

BASEBALL PRACTICE PLAN

Warm-up (10 minutes)	Good stretching habits should be formed early in a player's career. Make sure to have players stretch shoulders, back and leg muscles. Don't be afraid to work in some strengthening exercises into the older player's routine. During stretching is a good time to let the team know the plan for the day's practice. A team jog is a good way to finish the warm up.
Form throwing (10 - 15 minutes)	Whether you have them start on one knee, and work up to a regular standing throw - or start with the standing throwing motion - playing catch is one of the more important things you'll have the players do at practice. Most throwing warm-ups are not supervised carefully and are therefore mindless. Have the players develop proper throwing and catching <u>mechanics</u> . Proper habits developed now will last a lifetime and really pay off down the road.
Base running basics (10 minutes)	Now is a great time to teach proper base running, while also developing conditioning and getting the players ready for the rest of practice. You could split the players into two groups (one coach with each). Have half of the kids go from home to first and work on running through the bag, then rounding the bag. The other group could work on scoring from second base. Once each player has done four or five trips, rotate stations.
Fielding (10 minutes)	Break into groups of groundballs and fly balls. Coaches can hit (or throw) the balls to the players. Make sure to teach proper techniques (footwork, glove placement, using two hands, etc.). Rotate stations.
Game situation: Where's the play? (10 - 15 minutes)	Time here will depend on the age you are coaching. The more inexperienced the more time you will need to spend on baseball basics. But even high school and college teams will benefit from situational drills. This work can win -- or lose -- many games during the season. Rotate groups of three runners with fielders. This is also a great conditioning drill for the base runners.
Hitting (20 - 25 minutes)	Again, break players into groups. The age groups and how many coaches you have will determine how many stations you can have. The more the better, as this means more swings in the given time frame. Obviously with <u>six-year olds</u> you cannot leave them alone doing <u>see</u> work, but with older kids you can. You can use many different stations with tee work, soft toss and live hitting. The goal is <u>get 60-75 swings total each in 20 minutes</u> .

Packaging Baseball Mathew J. Bartkowiak, Yuya Kiuchi, 2014-01-10 Walk through any major or minor league park today and the sights, sounds, and smells of baseball overwhelm. Teams long ago figured out that this immersive quality is a powerful draw and the fan experience has been a major force in their marketing plans. In recent years, advancing technology has altered not only that experience, which now includes LED video boards and blasts of digital music, but the marketing and revenue opportunities for the game. Fans all over the world can subscribe to video and audio streams, acquire credit cards emblazoned with team logos, and follow their favorite players through league-sanctioned blogs. Baseball's ambition and reach are now truly global. Focusing on the game's dual identities as pastime and economic engine, the authors examine the ways that baseball is packaged, promoted, and consumed in the United States and increasingly abroad.

The Toyota Template Phillip Ledbetter, 2018-01-12 Much has been written about Toyota over the last 30 years, focusing on both its products, superior vehicles, and its operational excellence based on its Toyota Production System (TPS). The Toyota Template

details the critical concepts and methods that Taiichi Ohno implemented in developing the Toyota Production System This book is different however regarding the parallels it draws between Toyota's pre TPS condition and companies today who are attempting to become more efficient and Lean In view of efficiency excellence culture and general Leanness many organizations are in the same position as Toyota prior to implementing what was once called the Ohno System The building of TPS with the goal to eliminate waste evolved as problems were encountered and solutions put in place A wonderful byproduct of these years of work was the growth of a problem solving culture throughout Toyota that is unique in the business world Currently the Toyota Production System is well established Though constantly improving the historical picture is visible The question many have tried to answer for their own companies is how can they achieve world class efficiency The Toyota Template answers this question This book Explains the critically important elements of the Toyota Production System Analyzes the sequence of implementation as the system developed Places these elements in a logical order of implementation based on the history and current knowledge In addition it addresses the effect of each element on the culture The author was prompted to write this book because of his personal observations of the failure of most attempts to develop Lean systems What makes Toyota stand out is not any of the individual elements It is crucially important to have all the elements together as a system Most attempts have been focused on bits and pieces of the elements or the tools The Toyota Template is about the relevance of the Toyota Production System to any type of business today It is not an all inclusive explanation of every aspect of TPS Rather this book succinctly identifies the key elements places them in a logical sequential order of implementation and explains how each contributed to the formation of the Toyota culture
