**Suburbanizing the Masses** Colin Divall, Winstan Bond, 2017-09-29 This title was first published in 2003 Suburbanizing the Masses examines how collective forms of transport have contributed to the spatial and social evolution of towns and cities in various countries since the mid nineteenth century Divided into two sections the volume develops first the classic tradition on transport and the city public transport s impact on urban development The contextualisation of transport is one important factor in the historical debates surrounding urban development As well as analysing the discourse employed by urban political and business elites in favour of public transport these contributions show the degree to which practice often fell short of ideals The second section tackles the professional paradigms of urban transport the circulation of traffic in cities and the technological modes appropriate to its realization In particular these contributions explore the paradigms held by professional planners and managers and the political classes associated with them From a variety of perspectives Suburbanizing the Masses demonstrates the continuing relevance of socio historical inquiry on the relationship between public transport and urban development By differentiating between the many roles of urban transport in the nineteenth century it confirms that public transport was not directly linked to urban growth and instead often had only a limited effect on the wider urban structure Suburbanizing the Masses forces a reassessment of the received historiography that maintains cheap public transport was essential to the spectacular growth of cities in the nineteenth century

**Manhood Factories** Paula Lupkin,2010 Between the Civil War and the Great Depression the Young Men's Christian Association built more than a thousand community centers across the United States and in major cities around the world Dubbed manhood factories by Teddy Roosevelt these iconic buildings served as athletic centers and residential facilities for a rapidly growing urban male population In Manhood Factories Paula Lupkin goes behind the reserved Beaux Arts facades of typical YMCA buildings constructed in this period to understand the urban anxieties moral agendas and conceptions of masculinity that guided their design construction and use She shows that YMCA patrons like J P Morgan Cyrus McCormick Jr and John Wanamaker hoped to create Christian clubhouses that would counteract the corrupting influences of the city At first designed by leading American architects including James Renwick Jr and William Le Baron Jenney and then

standardized by the YMCA's own building bureau YMCAs combined elements of men's clubs department stores hotels and Sunday schools Every aspect of the building process was informed by this mission Lupkin argues from raising funds selecting the site and the architect determining the exterior style arranging and furnishing interior spaces and representing the buildings in postcards and other printed materials Beginning with the early history of the YMCA and the construction of New York City's landmark Twenty third Street YMCA of 1869 Lupkin follows the efforts of YMCA leaders to shape a modern yet moral public culture and even define class race ethnicity and gender through its buildings Illustrated with many rarely seen photographs maps and drawings *Manhood Factories* offers a fascinating new perspective on a venerable institution and its place in America's cultural and architectural history *Shopping All the Way to the Woods* Rachel S. Gross, 2024-03-26

Cutting Along the Color Line Quincy T. Mills, 2013-10-09 Today black owned barber shops play a central role in African American public life The intimacy of commercial grooming encourages both confidentiality and camaraderie which make the barber shop an important gathering place for African American men to talk freely But for many years preceding and even after the

Civil War black barbers endured a measure of social stigma for perpetuating inequality though the profession offered economic mobility to black entrepreneurs black barbers were obliged by custom to serve an exclusively white clientele Quincy T Mills traces the lineage from these nineteenth century barbers to the bustling enterprises of today demonstrating that the livelihood offered by the service economy was crucial to the development of a black commercial sphere and the barber shop as a democratic social space Cutting Along the Color Line chronicles the cultural history of black barber shops as businesses and civic institutions Through several generations of barbers Mills examines the transition from slavery to freedom in the nineteenth century the early twentieth century expansion of black consumerism and the challenges of professionalization licensing laws and competition from white barbers He finds that the profession played a significant though complicated role in twentieth century racial politics while the services of shaving and grooming were instrumental in the creation of socially acceptable black masculinity barbering permitted the financial independence to maintain public spaces that fostered civil rights politics This sweeping engaging history of an iconic cultural establishment shows that black entrepreneurship was intimately linked to the struggle for equality
