Structural Surveying

A guide to the principles and practice of domestic building surveys from instruction through to writing the report, including information on the surveyor's legal liabilities. Examples of typical defects, their causes and identification are given and a specimen survey report is included.

FET Colleges

This book inquires into the global wave of student mobilizations that have arisen in the aftermath of the economic crisis of 2008, accounting for their historical and sociological significance. More specifically, its eleven chapters explore the role of students as political actors: their ability to build effective organizations, to make political alliances with other actors, and to win public consensus, as well as their impact on cultural, political, and policy outcomes. To do so, the volume examines case studies in England, Chile, South Africa, Quebec, and Hong Kong, covering Europe, Africa, Asia, and North and Latin America. Grouped into two major sections, the collection covers the organizational structures of student movements and their alliances and outcomes. Ultimately, this volume examines the understudied political aspects of student unrest, exploring how student mobilizations—driven by indebtedness, precariousness, the corporatization of the university, and other issues—correspond to larger processes of change with wider implications in society.

Student Movements in Late Neoliberalism

With forty well structured and easy to follow topics to choose from, each workbook has a wide range of case studies, questions and activities to meet both an individual or organization's training needs. Whether studying for an ILM qualification or looking to enhance the skills of your employees, Super Series provides essential solutions, frameworks and techniques to support management and leadership development.

Planning Training and Development

"Disability is not always central to claims about diversity and inclusion in higher education, but should be. This collection reveals the pervasiveness of disability issues and considerations within many higher education populations and settings, from classrooms to physical environments to policy impacts on students, faculty, administrators, and staff. While disclosing one's disability and identifying shared experiences can engender moments of solidarity, the situation is always complicated by the intersecting factors of race and ethnicity, gender, sexuality, and class. The contributors to *Negotiating Disability* use disclosure as a starting point to explore how disability is named, identified, claimed, and negotiated within higher education settings. The essays reflect a broad set of scholarly approaches (e.g., interviews with disabled students and analyses of statistical data) and research interests (e.g., implications for future policy and change, representations of disability in popular culture, literature, and media)." —Cover.
