Making A Killing The Political Economy Of Animal Rights:

Making a Killing Bob Torres, 2007 Using Marxism anarchism and social ecology to explore domination power and hierarchy the author criticizes the use and abuse of animals in capitalist society and argues for the abolition of animal involvement in industry and as a human food source [The Commodification of Farm Animals](#) Sophie Riley, 2022-02-15 This book examines how the developments in veterinary science philosophy economics and law converged during the nineteenth and early twentieth centuries to entrench farm animals along a commodification pathway It covers two neglected areas of study the importance of international veterinary conferences to domestic regimes and the influence of early global treaties that dealt with animal health on domestic quarantine measures The author concludes by arguing that society needs to reconsider its understanding and the place of the welfare paradigm in animal production systems As it presently stands this paradigm can be used to justify almost any self serving reason to abrogate ethical principles The topic of this book will appeal to a wide readership not only scholars students and educators but also people involved in animal production interested parties and experts in the animal welfare and animal rights sector as well as policy makers and regulators who will find this work informative and thought provoking *The Animal Rights Debate* Gary L. Francione, Robert Garner, 2010-10-26 Gary L. Francione is a law professor and leading philosopher of animal rights theory Robert Garner is a political theorist specializing in the philosophy and politics of animal protection Francione maintains that we have no moral justification for using nonhumans and argues that because animals are property or economic commodities laws or industry practices requiring humane treatment will as a general matter fail to provide any meaningful level of protection Garner favors a version of animal rights that focuses on eliminating animal suffering and adopts a protectionist approach maintaining that although the traditional animal welfare ethic is philosophically flawed it can contribute strategically to the achievement of animal rights ends As they spar Francione and Garner deconstruct the animal protection movement in the United States the United Kingdom Europe and elsewhere discussing the practices of such organizations as PETA which joins with McDonalds and other animal users to improve the slaughter of animals They also examine American and European laws and campaigns from both the rights and welfare perspectives identifying weaknesses and strengths that give shape to future legislation and action **The Violent Technologies of Extraction** Alexander Dunlap, Jostein Jakobsen, 2019-10-15 Offering a thought provoking theoretical conversation around ecological crisis and natural resource extraction this book suggests that we are on a trajectory geared towards total extractivism guided by the mythological Worldeater The authors discuss why and how we have come to live in this catastrophic predicament rooting the present in an original perspective that animates the forces of global techno capitalist development They argue that the Worldeater helps us make sense of the insatiable forces that transform convert and consume the world The book combines this unique approach with detailed academic review of critical agrarian studies and political ecology the militarization of nature and the conventional and green extraction nexus It seeks

radical reflection on the role people play in the construction and perpetuation of these crises and concludes with some suggestions on how to tackle them

The Wrath of Capital Adrian Parr, 2014-09-02 Although climate change has become the dominant concern of the twenty first century global powers refuse to implement the changes necessary to reverse these trends Instead they have neoliberalized nature and climate change politics and discourse and there are indications of a more virulent strain of capital accumulation on the horizon Adrian Parr calls attention to the problematic socioeconomic conditions of neoliberal capitalism underpinning the world s environmental challenges and she argues that until we grasp the implications of neoliberalism s interference in climate change talks and policy humanity is on track to an irreversible crisis Parr not only exposes the global failure to produce equitable political options for environmental regulation but she also breaks down the dominant political paradigms hindering the discovery of viable alternatives She highlights the neoliberalization of nature in the development of green technologies land use dietary habits reproductive practices consumption patterns design strategies and media She dismisses the notion that the free market can solve debilitating environmental degradation and climate change as nothing more than a political ghost emptied of its collective aspirations Decrying what she perceives as a failure of the human imagination and an impoverishment of political institutions Parr ruminates on the nature of change and existence in the absence of a future The sustainability movement she contends must engage more aggressively with the logic and cultural manifestations of consumer economics to take hold of a more transformative politics If the economically powerful continue to monopolize the meaning of environmental change she warns new and more promising collective solutions will fail to take root

Springer, Jennifer Mateer, Martin Locret-Collet, Maleea Acker, 2021-10-15 The Earth is in crisis We know this We have known this for a long time In the throes of the unfolding nightmare we call capitalism it is not hard to see and hear the violence that is being enacted against the planet If we are to move beyond the idea that humanity is tasked with expressing our dominion over nature and towards a renewed integral understanding of humanity as firmly located within the biosphere as an anarchist political ecology demands then we have to start interrogating the privileges hierarchies and human centric frames that guide our ways of knowing and being in the world This volume centers around the idea that anarchism as a conceptual framework encourages us to contend with the multiple lines of difference the various iterations of privilege and the manifold set of archies that undergird our understandings of the world and crucially our place within it
