Ethics and the Limits of History Writing Petre Gura Des guerres id ologiques des identit s fragiles et de quelques autres dilemmes de la culture roumaine Florin Turcanu Un moment roumain Paris 1949 Bogdan Iancu Dreptul public ntre tragedie si melodrama *A History of the Work Concept* Agamenon R. E. Oliveira, 2013-11-19 This book traces the history of the concept of work from its earliest stages and shows that its further formalization leads to equilibrium principle and to the principle of virtual works and so pointing the way ahead for future research and applications The idea that something remains constant in a machine operation is very old and has been expressed by many mathematicians and philosophers such as for instance Aristotle Thus a concept of energy developed Another important idea in machine operation is Archimedes lever principle In modern times the concept of work is analyzed in the context of applied mechanics mainly in Lazare Carnot mechanics and the mechanics of the new generation of polytechnical engineers like Navier Coriolis and Poncelet In this context the word work is finally adopted These engineers are also responsible for the incorporation of the concept of work into the discipline of economics when they endeavoured to combine the study of the work of machines and men together

Heidegger Thomas Sheehan, 2011-12-31 Many people consider Martin Heidegger the most important German philosopher of the twentieth century He is indisputably controversial and influential Although much has been written about Heidegger this may be the best single volume covering his life career and thought For all its breadth and complexity Heidegger s perspective is quite simple he is concerned with the meaning of Being as disclosure Heidegger s life was almost as simple He was a German professor except for a brief but significant period in which he supported the Nazi regime While that departure from philosophy continues to haunt his name and work one must question whether his thought from 1912 to 1976 should be measured by the yardstick of his politics from May 1933 through February 1934 Th is anthology addresses his complex but simple thought and his simple but complex life In a real sense Sheehan claims there is no content to Heidegger s topic and legacy only a method But method must not be taken to mean a technique or procedure for philosophical thinking Rather the topic of Heidegger s thought and his pursuit of that topic the what and the how are one and the same thing Heidegger writes Alles ist Weg Everything is way and man s Being is to be on the way in essential movement Heidegger argues in our essence we humans are the topic and the point is not to be led there so much as to come to know what we already know and to become what we already are This brilliant collection confirms this truism and is an excellent introduction to the work of this seminal thinker Chinese Studies in the History and Philosophy of Science and Technology Fan Dainian, Robert S. Cohen, 2013-03-09 The articles in this collection were all selected from the first five volumes of the Journal of Dialectics of Nature published by the Chinese Academy of Sciences between 1979 and 1985 The Journal was established in 1979 as a comprehensive theoretical publication concerning the history philosophy and sociology of the natural sciences It began publication as a response to China s reform particularly the policy of opening to the outside world Chinese scholars began to undertake distinctive original research in these fields This collection provides a cross section of

their efforts during the initial phase To enable western scholars to understand the historical process of this change in Chinese academics Yu Guangyuan's On the Emancipation of the Mind and Xu Liangying's Essay on the Role of Science and Democracy in Society have been included in this collection Three of the papers included on the philosophy of science are discussions of philosophical issues in cosmology and biology by scientists themselves The remaining four are written by philosophers of science and discuss information and cognition homeostasis and Chinese traditional medicine the I Ching Yi Jing and mathematics etc Papers have been selected on the history of both classical and modern science and technology the most distinctive of which are macro comparisons of the development of science in China and the west Some papers discuss the issue of the demarcation of periods in the history of science the history of ancient Chinese mathematics astronomy metallurgy machinery medicine etc Others discuss the history of modern physics and biology the history of historiography of science in China and the history of regional development of Chinese science and technology Also included are biographies of three post eighteenth century Chinese scholars Li Shanlan 1811-1882 Hua Hengfang 1833-1902 and Cai Yuanpei 1868-1940 who contributed greatly to the introduction of western science and scholarship to China In addition three short papers have been included introducing the interactions between Chinese scholars and three great western scientists Niels Bohr Norbert Wiener and Robert A Millikan

History of the Concept of Mind Paul S. Macdonald, 2017-09-29 In the 20th century theorists of mind were almost exclusively concerned with various versions of the materialist thesis but prior to current debates accounts of soul and mind reveal an extraordinary richness and complexity which bear careful and impartial investigation This book is the first single authored comprehensive work to examine the historical linguistic and conceptual issues involved in exploring the basic features of the human mind from its most remote origins to the beginning of the modern period MacDonald traces the development of an armature of psychical concepts from the Old Testament and Homer's works to the 18th century advocacy of an empirical science of the mind Along the way detailed attention is paid to the Presocratics Plato Aristotle the Stoics and Epicurus before turning to look at the New Testament Neoplatonism Augustine Medieval Islam Aquinas and Dante Treatment of Renaissance theories is followed by an unusual perhaps unique chapter on the words soul and mind in English literature from Chaucer to Shakespeare the story then rejoins the mainstream with analyses of Descartes Spinoza Leibniz Hobbes Locke Berkeley and Hume Chapter focused bibliographies

A History of the Concept of God Daniel A. Dombrowski, 2016-02-01 Daniel A Dombrowski explores the history of the concept of God from the perspective of neoclassical or process theism His neoclassical approach assuages the current crisis in philosophical theism caught between a defense of classical theism and assertions of religious skepticism Instead the work offers Charles Hartshorne's notion of a God who always evolves quite unlike the allegedly perfect figure of more traditional and increasingly unsatisfactory accounts Dombrowski surveys the classical theists and their roots in ancient Greek philosophy before turning to contributions from the sixteenth through twentieth centuries ultimately discussing twenty three thinkers The key figures

in this history are Plato who ironically provided the philosophical basis both for classical and neoclassical concepts and three great figures in process theism Henri Bergson Alfred North Whitehead and Hartshorne The concept of God has a rich past this book argues that it can have a rich future as well [UGC NET History Solved Previous Year Papers | 25+ Papers | 2012 Onwards | On Page Solutions](#) Mocktime Publication, UGC NET History Solved Previous Year Papers 25 Papers 2012 Onwards On Page Solutions

Jewish History and Jewish Memory Yosef Hayim Yerushalmi, 1998 Publication of Yosef Yerushalmi's *Zakhor* in 1982 inspired a generation of scholarly inquiry into historical images and myths the construction of the Jewish past and the making and meaning of collective memory Here eminent scholars in their respective fields extend the lines of his seminal study into topics that range from medieval rabbinics homiletics kabbalah and Hasidism to antisemitism Zionism and the making of modern Jewish identity Essays are clustered around four central themes historical consciousness and the construction of memory the relationship between time and history in Jewish thought the demise of traditional forms of collective memory and the writing of Jewish history in modern times

Walter Benjamin's Other History Beatrice Hanssen, 2000-12-04 In this study Beatrice Hanssen unlocks the philosophical and ethical dimensions of the *Trauerspiel* study showing how its thematics persisted well into the later writings of the thirties For by introducing the materialistic category of natural history in *The Origin of German Tragic Drama* Benjamin not only criticized idealistic conceptions of history writing but also expressed an ethico theological call for another kind of history one no longer anthropocentric in nature This profound critique of historical thinking Hanssen shows went hand in hand with a radical de limitation of the human subject informed by his interest in questions about ethics the law and justice Through an analysis of the seemingly innocuous figures of stones animals and angels that are scattered throughout his writings Hanssen reconstructs the often neglected ethical dimension of his historical thought In the course of doing so she not only places Benjamin's work in the context of contemporaries such as Adorno Cohen Lukacs Kafka Kraus and Heidegger but also demonstrates the persistence of Benjaminian themes in contemporary philosophy and critical theory

Times of History, Times of Nature Anders Ekström, Staffan Bergwik, 2022-02-11 As climate change becomes an increasingly important part of public discourse the relationship between time in nature and history is changing Nature can no longer be considered a slow and immobile background to human history and the future can no longer be viewed as open and detached from the past *Times of History Times of Nature* engages with this historical shift in temporal sensibilities through a combination of detailed case studies and synthesizing efforts Focusing on the history of knowledge media theory and environmental humanities this volume explores the rich and nuanced notions of time and temporality that have emerged in response to climate change

Memory, History, Justice in Hegel Angelica Nuzzo, 2012-04-05 This reconstruction of the work of dialectical memory in Hegel raises the fundamental question of the principle that presides on the articulation of history and indicates in Hegel's philosophy two alternative models of conceiving history one that grounds history on ethical memory the other that sees justice as the moving

principle of history **Infancy and History** Giorgio Agamben, 1993 How and why did experience and knowledge become separated Is it possible to talk of an infancy of experience a dumb experience For Walter Benjamin the poverty of experience was a characteristic of modernity originating in the catastrophe of the First World War For Giorgio Agamben the Italian editor of Benjamin's complete works the destruction of experience no longer needs catastrophes daily life in any modern city will suffice Agamben's profound and radical exploration of language infancy and everyday life traces concepts of experience through Kant Hegel Husserl and Benveniste In doing so he elaborates a theory of infancy that throws new light on a number of major themes in contemporary thought the anthropological opposition between nature and culture the linguistic opposition between speech and language the birth of the subject and the appearance of the unconscious Agamben goes on to consider time and history the Marxist notion of base and superstructure via a careful reading of the famous Adorno Benjamin correspondence on Baudelaire's Paris and the difference between rituals and games Beautifully written erudite and provocative these essays will be of great interest to students of philosophy linguistics anthropology and politics **Liberal Democracy as the End of History** Christopher Hughes, 2012-02-20 Francis Fukuyama claims that liberal democracy is the end of history This book provides a theoretical re-examination of this claim through postmodernist ideas The book argues that postmodern ideas provide a valuable critique to Fukuyama's thesis and poses the questions can we talk about a universal and teleological history a universal human nature or an autonomous individual It addresses whether postmodern theories concerning the movement of time what it means to be human and what it means to be an individual subject can be accommodated within a theory of a history that ends in liberal democracy The author argues that incorporating elements of postmodern thought into Fukuyama's theory makes it possible to produce a stronger and more compelling account of the theory that liberal democracy is the end of history The result of this is to underpin Fukuyama's theory with a more complex understanding of the movement of time the human and the individual and to show that postmodern concepts can paradoxically be used to strengthen Fukuyama's theory that the end of history is liberal democracy The book will be of interest to students and scholars of political theory postmodernism and the work of Francis Fukuyama **Universal Natural History and Theory of Heaven** Immanuel Kant, A new 2024 translation of Kant's famous 1755 Universal Natural History and Theory of Heaven original German title Allgemeine Naturgeschichte und Theorie des Himmels from the original German manuscript This new edition contains an Afterword by the translator a timeline of Kant's life and works and a helpful index of Kant's key concepts and intellectual rivals This translation is designed for readability rendering Kant's enigmatic German into the simplest equivalent possible and removing the academic footnotes to make this critically important historical text as accessible as possible to the modern reader Immanuel Kant's Universal Natural History and Theory of Heaven is one of his first Philosophic works and puts on full display his impressive intellect Even though he was not a scientist Kant's Cosmogonic theories are strikingly accurate when compared to the theories of his peers Here he postulates the Nebular

Hypothesis on the formation and evolution of planetary systems which is today the broadly accepted theory of planet formation He was also correct in his assumption which was unsubstantiated by observation at the time that our Milky Way galaxy was only one of countless which was only confirmed by the Hubble Telescope in the 1920 s His theories about Exoplanets were likewise only recently confirmed by the Kepler missions This is the epicenter of the chaos of the Enlightenment and Kant s theories are surprisingly rational and accurate His philosophic commentaries here are a foreshadowing of his later monumental works of Enlightenment Epistemology
