Science is written for anyone who struggles with doubts over atheistic claims about truth God and science Finding God in Science begins by reconciling the creation accounts of Genesis and science Biblical and scientific evidence shows that the days of Genesis 1 were long periods of time rather than 24 hour days Ancient interpretations of the Genesis order of creation are also shown to match modern science Finding God clarifies the nature of Adam s race original sin and the real extent of Noah

s flood with biblical interpretations that are faithful to the original texts Finding God in Science continues by exploring the implications of quantum mechanics which have a deep and unexpected relevance to Christianity This is the first book to demonstrate that Jesus Christ s earthly message and mission parallel the natural laws of the universe revealing a Divine premeditation Finding God in Science shows how Jesus Christ could be both God and man and what it means to really know God and to communicate with Him Finding God sheds new light on the mystery of why Christ had to die to save us from our sins and why we have to die to finally realize eternal life The indwelling of the Holy Spirit and the security of our salvation are described using quantum analogies Quantum mechanics is shown to form the physical basis of human consciousness and underlie the core tenets of Christianity As incredible as it may sound these claims are based on the key features of quantum mechanics the Heisenberg uncertainty principle non locality and quantum entanglement The gospel is presented in a new language using the fundamental principles of physics Finding God in Science will challenge your thinking touch your soul and deepen your faith

The Science of God Gerald L. Schroeder,2009-06-16 For the readers of The Language of God another instant classic from a sophisticated and original scholar Kirkus Reviews that disputes the idea that science is contrary to religion In The Science of God distinguished physicist and Biblical scholar Gerald L Schroeder demonstrates the surprising parallels between a variety of Biblical teachings and the findings of biochemists paleontologists astrophysicists and quantum physicists In a brilliant and wide ranging discussion of key topics that have divided science and religion free will the development of the universe the origin of life and the origin of man Schroeder argues that the latest science and a close reading of the Bible are not just compatible but interdependent This timely reissue of The Science of God features a brand new preface by Schroeder and a compelling appendix that addresses the highly publicized experiment in 2008 in which scientists attempted to re create the chemical composition of the cosmos immediately after the Big Bang It also details Schroeder s lucid explanations of complex scientific

and religious concepts such as the theory of relativity the passage of time and the definitions of crucial Hebrew words in the Bible Religious skeptics Biblical literalists scientists students and physicists alike will be riveted by Schroeder s remarkable contribution to the raging debate between science and religion **God is** Alan Hayward,1978 **God, Science, and Reason** Michael Bunner,2013-04 Most persons have been led to believe there is a war between science and religion Over the past generation New Atheist icons such as Richard Dawkins Sam Harris Daniel Dennett and Christopher Hitchens have fueled this erroneous belief with provocative best selling books which herald the triumph of science over God To date the scientific and philosophical responses made by persons of faith to these New Atheist affronts have made only a little noise like warning shots fired across the bow of a ship No more In God Science and Reason Michael Bunner a scientist who also believes in God takes direct aim at the belief systems of the New Atheists and the world view they espouse He not only exposes the flaws in their own logic and rationale but also presents well reasoned and compelling scientific and philosophical arguments that reveal and decimate their belief systems In the process he demonstrates that the war between science and religion is nothing more than an illusion concocted and sustained by those who have rejected God He also makes a persuasive case that we can understand reality only when we view the world through the lenses of both science and religion

God, Science, and the Buddha Wijeratne Weerakkody,2010-07-30 Here in this book God Science and the Buddha my genuine effort is to present the reader with some insight into the existence of life and matter within the concept of universal space time in order to understand how and why mind is declared by the Buddha as the forerunner of all existence in eternity and infinity of the concept of space time Learning to understand the culmination of all the energies contained within the concept of space time would unify theology science and the nature in the noble name of God without division into mind based diverse theological images The rare opportunity in human form of life is too precious to be neglected and wasted within the short span of existence in this sensual realm of life In order to be comfortable with this understanding the author seeks to discuss scientific revelations in cosmology physics and physiology along with theology religions philosophy and Buddhism which explains the existence of the nature in its true form *God, Science and Mind* Dennis Polis,2012-07-15 An exercise in Open Philosophy a worldview open to the full range of human experience including science spirituality and traditional philosophy Naturalism is exposed as a closed a priori worldview God is not an alternative to but the completion of scientific explanation The foundations and data of evolution do not show randomness but Mind in nature Evolution aims at verifiable targets and develops means in advance of need While God is proven deductively the fine tuning argument makes a strong case despite the anthropic principle The rules of evidence are discussed critically before reviewing data on mind ranging from neuroscience connectionism cybernetics to introspection parapsychology near death experiences mysticism even I Thou relationships Current theories are inadequate to important data points Traditional philosophy suggests a single substance two subsystem theory integrating a data processing brain and an intentional immaterial soul to solve the mind body problem

Divine Science and the Science of God Victor Preller, 2005-05-17 In this book Victor Preller examines the logical status of religious language in the light of recent developments in American analytic philosophy. The problem inherent in religious language is presented in terms of the referential status of the word God. The author argues that the significance of any referential term is dependent upon the ability of that term to play a significant role within a unified conceptual system. The problem is shown to transcend the epistemological dogmas of Positivism and Conceptual Empiricism and to be inherent in any intelligible epistemology including that of Thomas Aquinas whose theological treatises serve as a model of religious language for the thesis of this book. According to Professor Preller, Divine Science, Aquinas' term for what we now call Natural Theology, results from a reflection upon the limitations encountered by the intellect in its attempt to render intelligible the objects of human experience. In the Science of God, Aquinas' term for that mode of knowing engendered by faith, the unknown meta-empirical referent of Divine Science becomes the object of the human intellect. While this study develops out of the discussions inaugurated by Flew and McIntyre in *New Essays in Philosophical Theology*, it rejects the excessively empirical approach of most other studies in that tradition. It applies post-positivistic analysis to specifically Catholic theological language but it obviously applies to the theological language involved in any form of theism. God, Science, and Self

Nauman Faizi, 2021-08-15 Muhammad Iqbal d. 1938 was one of the most influential modernist Islamic thinkers of the early twentieth century. His work as a poet, politician, philosopher, and public intellectual was widely recognized in his lifetime and plays a major role in contemporary conversations about Islam, modernity, and tradition. *God, Science, and Self* examines the patterns of reasoning at work in Iqbal's philosophic magnum opus, arguably the most significant text of modernist Islamic philosophy, *The Reconstruction of Religious Thought in Islam*. Since its initial publication in 1934, *The Reconstruction* has left scholars in a quandary; its themes appear eclectic and its arguments contradictory and philosophically perplexing. In this groundbreaking study, Nauman Faizi argues that the keys to demystifying the contradictions of *The Reconstruction* are two competing epistemologies at play within the work. Iqbal takes knowledge to be descriptive, essential, foundational, and binary, but he also takes knowledge to be performative, contextual, probabilistic, and vague. Faizi demonstrates how these approaches to knowledge shape Iqbal's claims about personhood, God, scripture, philosophy, and science. *God, Science, and Self* offers an original approach to interpreting Islamic thought as it crafts relationships between scriptural texts, philosophic thought, and scientific claims for modern Muslim subjects.
