**Louise Brown** Louise Brown, Martin Powell, 2015-01-08 At 11 47 on July 25 1978 Louise Brown was the first person ever to be born through science rather than as the result of two people having sex The birth was hailed as a miracle by the world's media making her instantly famous Her birth created shockwaves for the church politicians and the medical profession Louise grew up at the centre of the debate about the morality of In Vitro Fertilisation IVF while also being a beacon of hope to millions of childless couples throughout the world For the first time Louise tells the story of her world changing birth and its impact on her life Jacket *My Life as the World's First Test-tube Baby* Louise Brown, Martin Powell, 2015 At 11 47 on July 25 1978 Louise Brown was the first person ever to be born through science rather than as the result of two people having sex The birth was hailed as a miracle by the world's media making her instantly famous Her birth created shockwaves for the church politicians and the medical profession Louise grew up at the centre of the debate about the morality of In Vitro Fertilisation IVF while also being a beacon of hope to millions of childless couples throughout the world For the first time Louise tells the story of her world changing birth and its impact on her life Jacket *Presenting the First Test-Tube Baby* Fiona Kisby Littleton, Susan Bewley, James Owen Drife, 2023-03-16 Presenting for the first time in original detail Drs Edwards and Steptoe's breakthroughs leading to the birth of Louise Brown **Bristol From the Post and Press** Maurice Fells, 2017-09-15 A history of Bristol told through the archives of the Evening Post and Western Daily Press **Adoption and Surrogate Pregnancy** Faith Merino, 2010 Adoption and surrogate pregnancy are the two most realistic options currently available for millions of couples unable to have biological children In the past decade international adoption has become popular among those who wish to avoid the wait associated with adopting domestically Yet because of unique political economic and cultural circumstances within individual countries international adoption is fraught with legal controversies and difficulties Surrogate pregnancy is a relatively new and inherently complicated alternative With few regulations to guide the process and protect those involved however countries struggle to address its ethical and moral questions in addition to the legal political cultural and environmental ramifications Providing a historic overview and defining the key issues Adoption and Surrogate Pregnancy examines the laws related to adoption and surrogate pregnancy in five countries the United States China India the United Kingdom and Guatemala The discussion covers the ways in which adoption and surrogate pregnancy overlap and influence each other the nuances that further complicate matters and the controversies surrounding both issues such as fears of exploitation class discrimination socially unwanted children same sex parenthood and the difficulties of governing the family unit Allowing students to compare the subjects from the perspectives of different countries and cultures this balanced and objective volume sheds light on the way these issues affect the global community **From Anesthesia to X-Rays** Christiane Nockels Fabbri, 2016-11-28 Easy to read and to use this A to Z mini encyclopedia covers the most important medical innovations of the last 200 years Medical innovation is an extremely

important topic and one to which relatively little study has been devoted This volume is designed to introduce readers to the history and development of key advances in the science and practice of medicine It explores issues in medical history and provides perspective on contemporary scientific research and innovation It also provides a backdrop against which to evaluate current headlines such as the discoveries of live samples of smallpox virus in an unused storage room at the National Institutes of Health NIH and incidents of bubonic plague in China and Colorado Although the entries in this single volume resource describe how each innovation works this is not intended as a technical text Instead the focus is on the context in which each innovation was developed and on its lasting importance in the field of medicine Through these fascinating accounts readers will be able to trace the evolution and legacy of key innovations and to see how other sectors of society such as industry and the military have affected and been affected by advances in the field of medicine

**Reproductive Technology** Erin L. McCoy, Jon Sterngass, 2019-07-15 Millions of people around the world suffer from infertility For them the prospect of having a baby may have seemed unattainable just a century ago However new technologies have not only made it possible for more people to have children but have also helped parents assess the health of their babies before they're even born Treatments include artificial insemination in vitro fertilization preimplantation genetic diagnosis and amniocentesis However these new treatments have also sparked controversies involving the boundaries of government control private choice religious belief and parental wishes This book helps readers explore the many sides of this complicated issue Sidebars full color photographs and a detailed glossary support the narrative

*Transnational Reproduction* Daisy Deomampo, 2016-09-27 *Transnational Reproduction* traces the relationships among Western aspiring parents Indian surrogates and egg donors from around the world In the early 2010s India was one of the top providers of surrogacy services in the world Drawing on interviews with commissioning parents surrogates and egg donors as well as doctors and family members Daisy Deomampo argues that while the surrogacy industry in India offers a clear example of stratified reproduction the ways in which political economic and social forces structure the conditions under which women carry out physical and social reproductive labor it also complicates that concept as the various actors in this reproductive work struggle to understand their relationships to one another The book shows how these actors make sense of their connections illuminating the ways in which kinship ties are challenged transformed or reinforced in the context of transnational gestational surrogacy The volume revisits the concept of stratified reproduction in ways that offer a more robust and nuanced understanding of race and power as ideas about kinship intersect with structures of inequality It demonstrates that while reproductive actors share a common quest for conception they make sense of family in the context of globalized assisted reproductive technologies in very different ways In doing so Deomampo uncovers the specific racial reproductive imaginaries that underpin the unequal relations at the heart of transnational surrogacy

*The Proteus Effect* Ann B. Parson, 2004-10-02 Stem cells could be the key that unlocks cures to scores of diseases and illnesses Their story is at once compelling controversial and remarkable Part detective story part medical history *The Proteus Effect* recounts the

events leading up to the discovery of stem cells and their incredible potential for the future of medicine What exactly are these biological wonders these things called stem cells They may be tiny but their impact is earth shaking generating excitement among medical researchers and outright turmoil in political circles They are reported to be nothing short of miraculous But they have also incited fear and mistrust in many Indeed recent research on stem cells raises important questions as rapidly as it generates new discoveries The power of stem cells rests in their unspecialized but marvelously flexible nature They are the clay of life waiting for the cellular signal that will coax them into taking on the shape of the beating cells of the heart muscle or the insulin producing cells of the pancreas With a wave of our medical magic wand it is possible that stem cells could be used to effectively treat even cure diseases such as Parkinson's disease diabetes heart disease autoimmune disorders and even baldness But should scientists be allowed to pick apart four day old embryos in order to retrieve stem cells And when stem cells whisper to us of immortality they can divide and perpetuate new cells indefinitely how do we respond Stem cells are forcing us to not only reexamine how we define the beginning of life but how we come to terms with the end of life as well Meticulously researched artfully balanced and engagingly told Ann Parson chronicles a scientific discovery in progress exploring the ethical debates describing the current research and hinting of a spectacular new era in medicine The Proteus Effect is as timely as it is riveting

**IVF and Assisted Reproduction** Sarah Ferber, Nicola J. Marks, Vera Mackie, 2020-12-17 This is the first transnational history of IVF and assisted reproduction It is a key text for scholars and students in social science history science and technology studies STS cultural studies and gender and sexuality studies and a resource for journalists policymakers and anyone interested in assisted reproduction IVF was seen as revolutionary in 1978 when the first two IVF babies were born in the UK and India Assisted reproduction has now contributed to the birth of around ten million people The book traces the work of IVF teams as they developed new techniques and laid the foundations of a multi-billion dollar industry It analyses the changing definitions and experience of infertility the markets for eggs and children through surrogacy cross border reproductive treatment and the impact of regulation Using interviews with leading IVF figures archives media reports and the latest science it is a vital addition to the field of reproduction studies This pathbreaking account of the global forces behind the rapid rise of the fertility industry is the first to offer such a truly comprehensive overview of this hugely important topic Sarah Franklin Chair of Sociology University of Cambridge In this compelling overview of one of the most significant technological and social interventions ever developed the cultural and scientific imaginaries of assisted reproduction meet the obdurate histories of laboratory experiments biological materials and personal

quests It is an indispensable read for anyone interested in IVF and assisted reproduction Andrea Whittaker Professor of Anthropology Monash University      **Biotechnology** David P. Clark, Nanette J. Pazdernik, 2011-01-06 Now available with the most current and relevant journal articles from Cell Press Biotechnology Academic Cell Update Edition approaches modern biotechnology from a molecular basis which grew out of the increasing biochemical understanding of physiology Using straightforward less technical jargon Clark and Pazdernik manage to introduce each chapter with a basic concept that ultimately evolves into a more specific detailed principle This up to date text covers a wide realm of topics including the forensics used in crime scene investigations the burgeoning field of nanobiotechnology bioethics and other cutting edge topics in today's world of biotechnology Basic concepts followed by more detailed specific applications with clear color illustrations of key topics and concepts      **Outer Origin** Laura Johnson Dahlke, 2024-04-25 Outer Origin examines the individual social and spiritual implications of ectogenesis also known as artificial womb technology Formerly considered the topic of science fiction such devices are currently being developed and will soon be a medical reality This book offers readers information on the status of this technology and considers the ways in which it may one day fully replace human gestation Ectogenesis has previously been assessed with the future child in mind but this book instead envisions what it might mean for women It explores the value of pregnancy and childbirth in the twenty first century and questions the notion that artificial wombs will lead to full equality of the sexes Outer Origin seeks to elevate the maternal experience by reflecting on the meaning of reproductive technology in our lives People everywhere must ponder the significance of what has heretofore been their most common link shared natality and birth If not Homo sapiens will enter a deep dive into the unknown that of not being of woman born      Reproductive Issues in America Janna Merrick, Robert H. Blank, 2003-08-06 A balanced and thoughtful analysis of human reproduction issues in the United States with emphasis on the ethical and policy implications of cutting edge reproductive technologies Few subjects are as divisive and partisan as the issues surrounding the propagation of the human species This thorough examination covers the full scope of the debates and offers an up to the minute survey of the controversial technologies that are at the heart of reproductive rights in the United States The areas explored range from abortion and sterilization to fetal research and human cloning The moral societal and public policy implications of each subject are examined thoroughly with emphasis on those areas where cutting edge technology has raced ahead of public policy thereby creating new concerns for ethicists and policy makers Legislative oversight or the freedom to pursue reproductive technologies at any cost this debate is far from over      *Hatching* Jenni Quilter, 2022-12-06 A provocative examination of reproductive technologies that questions our understanding of fertility motherhood and the female body Since the world's first test tube baby was born in 1978 in vitro fertilization has made the unimaginable possible for millions of people but its revolutionary potential remains unrealized Today fertility centers continue to reinforce conservative norms of motherhood and family and infertility remains a deeply emotional experience many women are reluctant to discuss In this

vivid and incisive personal and cultural history Jenni Quilter explores what it is like to be one of those women both the site of a bold experiment and a potential mother caught between fearing and yearning Quilter observes her own experience with the eye of a critic recounting the pleasures and pains of objectification how medicine mediates between women and their bodies how marketing redefines pregnancy and early parenthood as a set of products how we celebrate the natural and denigrate the artificial With nuance empathy and a fierce intellect Quilter asks urgent questions about what it means to desire a child and how much freedom reproductive technologies actually offer Her writing embraces the complexities of motherhood and the humanity of IVF the waiting rooms the message boards and the genetic permutations of what a thoroughly modern family might mean
