The Wrong Stuff John Strausbaugh, 2024-06-04 A witty deeply researched history of the surprisingly ramshackle Soviet space program and how its success was more spin than science In the wake of World War II with America ascendant and the Soviet Union devastated by the conflict the Space Race should have been over before it started But the underdog Soviets scored a series of victories starting with the 1957 launch of Sputnik and continuing in the years following that seemed to achieve the impossible It was proof it seemed that the USSR had manpower and collective will that went beyond America's material advantages They had asserted themselves as a world power But in *The Wrong Stuff* John Strausbaugh tells a different story These achievements were amazing yes but they were also PR victories as much as scientific ones The world saw a Potemkin spaceport the internal facts were much sloppier less impressive more dysfunctional The Soviet supply chain was a disaster and many of its machines barely worked The cosmonauts aboard its iconic launch of the Vostok 1 rocket had to go on a special diet and take off their space suits just to fit inside without causing a failure Soviet scientists under intense government pressure had essentially made their rocket out of spit and band aids and hurried to hide their work as soon as their worldwide demonstration was complete With a witty eye for detail and a gift for storytelling John Strausbaugh takes us behind the Iron Curtain and shows just how little there was to find there
