Satellite Telemetry Steve G. Fancy, 1988 The U S Fish and Wildlife Service and the Alaska Department of Fish and Game have cooperated since 1984 to develop and evaluate satellite telemetry as a means of overcoming the high costs and logistical problems of conventional VHF Very High Frequency radiotelemetry systems Detailed locational and behavioral data on caribou polar bears and other large mammals in Alaska have been obtained using the Argos Data Collection and Location System DCLS This report includes documentation for computer software packages for processing Argos data and presents developments in transmitter design data retrieval using a local user terminal computer software and sensor development and calibration

Satellites for Atmospheric Sciences 1 Thierry Phulpin, Didier Renaut, Herve Roquet, Claude Camy-Peyret, 2024-01-31 How can atmospheric variables such as temperature wind rain and ozone be measured by satellites How are these measurements taken and what has been learned since the first measurements in the 1970s What data are currently available and what data are expected in the future The first volume of this encyclopedic book answers these questions by reporting the history of satellite meteorology and addresses how national and international agencies define coordinated programs to cover user needs It also presents the principles of satellite remote sensing to deliver products suited to user requirements This book is completed by a glossary and appendices with a list of supporting instruments already in use

The Oxford Handbook of the History of Modern Cosmology Helge Kragh, Malcolm Longair, 2019-03-06 Scientific and popular literature on modern cosmology is very extensive however scholarly works on the historical development of cosmology are few and scattered The Oxford Handbook of the History of Modern Cosmology offers a comprehensive and authoritative account of the history of cosmology from the late nineteenth century to the early twenty first century It provides historical background to what we know about the universe today including not only the successes but also the many false starts Big Bang theory features prominently but so does the defunct steady state theory The book starts with a chapter on the pre Einstein period 1860 1910 and ends with chapters on modern developments such as inflation dark energy and multiverse hypotheses The chapters are organized chronologically with some focusing on theory and others more on observations and technological advances A few of the chapters discuss more general ideas relating to larger contexts such as politics economy philosophy and world views

Internet Resources for Professional Astronomy Mark Kidger, Mark Richard Kidger, Ismael Pirez-Fournon, Francisco Sánchez, 1999-09-28 Comprehensive guide to astronomy on the internet written for astronomers and astrophysicists

Resource Publication , 1988 **Resource Publication - United States, Fish and Wildlife Service** , 1975 **Dangerous Allies** Malcolm Fraser, Cain Roberts, 2016-04-12 Australia has always been reliant on great and powerful friends for its sense of national security and for direction on its foreign policy first on the British Empire and now on the United States Australia has actively pursued a policy of strategic dependence believing that making a grand bargain with a powerful ally was the best policy to ensure its security and prosperity Dangerous Allies

examines Australia's history of strategic dependence and questions the continuation of this position. It argues that international circumstances in the world and in the Western Pacific especially now make such a policy highly questionable. Since the fall of the Soviet Union the United States has also changed dramatically making it less relevant to Australia and a less appropriate ally on which Australia should rely. Malcolm Fraser argues that Australia should adopt a much greater degree of independence in foreign policy and that we should no longer merely follow other nations into wars of no direct interest to Australia or Australia's security. He argues for an end to strategic dependence and for the timely establishment of a truly independent Australia.
