Farmers Are A Dying Breed Dr. Sahadeva Das, 2018-01-01 Every 5 years the United States Department of Agriculture sends all the farmers a survey called the Agricultural Census And every five years once all the results are tallied and without fail an alarm bell goes off The national average age in farming keeps climbing up and the trend is ever upward Farmers around the world are getting old Where have all the young farmers gone Why youngsters are leaving the family farms and showing no interest in what s supposed to be the oldest and the noblest profession This is because small scale agriculture is being deliberately stifled Pro corporate policies are making farming non viable and farmers are left with no other choice but to quit Farmers are a dying breed and family farming will become history soon **History of Walworth**
