THE LOW-CARB RECIPE COOKBOOK 50 SIMPLE, HEALTHY AND DELICIOUS LOW CARB DIET RECIPES TO LOSE WEIGHT Wilfrid Perkins,2021-08-23 INTRODUCTION In addition to pure sugar too many carbohydrates are responsible for unwanted weight gain with growing love handles One reason that low carb is an ongoing

trend The low carb diet translated few carbohydrates is about a drastic reduction in carbohydrates in the diet Because only when the intake of sugar and carbohydrates is reduced does the body fall back on its energy reserves fat pads and thus ensure weight reduction in the event of a supposed lack of food So to get rid of the unpopular love handles the diet with recipes with no or less carbohydrates is particularly effective However it should be noted that existing fatty tissue cells only empty themselves during the diet and then remain in the body If you revert to your old unhealthy eating style too quickly you will replenish yourself quickly Which foods are allowed on a low carb diet As soon as you eat according to the low carb method i e the number of carbohydrates in the food is reduced the proportion of fat and protein that is not stored in the body to the same extent may be increased at the same time In contrast to other forms of diet there is no calorie deficit associated with a feeling of hunger More fats and protein also create a longer lasting feeling of satiety So don't go hungry but replace sugar and carbohydrates with high protein low carbohydrate dishes You should avoid these foods The following foods are the main culprits for unwanted weight gain In addition to every form of sugar this includes potatoes rice and all products made from wheat flour such as pasta pizza and bread Their unchecked consumption becomes noticeable when consumed too high converted into sugar as an unpopular and often constantly growing fat reserve In addition one should avoid all forms of honey and sugar jams Nutella all sweets artificial sweeteners and industrially produced juices in low carb dishes In the case of grain and vegetables potatoes rice all wheat flour products such as pizza bread pastries cakes and noodles and all industrially manufactured finished products are to be avoided Also a few particularly starchy foods such as bananas corn parsnips sweet potatoes peas and muesli are not necessarily recommended How good is low carb and how can a yo yo effect be avoided If you want to avoid the dreaded yo yo effect of rapid weight gain after the reduction diet a general change in the eating habits that you have come to love is inevitable The adaptation of eating behavior to age also plays an important role In old age unlike in younger years the body builds up extensive fat reserves more quickly due to hormonal changes A strict short term switch to low carb works wonders here However nutritionists advise against a permanent strict diet according to the specifications of low carb To avoid the yo yo effect they recommend a balanced diet with around 50% carbohydrates afterwards So you don't have to go without your beloved bread potatoes and delicious pasta all the time In this cooking guide you will find 50 SIMPLE HEALTHY AND DELICIOUS LOW CARB DIET RECIPES TO LOSE WEIGHT BUY NOW and let your customer become addicted to this incredible BOOK
