God Bless The Nhs By Taylor Roger 2013:

God Bless the NHS Roger Taylor, 2013-03-15 The National Health Service described by Nigel Lawson as Britain's only national religion has never been more popular. So why is the government so desperate to reform it? Last year the Office of National Statistics reported higher public satisfaction with the NHS than at any time since its foundation. In a 2012 survey of developed countries the UK showed the highest public support of its health system. Politicians can hardly be surprised then when their plans to reform are met with public dismay and professional fury. This year has seen one of the most bruising political battles ever fought over the future of the NHS. The twenty-two month fight to push the NHS and Social Care Act through parliament prompted the most widespread political campaign by doctors since Aneurin Bevan established the NHS in 1948. It cost the coalition government dearly and shredded the reputation of the Secretary of State for Health. So why did they do it? God Bless the NHS looks at the ideology behind the current reforms and the reasons why the government decided to take on the nation's most treasured institution. Roger Taylor looks equivocally at those who support and oppose the new system and at the patchy history of attempts to reform the NHS and the likelihood of the success this time round. Finally it addresses the political failure at the heart of the problem and the inevitable conflict when politics and medicine mix. **The**

Affordable Care Act and Medicare in Comparative Context Eleanor D. Kinney, 2015-07-20 Burdened with perennially rising costs and responsible for providing health insurance to more than one sixth of all Americans Medicare in its original form is fiscally and demographically unsustainable. In light of dramatic reforms under the Affordable Care Act (ACA) this book provides a comprehensive overview of the current state of Medicare. Eleanor D. Kinney explains how the ACA addresses systemic problems of cost and volume inflation, quality assurance and fraud. Recognizing the potential for more radical change in the future Kinney also explores the potential of Medicare to become a single payer system. Comparisons are made with national health systems in Canada and the United Kingdom from which the United States can draw valuable lessons. An approachable yet comprehensive account of Medicare and the ACA this book will be invaluable for health care professionals and informed citizens. Hubris: The Road to Donald Trump David Owen, 2020-04-16 In Hubris: The Road to Donald Trump David Owen analyses and describes the mental and physical condition of US Presidents and UK Prime Ministers with a

particular view that what went before paved the way to President Trump. Of recent leaders there have been alcoholics, depressives, narcissists, populists and those affected by hubris syndrome and driven by their religious beliefs. *Our NHS* Andrew Seaton, 2023-08-22 An engaging inclusive history of the NHS exploring its surprising survival and the people who have kept it running. In recent decades a wave of appreciation for the NHS has swept across the UK. Britons have clapped for frontline workers and championed the service as a distinctive national achievement. All this has happened in the face of ideological opposition, marketization and workforce crises. But how did the NHS become what it is today? In this wide-ranging history Andrew Seaton examines the full story of the NHS. He traces how the service has changed and adapted, bringing

together the experiences of patients staff from Britain and abroad and the service's wider supporters and opponents. He explains not only why it survived the neoliberalism of the late twentieth century but also how it became a key marker of national identity. Seaton emphasizes the resilience of the NHS perpetually in crisis and yet perennially enduring as well as the political values it embodies and the work of those who have tirelessly kept it afloat.

Working Women on Screen Ellie Tomsett, Nathalie Weidhase, Poppy Wilde, 2024-02-19. Working Women on Screen: Paid Labour and Fourth Wave Feminism critically examines screen media representations of women's participation in the contemporary labour market. The edited collection brings together contributions on Aesthetic Labour, Power, Politics and Neoliberal Industries and Sex, Sexuality and Relationships. Within the context of fourth wave feminism, there has been a new proliferation in the global media landscape of representations of women's paid labour. This has coincided with the development of critical and ideological issues surrounding intersectionality and culture wars, as well as the impacts of recessions, political upheavals and pandemics. Workplace dynamics and post MeToo politics have led to the complexification of structures, oppressions and relationships that impact what women can do for money. As a result, the working woman is now a constant presence on our screens, though articulated in widely divergent ways. The chapters within this collection critique issues that are deeply embedded in neoliberal conceptions of contemporary feminism, such as aspects of lean in culture, structural oppression and women's experiences of the glass ceiling and glass cliff. The volume as a whole will analyse representations related to the intersecting dynamics of gender, race, class, sexuality and disability in television, film, social media and video games. It will be key reading for students and scholars in media, gender and cultural studies.

Corpora and the Changing Society Paula Rautioaho, Arja Nurmi, Juhani Klemola, 2020-04-15. This book showcases eleven studies dealing with corpora and the changing society. The theme of the volume reflects the fact that changes in society lead to changes in language and vice versa. Focusing on the English language, be it from Old English to the present or a shorter time span in the immediate past, the contributors in this volume use a variety of corpus methods to address the two patterns of change. The cross-fertilization of cultural studies and corpus linguistics, we hope, is beneficial for both parties, as corpus linguistics offers a vast array of materials and methods to investigate cultural and societal change while cultural studies provide the theoretical background on which to build our research. The studies included in the present volume illustrate the potential avenues and the merits of combining changing language and changing societies.

Surviving Work in Healthcare Elizabeth Cotton, 2017-03-08. The book takes as its starting point the crisis of healthcare in the UK: impossible health targets managed through command and control management and a stomach-churning rise in racism, whistleblowing and victimisation in the NHS. The use of nationally set productivity targets combined with austerity cuts have increasingly put clinical best practice into direct conflict with funding. Health targets have become politically controlled and performance has become a cynical exercise in ticking boxes cascaded within trusts and bulldozed through frontline services. This has led directly to a precarious system of employment relations.

subject to the continual restructuring of services rather than the goal of creating functioning interdisciplinary teams that stand a chance of capturing clinical excellence This book is written for workers and managers who are on the frontline of the battle for decent healthcare The content of this book is based on the ordinary expertise of the people who are actually surviving it and helpful ideas about making the best out of a bad lot *Surviving Work in Healthcare* will be of interest to healthcare professionals and anyone working on the frontline of healthcare as well as students of management human resources and psychology *What Women Want* Gill Steel,2022-03-14 *What Women Want* analyzes decades of voting preferences values and policy preferences to debunk some of the media and academic myths about gender gaps in voting and policy preferences Findings show that no single theory explains when differences in women s and men s voting preferences emerge when they do not or when changes or the lack thereof occur over time Steel extends existing theories to create a broader framework for thinking about gender and voting behavior to provide more analytical purchase in understanding gender and its varying effects on individual voters preferences She incorporates the long term effects of party identification and class politics on political decision making particularly in how they influence preferences on social provision and on expectations of the state She also points to the importance of symbolic politics ***The Biopolitics of Lifestyle*** Christopher Mayes,2015-12-22 A growing sense of urgency over obesity at the national and international level has led to a proliferation of medical and non medical interventions into the daily lives of individuals and populations This work focuses on the biopolitical use of lifestyle to govern individual choice and secure population health from the threat of obesity The characterization of obesity as a threat to society caused by the cumulative effect of individual lifestyles has led to the politicization of daily choices habits and practices as potential threats This book critically examines these unquestioned assumptions about obesity and lifestyle and their relation to wider debates surrounding neoliberal governmentality biopolitical regulation of populations discipline of bodies and the possibility of community resistance The rationale for this book follows Michel Foucault s approach of problematization addressing the way lifestyle is problematized as a biopolitical domain in neoliberal societies Mayes argues that in response to the threat of obesity lifestyle has emerged as a network of disparate knowledges relations and practices through which individuals are governed toward the security of the population s health Although a central focus is government health campaigns this volume demonstrates that the network of lifestyle emanates from a variety of overlapping domains and disciplines including public health clinical medicine media entertainment school programs advertising sociology and ethics This book offers a timely critique of the continued interventions into the lives of individuals and communities by government agencies private industries medical and non medical experts in the name of health and population security and will be of interests to students and scholars of critical international relations theory health and bioethics and governmentality studies *Bioética e covid-19* Aline Albuquerque,Amanda Pacheco,Ana Carolina Brochado Teixeira,Andréa Leite Ribeiro,Arthur Fagundes Cunha Alves,Bárbara Natália Lages Lobo,Bianca Reis,Camila Mota
