Jackson, [edited by B. O., I.e. Barnabas Oley] ... With the Life of the Author by E. V[aughan]. Thomas Jackson, 1657

In My Father's Footsteps Sebastian Matthews, 2004 *Grunts* Kyle Longley, 2015-01-28 This book provides a fresh approach to understanding the American combat soldier's experience in Vietnam It integrates such topics as the political culture the experiences of training the actual Vietnam experience and the homecoming and offers a remarkable overview of the 870 000 grunts who bore the brunt of the fighting in the jungles and highlands of South Vietnam and eventually Cambodia and Laos The book addresses many of the stereotypes of the Vietnam combat veteran that have been perpetrated in popular culture and also considers how Vietnam veterans have been commemorated through memorials and other means and how the veterans remember each other The coverage also includes women who served in or near the front lines as well as on the home front The author draws on memoirs and oral histories including his personal interviews with veterans but the book conveys a picture of the Vietnam combat soldier's experience far more powerful than what individual memoirs can provide

Behaviorism John B. Watson, 2017-09-29 Watson was the father of behaviorism His now revered lectures on the subject defined behaviorism as a natural science that takes the whole field of human adjustment as its own It is the business of behaviorist psychology to predict and control human activity The field has as its aim to be able given the stimulus to predict the response or seeing the reaction to know the stimulus that produced it Watson argued that psychology is as good as its observations what the organism does or says in the general environment Watson identified laws of learning including frequency and recency Kimble makes it perfectly clear that Watson's behaviorism while deeply indebted to Ivan Pavlov went beyond the Russian master in his treatment of cognition language and emotion It becomes clear that Behaviorism is anything but the reductionist caricature it is often made out to be in the critical literature For that reason alone the work merits a wide reading Behaviorism as was typical of the psychology of the time offered a wide array of applications all of which can be said to fall on the enlightened side of the ledger At a time of mixed messages Watson argued against child beating and abuse for patterns of enlightened techniques of factory management and for curing the sick and isolating the small cadre of criminals not subject to correction And anticipating Thomas Szasz he argued against a doctrine of strictly mental diseases and for a close scrutiny of behavioral illness and disturbances Kimble's brilliant introduction to Watson ends with a challenge to subjectivism to provide evidence that Watson's behaviorism cannot explain human actions without introspective notions of the mind This genuine classic of social science of our century remains relevant not just for the conduct of psychological research but for studies in the philosophy of science and the sociology of knowledge *Introduction to Creed III* Gilad

Family Men Laura King, 2020-01-09 Fathers are often neglected in histories of family life in Britain Family Men provides the first academic study of fathers and families in the period from the First World War to the end of the 1950s It takes a thematic approach examining different aspects of fatherhood from the duties it encompassed to the ways in which it related to men s identities The historical approach is socio cultural each chapter examines a wide range of historical source materials in order to analyse both cultural representations of fatherhood and related social norms as well as exploring the practices and experiences of individuals and families It uncovers the debates surrounding parenting and family life and tells the stories of men and their children While many historians have examined men s relationship to the home and family in histories of gender family life domestic spaces and class cultures more generally few have specifically examined fathers as crucial family members as historical actors and as emotional individuals The history of fatherhood is extremely significant to contemporary debate assumptions about fatherhood in the past are constantly used to support arguments about the state of fatherhood today and the need for change or otherwise in the future Laura King charts men s changing experiences of fatherhood suggesting that although the roles and responsibilities fulfilled by men did not shift rapidly their relationships position in the family and identities underwent significant change between the start of the First World War and the 1960s

Male Professionals in Nineteenth Century Britain Laurence Brockliss,Harry Smith,2024-07-12 *Male Professionals in Nineteenth Century Britain* is the first statistically based social cultural and familial history of a fast growing and socially prominent section of the Victorian propertied classes It is built around a representative cohort of 750 men who were recorded in the 1851 census as practising a profession in eight British provincial towns with distinctive economic and social profiles Brighton Bristol Dundee Greenock Leeds Merthyr Tydfil Winchester and the twin county town of Northumberland Alnwick Morpeth The book provides a collective account of the cohort s lives and the lives of their families across four generations starting with their parents and ending with their grandchildren It touches on the history of 16 000 individuals The book aims to throw light on the extent to which nineteenth century professionals had a distinctive socio cultural profile as sociologists and some historians have claimed or were largely indistinguishable from other members of propertied society as most historians today assume without further investigation In exploring this question particular attention is paid to the cohort families wealth household size education occupational history geographical mobility and broader involvement in society measured by their members choice of marriage partner their kinship and friendship circles their political allegiance and their leisure activities The book demonstrates that male professionals in the Victorian era were far from being a homogenous group but were divided in many ways The most important was wealth which played a key role in the social and occupational fortunes of their descendants These divisions largely explain why some professionals and some individual professions were much more likely to display endogenous characteristics than others The book also demonstrates that even the most successful professional families got poorer over time and reveals how easily in the age of industrialisation branches of families and sometimes complete families could drop out of the elite *Weed* Paro Anand,2008-06-01 After Umer s father leaves to join the jihadis the family is pushed to the brink of poverty and desperation but his mother will have nothing to do with her husband The government and charities working in Kashmir in their better wisdom believe it is best not to offer sustenance to the children and windows of militants
