The Aha! Moment David Jones, 2012-01-24 This book is about having ideas and a much longer haul making them work David Jones best known for his Daedalus column tells a multitude of stories about creators and their creations including his own fantastical seeming contributions to mainstream science such as the unrideable bicycle and chemical gardens in space His theory of creativity endows each of us with a Random Ideas Generator a Censor and an Observer Reasoner Jones applies his theory to a wide range of weird scientific experiments that he has conducted for serious scientific papers for challenging printed expositions and for presentations to a TV audience He even suggests new ones not yet tried Creativity is as essential to science as curiosity physical intuition and shrewd deduction from well planned experiments But says Jones ingenuity is very uncertain Even for the greatest inventors about 80 percent of ideas fail Jokiness can help and so can lots of random data Jones has plenty of clever advice that will help spark that madly brilliant private thought in the first place and will encourage you to take it further Neither dense nor demanding The Aha Moment is engrossing edifying and scientifically serious yet it is lightly written and asks lots of silly questions As Jones shows it can often pay to take an absurd idea seriously
