Bibliotheca Americana: Books on America in Spanish Maggs Bros, 1927 Bilingualism and cognitive control
Judith F. Kroll, Ingrid Christoffels, Teresa Bajo, Research on bilingual language processing reveals an important role for control processes that enable bilinguals to negotiate the potential competition across their two languages The requirement for control that enables bilinguals to speak the intended language and to switch between languages has also been suggested to confer a set of cognitive consequences for executive function that extend beyond language to domain general cognitive skills Many recent studies have examined aspects of how cognitive control is manifest during bilingual language processing how individual differences in cognitive resources influence second language learning and performance and the range of cognitive tasks that appear to be influenced by bilingualism However not all studies demonstrate a bilingual advantage in all tasks that tap into cognitive control Indeed many questions are unanswered that are critical to our understanding of bilingual control What aspects of cognitive control are enhanced for proficient bilinguals How are individual differences in cognitive control related to language acquisition proficiency or professional translation skill How does the language environment affect concurrent processing How exactly does language control come about in tasks such as speech production switching between languages or translation When and how does inhibitory processing support language control The focus of this Research Topic is on executive control and bilingualism The goal is to have a broad scope that includes all of these issues We seek empirical contributions using different methodologies including behavioral computational and neuroscience approaches We also welcome theoretical contributions that provide detailed discussion of models or mechanisms that account for the relationship between bilingualism and cognitive control We aim to provide a platform for new contributions that represent a state of the art overview of approaches to cognitive control in bilingualism We hope that this Research Topic will enable the field to formulate more precise hypotheses and causal models on the relation between individual differences cognitive control and bilingual language processing The Spanish Conquest in America,... Sir Arthur Helps, 1857 **Bibliotheca Americana Et Philippina: Books on America in Spanish** Maggs Bros, 1927 *The Spanish Conquest in America: bk. 12. Nazi Holocaust Vibrant Jewish communities have deep roots in countries such as Argentina Mexico Guatemala and Chile though members of these communities have at times experienced the pain of being the other ostracized by Christian society and even tortured by military governments While commonalities of religion and culture link these communities across time and national boundaries the Jewish experience in Latin America is irreducible to a single perspective Only a multitude of voices can express it This anthology gathers fifteen essays by historians creative writers artists literary scholars anthropologists and social scientists who collectively tell the story of Jewish life in Latin America Some of the pieces are personal tales of exile and survival some explore Jewish humor and its role in amalgamating histories of past and present and others look at serious episodes of political persecution and military dictatorship As a whole these challenging essays ask what Jewish identity is in Latin America and how it changes throughout history They leave us to ponder the tantalizing question Does being Jewish in the Americas speak to a transitory history or a more permanent one
