Lost Enlightenment S. Frederick Starr, 2013-10-06 The forgotten story of Central Asia's enlightenment its rise fall and enduring legacy In this sweeping and richly illustrated history S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds remarkable figures who built a bridge to the modern world Because nearly all of these figures wrote in Arabic they were long assumed to have been Arabs In fact they were from Central Asia drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan and from the easternmost province of Iran through Xinjiang China Lost Enlightenment recounts how between the years 800 and 1200 Central Asia led the world in trade and economic development the size and sophistication of its cities the refinement of its arts and above all in the advancement of knowledge in many fields Central Asians achieved signal breakthroughs in astronomy mathematics geology medicine chemistry music social science philosophy and theology among other subjects They gave algebra its name calculated the earth's diameter with unprecedented precision wrote the books that later defined European medicine and penned some of the world's greatest poetry One scholar working in Afghanistan even predicted the existence of North and South America five centuries before Columbus Rarely in history has a more impressive group of polymaths appeared at one place and time No wonder that their writings influenced European culture from the time of St Thomas Aquinas down to the scientific revolution and had a similarly deep impact in India and much of Asia Lost Enlightenment chronicles this forgotten age of achievement seeks to explain its rise and explores the competing theories about the cause of its eventual demise Informed by the latest scholarship yet written in a lively and accessible style this is a book that will surprise general readers and specialists alike

The Bukharan Crisis Scott Levi, 2020-05-26 In the first half of the eighteenth century Central Asia's Bukharan Khanate descended into a crisis from which it would not recover Bukharans suffered failed harvests and famine a severe fiscal downturn invasions from the north and the south rebellion and then revolution To date efforts to identify the cause of this crisis have focused on the assumption that the region became isolated from early modern globalizing trends The Bukharan Crisis exposes that explanation as a flawed relic of early Orientalist scholarship on the region In its place Scott Levi identifies multiple causal factors that underpinned the Bukharan crisis Some of these were interrelated and some independent some unfolded over long periods while others shocked the region more abruptly but they all converged in the early eighteenth century to the detriment of the Bukharan Khanate and those dependent upon it Levi applies an integrative framework of analysis that repositions Central Asia in recent scholarship on multiple themes in early modern Eurasian and world history
