Stephens American Historical Review *Historiography in Saudi Arabia* Jörg Matthias Determann, 2013-10-25 Saudi Arabia is generally and justifiably viewed as a country with the fewest democratic institutions and the weakest traditions of pluralism in the world It is therefore surprising to learn that at least in one corner of the Saudi world there is a plurality of voices Jörg Matthias Determann brings this element to light by analysing an important field of cultural activity in Saudi Arabia historical writing By exploring the emergence of a plurality of historical narratives in the absence of formal political pluralism Determann seeks to paint a more nuanced picture of Saudi Arabia than has previously been drawn Since the 1920s local tribal Shi'i and dynastic histories have contributed to a growing plurality of narratives diverging from and contesting the histories which focus on the royal family Instead they have emphasized the communities' historical independence from the House of Saud or asserting the communities' importance in Saudi national history In addition to this during the 1970s distinct social and economic histories began to be developed new narratives which have described important historical events evolving from wider social and economic factors rather than resulting from the actions of individual rulers or communities Paradoxically this happened because of the expansion of the Saudi state including state provision of mass education A variety of previously illiterate and relatively poor sections of Saudi society including former Bedouin were thus empowered to produce histories which while conformist for the most part also provided a vehicle for dissenting voices Furthermore Determann argues that this proliferation of alternative histories is also due to globalizing processes such as the spread of the internet It is through this phenomenon that narrative plurality has been facilitated by putting Saudi historians in contact with different ideologies methodologies and source material from abroad In challenging the widely held perception of Saudi Arabia as an irredeemably closed and monolithic society *Historiography in Saudi Arabia* provides a deeper understanding of modern Arab historiography the Saudi state and education and scholarship in the Middle East *The Craft of Research, Third Edition* Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2009-05-15 With more than 400 000 copies now in print *The Craft of Research* is the unrivaled resource for researchers at every level from first year undergraduates to research reporters at corporations and government offices Seasoned researchers and educators Gregory G. Colomb and Joseph M. Williams present an updated third edition of their classic handbook whose first and second editions were written in collaboration with the late Wayne C. Booth *The Craft of Research* explains how to build an argument that motivates readers to accept a claim how to anticipate the reservations of readers and to respond to them appropriately and how to create introductions and conclusions that answer that most demanding question So what The third edition includes an expanded discussion of the essential early stages of a research task planning and drafting a paper The authors have revised and fully updated their section on electronic research emphasizing the need to distinguish between trustworthy sources such as those found in libraries and less reliable sources found with a quick Web search A chapter on warrants has also been thoroughly reviewed to make this difficult subject easier for researchers Throughout the authors have preserved the amiable tone the

reliable voice and the sense of directness that have made this book indispensable for anyone undertaking a research project

The Routledge Handbook of Events Stephen J. Page, Joanne Connell, 2020-04-22 The Routledge Handbook of Events explores and critically evaluates the debates and controversies associated with the rapidly expanding domain of Event Studies. It brings together leading specialists from a range of disciplinary backgrounds to provide a state of the art review on the evolution of the subject. The first edition was a landmark study which examined how event research had evolved and developed from a range of different social science subject areas and disciplines. The Handbook was the first critique of the extent to which the subject had developed into a major area of social science inquiry. This second edition has been fully updated to reflect crucial developments in the field and includes brand new sections on ever important aspects of Event Studies such as anthropology, hospitality, seasonality, knowledge management, accessibility, diversity and human rights as well as new studies on the eventful city and the benefits of events in older life. The book is divided into four inter related sections. Section 1 introduces and evaluates the concept of events. Section 2 critically reviews the relationship between events and other disciplines such as the contribution of economics, psychology and geography to the critical discourse of Event Studies. Section 3 focuses on the business, operational and strategic management of events while the final section crucially focuses on critical events as a new paradigm within the burgeoning literature on Events. It offers the reader a comprehensive and critical synthesis of this field conveying the latest thinking associated with events research, edited by two of the leading scholars in the field. The text will provide an invaluable resource for all those with an interest in Events Studies, encouraging dialogue that will span across disciplinary boundaries and other areas of study. It is an essential guide for anyone interested in events research.

Modernity, Metatheory, and the Temporal-Spatial Divide Michael Krimm, 2015-03-27 This book is about how modernity affects our perceptions of time and space. Its main argument is that geographical space is used to control temporal progress by channeling it to benefit particular political, economic and social interests or by halting it altogether. By incorporating the ancient Greek myth of the Titanomachy as a conceptual metaphor to explore the elemental ideas of time and space, the author argues that hegemonic interests have developed spatial hierarchy into a comprehensive system of technocratic monoculture which interrupts temporal development in order to maintain exclusive power and authority. This spatial stasis is reinforced through the control of historical narratives and geographical settings. While increasingly comprehensive, the author argues that this state of affairs can best be challenged by focusing on the development of unmappable places which presently exist within the socio spatial matrix of the modern world.

Buddhist Historiography in China John Kieschnick, 2022-07-29 Winner 2023 Toshihide Numata Book Award Numata Center for Buddhist Studies at the University of California Berkeley Since the early days of Buddhism in China monastics and laity alike have expressed a profound concern with the past In voluminous historical works they attempted to determine as precisely as possible the dates of events in the Buddha's life seeking to iron out discrepancies in varying accounts and pinpoint when he delivered which sermons Buddhist writers chronicled the history of the Dharma in China as well compiling biographies of eminent monks and nuns and detailing the rise and decline in the religion's fortunes under various rulers They searched for evidence of karma in the historical record and drew on prophecy to explain the past John Kieschnick provides an innovative expansive account of how Chinese Buddhists have sought to understand their history through a Buddhist lens Exploring a series of themes in mainstream Buddhist historiographical works from the fifth to the twentieth century he looks not so much

Africa and the First World War De-Valera NYM Botchway,Kwame Osei Kwarteng,2018-10-26 The First World War was a widespread conflagration in world history which despite its European origins had enormous effects throughout the world Fettered to European politics and diplomacy through colonialism Africa could not claim a position of neutrality meaning that it mobilised human and natural resources to support the imperial war effort Fighting both within and outside Africa colonised Africans who were compelled or coaxed by the colonial regimes of the warring European countries fought Europeans and Africans too The soldiers fought with great dedication and contributed significantly to successes attained by the belligerent European colonialists Similarly African non combatants like carriers brought zeal and enthusiasm to difficult wartime tasks The impact of the war on Africa was immense with far reaching consequences in specific colonies and touched the lives of all Africans under colonial rule Although the continent s connections to the war were immense and diverse these experiences are not widely known among scholars and the general public This is because over the years most studies and commemorative events of the war have centred on the European theatre of the war and its outcomes This book brings together interesting essays written by scholars of African history society and military about African experiences of the war It complements and problematises some key themes on Africa and the First World War and offers a stimulating historiographical excursion providing possibilities for reconsidering normative conclusions on the war The volume will be of interest to general readers as well as students and researchers in different areas of scholarship including African history war studies postcolonial studies cultural studies labour history and the history of memory among others

Egalitarian Sublime Williams James Williams, 2019-09-11 We call sublime those things and experiences supposed to be the very best But what if the best actually leads to inequality and exploitation Williams critiques the sublime over its long history and in recent returns to sublime nature and technologies Deploying a new critical method that draws on process philosophy he shows how the sublime has always led to inequality This holds true even where it underpins ideas of cosmopolitan enlightenment and even when refined

by Burke Kant Nietzsche Schopenhauer and Zizek Against the unjust legacies of the traditional sublime James Williams defends a new anarchist sublime multiple self destructive and temporary opposed to any idea of highest value to be shared by all but always imposed on the powerless **The Columbian Covenant: Race and the Writing of American History** James Carson, 2014-12-18 This provocative analysis of American historiography argues that when scholars use modern racial language to articulate past histories of race and society they collapse different historical signs of skin color into a transhistorical and essentialist notion of race that implicates their work in the very racial categories they seek to transcend
