Makers La Nueva Revolucion Industrial Nuevos Paradigmas:

Makers Chris Anderson, 2013-07-31 Las impresoras 3D están revolucionando la manufactura mundial. Pequeños fabricantes están utilizando las tecnologías de creación rápida de prototipos para producir artículos personalizados de calidad industrial. Las personas ahora pueden compartir sus diseños por internet y mejorarlos colectivamente antes de imprimirlos desde muebles hasta automviles. En esta reveladora obra Chris Anderson, fundador de 3D Robotics y director de la revista Wired, muestra cómo la conjunción de las impresoras 3D y el hardware libre están por iniciar una tercera revolución industrial y presenta casos de compañías que ya aprovechan esta tendencia. getAbstract recomienda esta obra a emprendedores, jefes de producción, fabricantes y a quien desee conocer este movimiento que ya es imparable. **Ciberpolítica** VV.AA, 2017-04-28 La ciberpolítica es el objeto de esta obra que abarca el estudio de las sinergias y de los diferentes dilemas tecnológicos y las implicaciones que pueden surgir tanto de la conformación de las redes como del funcionamiento de la democracia y de la gestión del gobierno abierto. Los temas planteados en esta monografía son variados entre los que cabe citar las habilidades digitales, la brecha democrática, el software libre y las políticas deliberativas, las campañas electorales y la comunicación a través de Twitter, reputación digital y transparencia digital, economía colaborativa e internet, la censura y vigilancia e internet, violencia de género y ciberespacio y el ciberactivismo político. **La casa industrializada** Pablo Saiz-Sánchez, 2021-05-17 Para muchos la idea de producir casas en fábricas es una idea con futuro. De hecho, en los ámbitos académicos se conoce como la idea de futuro más antigua que existe. El sueño de la Casa Industrializada se origina en la primera revolución industrial, consolidándose en la segunda tras la producción del Ford T con adhesión de los padres del movimiento moderno.

Aprendizaje personalizado y education maker Otto Federico von Feigenblatt, Beatriz Peña-Acuña, Manuel Jesús Cardoso-Pulido, 2022-02-01 Este texto pretende aportar estudios acerca del aprendizaje personalizado y del education maker. Se trata de dos metodologías que están implantadas en otros sistemas educativos como es el caso de Finlandia o los Estados Unidos. El aprendizaje personalizado se aplica deseablemente a todo el alumnado. Es especialmente necesario que esté dirigido a alumnos en situación de diversidad y a segmentos vulnerables. Por su parte, el método de education maker nace en materias tecnológicas, pero esta estrategia o alguno de los componentes pueden trasladarse a otras disciplinas. Entendemos que poco a poco estas dos estrategias han de ir implantándose en el mundo hispanohablante. Ante la carencia de textos introductorios en castellano dentro del panorama editorial y además ante el atractivo de estas nuevas metodologías innovadoras, con este volumen se busca difundir y adentrarse en estas estrategias docentes con estudios y casos concretos. El libro va dirigido a otros agentes educativos: padres, investigadores, etc. Asimismo, incorpora otros enfoques críticos con respecto a la educación. En esta obra participan académicos con un interés en la educación y en la innovación. Cuentan todos ellos con formación multidisciplinar y pertenecen a diversas universidades españolas y una norteamericana, con lo cual aportan una riqueza coral de contenidos. *Repensar la Smart City* Marco Berlinguer, 2019-01-30 Esta obra es el resultado de un estudio llevado a
