Anderson, 2018-11-01 MLK and the Practice of Spirituality The scholarship on Martin Luther King Jr is seriously lacking in terms of richly nuanced and revelatory treatments of his spirituality and spiritual life This book addresses this neglect by focusing on King s life as a paradigm of a deep vital engaging balanced and contagious spirituality It shows that the essence of the person King was lies in the quality of his own spiritual journey and how that translated into not only a personal devotional life of prayer meditation and fasting but also a public ministry that involved the uplift and empowerment of humanity Much attention is devoted to King s spiritual leadership to his sense of the civil rights movement as a spiritual movement and to his efforts to rescue humanity from what he termed a perpetual death of the spirit Readers encounter a figure who took seriously the personal interpersonal and sociopolitical aspects of the Christian faith thereby figuring prominently in recasting the very definition of spirituality in his time King s holistic spirituality is presented here with a clarity and power fresh for our own generation *Moved by the Spirit* Emilie M. Townes, Christophe D. Ringer, Teresa L.

Between Naturalism and Religion Jürgen Habermas, 2014-11-06 Two countervailing trends mark the intellectual tenor of our age the spread of naturalistic worldviews and religious orthodoxies Advances in biogenetics brain research and robotics are clearing the way for the penetration of an objective scientific self understanding of persons into everyday life For philosophy this trend is associated with the challenge of scientific naturalism At the same time we are witnessing an unexpected revitalization of religious traditions and the politicization of religious communities across the world From a philosophical perspective this revival of religious energies poses the challenge of a fundamentalist critique of the principles underlying the modern West's postmetaphysical understanding of itself The tension between naturalism and religion is the central theme of this major new book by Jürgen Habermas On the one hand he argues for an appropriate naturalistic understanding of cultural evolution that does justice to the normative character of the human mind On the other hand he calls for an appropriate interpretation of the secularizing effects of a process of social and cultural rationalization increasingly denounced by the champions of religious orthodoxies as a historical development peculiar to the West These reflections on the enduring importance of religion and the limits of secularism under conditions of postmetaphysical reason set the scene for an extended treatment the political significance of religious tolerance and for a fresh contribution to current debates on cosmopolitanism and a constitution for international society
