Al-Andalus, Sepharad and Medieval Iberia Ivy Corfis,2010-01-11 The 12 articles of this volume show the many facets of contact in al Andalus and Medieval Iberia reminding us of how contact influenced art and learning in a wide range of fields politics science philosophy music and religion offering views of how contact between societies affects both language stereotype and assimilation examining how war and conflict re define the representation of ideas places and people and demonstrating how representations changed over time through contact and conflict Lessons of the past apply today as al Andalus captures the modern imagination and cultures continue to come into contact across borders which either allow fluid diffusion of ideas or block passage

A History of Spanish Institutions Thomas Baumert,Carmen Paradinas Márquez,Andrés Sánchez Padilla,2020-07-03 Institutions and their history matter and not only because they are crucial elements in explaining a country's socio political evolution but also as determinant factors of economic development wealth and prosperity Usually the history of institutions has been taught the point of view of legal science an approach that made the topic little attractive and often difficult to assimilate for students of other fields such as Economics Business Studies Marketing and others And precisely these groups are the ones that this book addresses It presents in a rigorous yet entertaining way the evolution of Spanish institutions the first human settlements in the peninsula to date and does so explaining the main points in a succinct but well contextualised form For this purpose each chapter

combines the exposition of a given period's historic facts with the description of its most characteristic institutions. Each chapter then complements its content by explaining the history of one notable symbol of Spain: its flag, the different coat of arms, feasts, orders, etcetera. This modular structure together with the presentation of the information according to its degree of relevance allows readers depending on their specific interests and needs to adapt and combine the texts that compose this book as to optimise the results of their study. The modern didactic approach followed by the authors, their understanding of institutions in a broader sense than usual, the extraordinary work of synthesis has produced a basic tool for the study of this subject, one that will give students fruitful results even if they have very heterogeneous backgrounds in Spanish history.

Esther Valbuena **Charlemagne's Defeat in the Pyrenees** Xabier Irujo, 2025-10-01 The Battle of Errozabal/Roncesvalles is the one of the most significant historical events of eighth-century Vasconia and in all Western Europe. The present monograph examines Charlemagne's campaign from the perspective of military history but also as part of a complex socio-political process that began after the Muslim conquest of the Iberian Peninsula in 711 and culminated with the creation of the Kingdom of Pamplona in 824. The battle had major and largely underappreciated consequences for the Carolingian Empire. It also enjoyed a remarkable legacy as the topic of one of the oldest European epic poems, *La Chanson de Roland*. The events that took place in the Pyrenean pass of Errozabal on 15 August 778 defined the development of the Carolingian world and lie at the heart of the early medieval contribution to the later medieval period. *Historia de España: La Restauración (1874-1902)*, 1991 **The Cambridge History of Spanish Literature** David T. Gies, 2004 Publisher Description

Historia de España Antonio Domínguez Ortiz, 1988 *A Brief History of the Spanish Language* David A. Pharies, 2015-11-12 As in the first edition, Pharies debunks in an engaging manner a number of linguistic myths about Spanish orthography, pronunciation, and grammar. Since its publication in 2007, *A Brief History of the Spanish Language* has become the leading introduction to the history of one of the world's most widely spoken languages. Moving from the language's Latin roots to its present-day forms, this concise book offers readers insights into the origin and evolution of Spanish, the historical and cultural changes that shaped it, and its spread around the world. *A Brief History of the Spanish Language* focuses on the most important aspects of the development of the Spanish language, eschewing technical jargon in favor of straightforward explanations. Along the way, it answers many of the common questions that puzzle native speakers and non-native speakers alike, such as: Why do some regions use *t* while others use *vos*? How did the *th* sound develop in Castilian? And why is it *la mesa* but *el agua*? David A. Pharies, a world-renowned expert on the history and development of Spanish, has updated this edition with new research on all aspects of the evolution of Spanish and current demographic information. This book is perfect for anyone with a basic understanding of Spanish and a desire to further explore its roots. It also provides an ideal foundation for further study in any area of historical Spanish linguistics and early Spanish literature. *A Brief History of the Spanish Language* is a grand journey of discovery, revealing in a beautifully compact format the

fascinating story of the language in both Spain and Spanish America *Temario Oposiciones: Geografía e Historia para educación secundaria* Joaquín Riera Ginestar, 2013-10-02 En este manual fruto de la experiencia opositorial y docente presentamos una serie de 72 temas de Geografía Historia Arte y Sociedad que tienen su base en los que se exige a los candidatos a profesores de Educación Secundaria en España. No obstante el material diverso del libro se aleja de la densidad típica de los manuales al uso para los opositores. La voluntad del autor profesor de instituto es hacer accesible tanto a examinandos como a docentes en ejercicio tanto a alumnos de ESO como de Bachillerato y Universidad y al público interesado por las Humanidades en general el conocimiento de unos contenidos del ámbito de las Ciencias Sociales de una manera clara sintética y concisa cercana a la esquematización pero sin caer en la simplificación. El rigor científico nunca es abandonado siendo la bibliografía final prueba de ello. Confiamos que nuestro material ayude a superar pruebas selectivas resuelva dudas y amplíe conocimientos de manera rápida y eficaz para enseñar a alumnos y cualquiera que sienta curiosidad por las Ciencias Sociales El reconocimiento de la humanidad. España, Portugal y América Latina en la génesis de la modernidad Fernando Álvarez-Uría, 2014-11-24 La tesis sostenida en *El reconocimiento de la humanidad* es que el moderno orden secular se sustentó en Occidente en la categoría de género humano una categoría de pensamiento extraña al mundo protestante de los elegidos. Tras el descubrimiento del Nuevo Mundo esta categoría se expandió tanto en España como en América Latina impulsada por la llamada Escuela de Salamanca. Como explicar que esa primera modernidad del sur que fue decisiva en el proceso de formación de un pensamiento racional y científico haya sido mayoritariamente marginada ignorada o infravalorada por los historiadores. Como explicar que los países hispanos en donde presuntamente se produjo ese primer avance de secularización y de democratización se hayan incorporado tardamente al mundo moderno hasta el punto de que la Iglesia Católica sigue aún en la actualidad marcando fuertemente la agenda de los gobiernos. En el libro se abordan estas y otras cuestiones y se argumenta que la formación de la idea de humanidad en íntima relación con las navegaciones y descubrimientos abrieron el camino a la constitución de un nuevo espacio mental a un nuevo sistema de pensamiento que se articuló con específicas condiciones sociales y políticas. La historia intelectual nicamente resulta inteligible a la luz de la historia social. El reconocimiento de la humanidad abrió la caja de Pandora del problema de la legitimidad del poder. Si todos los seres humanos compartimos una naturaleza común por qué unos mandan y otros obedecen por qué unos son ricos y otros pobres de dónde dimana la propiedad la sociedad y el Estado. Las bases para un nuevo pensamiento político al margen del orden teocrático propio de la cristiandad estaban puestas. Frente a las ideas recibidas se avanza en esta obra una nueva línea explicativa de la génesis de la modernidad que centrada especialmente en el siglo XVI atraviesa España Portugal y América Latina **Historia de España: Al-Andalus : musulmanes y cristianos (siglos VIII-XIII)** ,1994 **Quinientos años de un océano llamado Pacífico** Rafael Rodríguez-Ponga, Miguel Ángel Barbero, 2023-09-26 **The Routledge Hispanic Studies Companion to Medieval Iberia** E.
