Aslaksen,2023-02-17 This book covers the work of Erik W Aslaksen who continues to develop the view of society and its evolution published in earlier work The Social Bond Springer 2018 The Stability of Society Springer 2020 and Measures of Social Evolution Springer 2021 bringing together core material of that work with the results of recent investigations in order to present the evolution of society as an integrated and continuous story leading right up to the present time A story of human action driven by our beliefs desires and an ideology arising out of our ability to transform and exploit our environment through the development and application of technology The distinguishing feature of the work is the treatment of society as an information processing system and applying the system methodology for handling complexity as it is applied e g in engineering This focus on information is particularly pertinent in the current circumstances where the world has arrived at a

critical point in its history through the conjunction of a number of issues that appear to be spiralling out of control Global warming and the associated climate change the destruction of our environment through such processes as land clearing and industrialisation with associated loss of biodiversity the rapidly increasing visibility of the inequality in the quality of life with associated tensions and above all the determination of the US led Western alliance to cling to its hegemonial role apparently at all cost With the sophistication and proliferation of nuclear weapons the latter has the potential to bring on the end of civilisation as we know it The resolution of any of these issues depends on the information available to all parties involved and hence the availability and quality of information is seen as the crucial and overarching issue of the present time A number of aspects of this issue including the role of education economic inequality and the control of the media are treated in some detail and proposals for some small steps in the right direction are put forward *Human Adaptability, Student Economy Edition* Emilio Moran, 2018-10-03 This book focuses on mechanisms of human adaptability It integrates findings from ecology physiology social anthropology and geography around a set of problems or constraints posed by human habitats

Sitala Mitra Desai, 2025-02-01 When India emerged as the world's vaccine manufacturer during the pandemic few knew an even more startling truth the concept of vaccination itself originated in ancient India centuries before Europe This eyeopening narrative shatters longheld beliefs about medical history Through a warm witty story of a modern Indian family Shitala uncover how traditional Hindu practices of smallpox inoculation were observed and quietly appropriated by colonial powers This isn't just about vaccination it's about how colonial narratives systematically erased Indian contributions to one of humanity's greatest achievements Written with engaging simplicity this short but powerful book brings alive a forgotten chapter of medical history Perfect for young adults and anyone interested in understanding how the past shapes our present it's a mustread that will make you question everything you thought you knew about the history of medicine This is more than a historical correction It is a gamechanging perspective on India's erased role in one of humanity's greatest medical breakthroughs
